AFTERCARE

After Your Lash & Brow Tint

The first day sets your color. A little care now keeps it rich for weeks, and protects your eyes.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Right after	Darker, fuller-looking lashes or brows. Brows may look boldest today. Faint skin stain fades fast.	Put contacts back in only once your eyes feel completely normal.	Rubbing your eyes or brows.
First 24 hours	Color settles and softens slightly.	Keep the area dry if you can. Pat gently if it gets wet.	Oil-based removers, steam, sauna, swimming, mascara and brow products.
Between visits	Gradual fading over [3–6] weeks; brows usually fade faster than lashes.	Use gentle, oil-free cleansers around the eyes. SPF on brow skin.	Scrubs, peels or retinoids on the brows, which fade color faster.
Next tint	Ready for a refresh at about [4–6] weeks.	Tell me about any reaction, new medicine or eye problem.	Home tint kits or salon tints elsewhere between visits.

Hands off
No rubbing your eyes or brows.

Dry for a day
Skip steam, swimming and makeup for 24 hours.

Go oil-free
Oils lift tint. Choose oil-free removers.

Speak up
Any itch or swelling means we re-test first.

CALL ME RIGHT AWAY IF YOU NOTICE

- Itchy, red or swollen eyelids or brows, even a day or two later
- Blurry vision or sensitivity to light
- Eye pain, redness, watering or discharge that doesn't settle
- Rash, blisters or crusting on the skin

If tint gets in your eye: rinse with clean, lukewarm water for at least 15 minutes, then see an eye doctor or urgent care the same day.

Trouble breathing, or swelling of the face or throat: call 911.
