AFTERCARE

After Your LED Session

There's no downtime, and you can go right back to your day. Results build with each visit, so consistency matters most.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Right after	A healthy glow, or slight pinkness or warmth that fades within an hour or so.	Keep the moisturizer and SPF I applied. Makeup is fine if your skin isn't red.	Rubbing your face or eyes. Long, direct sun exposure.
First 24 hours	Skin may feel a little dry. A breakout may surface as blemishes come to a head.	Gentle cleanser, moisturizer and drink water. SPF 30+ in the morning.	Strong exfoliants, scrubs, tanning, and hot tubs or saunas if you feel warm or pink.
Between sessions	Gradual, subtle change. Most people notice more after several visits.	Keep your homecare routine. Tell me about any new medicine or supplement.	Picking at breakouts. Skipping sessions, which slows results.
After the series	Results fade slowly over time without upkeep.	Book maintenance about every [2–4] weeks. SPF every day.	Using a home LED device without asking me first, so we don't overdo it.

Be consistent

Results come from the full series, not one visit.

SPF daily

Broad-spectrum 30+, rain or shine.

Share med changes

Some medicines make skin and eyes light-sensitive.

Come clean

Arrive makeup-free if you can, so the light reaches your skin.

CALL ME RIGHT AWAY IF YOU NOTICE

- Redness, warmth or a rash lasting more than a day
- Eye pain, spots, blurry vision or headaches after treatment
- Blisters, burning or skin that feels sunburned
- New dark patches on your skin

A seizure, trouble breathing, or swelling of the face or throat: call 911.
