THE ESTHETICIAN COLLECTION

Client Forms, Protocols & Aftercare

Written by a licensed esthetician. Every page edits in a free Canva account, in US Letter and A4.

What's inside

CLIENT FORMS

Client intake & health history
Skin analysis & treatment plan
General treatment consent
Photo & media release
Treatment record & progress log
Deposit, cancellation & no-show policy
Virtual consultation form
Minor / guardian consent

TREATMENT SETS

Consent, protocol, pre-care & healing-timeline aftercare for: chemical peel, dermaplaning, microneedling, waxing, signature facial & extractions, acne facial, hydrodermabrasion, LED, microcurrent, lash & brow tint

CLIENT TAKEAWAYS

Homecare plan with layering guide
Pre-treatment prep sheet
Daily SPF guide
Aftercare cards (4 × 6 in)

BUSINESS TOOLS

Contraindication cheat sheet
Patch test record
Adverse reaction & incident report
Sanitation & disinfection log

How to make them yours

1
In a free Canva account, click Create, then Upload, and choose this PDF.

2
Canva turns every page into an editable design.

3
Add your logo, business name and colors.

4
Download as PDF to print, or fill in on a tablet.

BEFORE YOU USE THESE

These templates are a professional starting point, not legal advice. Scope of practice differs by state: some states cap peel strength, and some don't allow estheticians to microneedle at all. Check your state board's rules, set the waiting periods marked in each form to your own policy, and have a local attorney review your consent forms.

Rather go paperless?

Send, sign and store every one of these forms from your phone with SlickChart.

slickchart.app

Created by Ashley Watson, licensed esthetician

For use by the purchaser's own business. Not for resale.

My answers are true and complete. I'll tell you before each visit if my health, medications or skincare change.	
Esthetic services are not medical treatment. My esthetician does not diagnose and may refer me to a physician.	
Results vary and aren't guaranteed. Temporary redness, tingling or flaking can happen.	
I won't hold the provider responsible for reactions caused by information I didn't share.	
I'll follow my aftercare instructions, including broad-spectrum SPF every day.	
I can ask questions or stop a treatment at any time.	
I've read the deposit and cancellation policy. Changes need [24] hours' notice.	

Your privacy: your information is kept confidential, stored securely, and used only to provide your services. It is never shared without your written consent except as required by law. Records are kept for [__] years. Specialized treatments need their own consent form.

Chemical Peel Consent

YOUR LOGO

CLIENT NAME | BIRTH DATE | DATE

PEEL PRODUCT | STRENGTH % | PH | AREA

About your peel

WHAT IT IS

A professional acid solution removes the outermost layer of dead skin cells to improve tone, texture, breakouts or fine lines. This is a superficial peel; it works on the surface layer only.

WHAT YOU'LL FEEL

Tingling, stinging, warmth or itching for a few minutes. Tell me right away if it feels too strong; I can remove or neutralize the peel at any time.

WHAT TO EXPECT

Redness for a few hours to 2 days, then possible flaking for 3 to 7 days. Most people need a series of peels 2 to 4 weeks apart. Results build gradually and aren't permanent.

OTHER OPTIONS

No treatment, homecare products, gentler exfoliation such as enzymes, or a referral to a physician for stronger peels, laser or prescription care.

POSSIBLE RISKS AND SIDE EFFECTS

- Darker patches (post-inflammatory hyperpigmentation), more likely in deeper skin tones
- Redness that lasts longer than expected
- Allergic or irritant reaction
- Uneven results or a visible line where the peel ends
- Melasma that gets worse
- Lighter patches (hypopigmentation)
- A cold sore outbreak if you've had them before
- Blistering, crusting or, rarely, infection
- A temporary breakout or milia
- Scarring, which is rare

Sun exposure, picking at flaking skin and skipping aftercare all raise these risks.

Before your peel

	Yes	No
Pregnant or nursing	☐	☐
Accutane (isotretinoin) in the past 6 months	☐	☐
Prescription retinoid in the past 7 days	☐	☐
Retinol, acids, scrubs or benzoyl peroxide in the past 3 days	☐	☐
Waxing, hair-removal cream or electrolysis on the area in the past 7 days	☐	☐
Botox, filler, laser or microdermabrasion in the past 2 weeks	☐	☐

	Yes	No
Tanning bed or long sun exposure in the past 2 weeks, or a sunburn now	☐	☐
A cold sore now, or a history of cold sores	☐	☐
Allergy to aspirin or salicylates	☐	☐
Antibiotics or other sun-sensitizing medication	☐	☐
Keloids, autoimmune condition, diabetes or slow healing	☐	☐
A rash, wound or infection in the area	☐	☐

A yes doesn't always mean no peel. We'll talk it through, and I may adjust the treatment, reschedule, or ask for your physician's OK.

Your Agreement

CLIENT NAME _____

Please initial each statement

	Initials
I've shared my full health and medication history honestly. I'll tell my esthetician about any change before each peel.	
I've read and understand the possible risks on page 1, including pigment changes. Scarring is rare but possible.	
I'll follow my pre-care and aftercare, wear SPF 30+ every day, avoid tanning, and won't pick or peel flaking skin.	
Results vary and aren't guaranteed. A series of [3–6] peels about [2–4] weeks apart is usually needed.	
I'll speak up right away if the peel burns or itches too strongly, and I can stop the treatment at any time.	
This consent covers my peel series. I'll re-confirm my health history at each visit.	
Services can't be refunded once performed. [Add your series or package terms.]	
I've had the chance to ask questions, and they were answered to my satisfaction.

OFFICE USE

☐ Product and strength allowed under [State] board rules ☐ Pre-care given ☐ Aftercare given

Fitzpatrick _____

PRACTITIONER PROTOCOL

Superficial Chemical Peel

The manufacturer's directions for your peel always come first. Times are typical.

CONSULT
Intake, Fitzpatrick type and skin analysis done. Consent signed. Product and strength within your state's scope.

PATCH TEST
Behind the ear or along the jaw a few days before the first peel. Check at 24–48 hours.

PRIME 2–4 WEEKS
Daily SPF 30+. For Fitzpatrick IV–VI or pigment, add a brightener such as azelaic or kojic acid.

SET UP FIRST ☐ Neutralizer & cool water ☐ Saline eyewash ☐ Eye pads ☐ Petrolatum ☐ Fan & timer ☐ Gauze or fan brush

#	STEP	TIME	HOW
1	**Review & inspect**	3–5 min	Confirm health changes. Look under magnification. Stop for an active cold sore, open lesions or sunburn.
2	**Cleanse**	2 min	Cover hair. Gentle, non-exfoliating cleanser. Rinse and pat dry.
3	**Degrease**	1–2 min	Prep solution or 70% isopropyl until skin looks matte. Even prep gives even penetration.
4	**Protect**	1 min	Petrolatum on eye corners, nostril creases, lip corners and lip line. Eye pads on.
5	**Apply**	Per label	Forehead, cheeks, nose, around the mouth and chin, then feather the jawline. Note the time of each layer.
6	**Monitor**	Throughout	Never leave the client. Ask for sensation 0–10. Fan for comfort, but not with salicylic acid.
7	**Watch the endpoint**	—	AHAs: stop at even redness; any white or gray means neutralize now. Salicylic: a white crystal film that wipes off is normal. Superficial peels: no frost, or pinpoint Level I at most.
8	**Neutralize or remove**	1–2 min	AHAs (glycolic, lactic, mandelic): neutralizer until fizzing and itching stop, then cool water. Salicylic and Jessner's self-limit: rinse with cool water.
9	**Cool**	3–5 min	Cool compresses.
10	**Calm & protect**	2 min	Soothing or occlusive product, then mineral SPF (zinc oxide or titanium dioxide).
11	**Educate & rebook**	3 min	Walk through the aftercare handout. Book the next peel 2–4 weeks out.

IF SOMETHING GOES WRONG

- Too hot or frosting: neutralize or rinse right away, then cool.
- In the eye: flush with saline; same-day physician visit.
- Hives or swelling: remove product. Call 911 if breathing is affected.
- Blisters, oozing or pustules later: refer to a physician.
- Always write an incident report and check in with the client within 24–48 hours.

RECORD FOR THIS PEEL

Product · lot	Strength % · pH	Layers · time each	Total contact time
Endpoint · redness 0–3 · frost	**Neutralizer · when**	**Client sensation 0–10**	**Reaction · initials**

AFTERCARE

Caring for Your Skin After a Peel

Fresh skin is delicate for about a week. Here's what to expect day by day, and how to protect your results.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Day 0 today	Pinkness for a few hours, tightness, a little warmth.	Wash tonight with lukewarm water and the gentle cleanser we chose. Moisturize. SPF if you go outside.	Makeup until I say it's OK, heat and sweating.
Days 1–2	Tight, dry, slightly pink skin. Flaking may begin around day 2.	Moisturize at least twice a day. SPF 30+ every morning, and reapply outdoors.	Hot showers on your face, sauna, steam, hot tubs, swimming, hard workouts and scrubs.
Days 3–5 peak peeling	The most flaking and peeling, and some mild itching.	Keep moisturizing. Snip loose flakes with clean, small scissors if they bother you.	Picking or pulling skin (it can leave dark marks), retinol, acids, waxing and hair-removal cream.
Days 6–7	Peeling winds down and your new skin looks fresh and smooth.	Stay gentle and keep up your SPF.	Exfoliants, active serums and facial waxing for one more day or two.
Week 2+	Healed. Tone keeps evening out over the next few weeks.	Once flaking has fully stopped, restart your retinol and actives as planned. SPF every day.	Tanning for 2 weeks, and other treatments until I've checked your skin.

SPF daily
Broad-spectrum 30+, rain or shine.

Hands off
Let flakes fall on their own.

Stay cool
Lukewarm water, no heat or sweat for 48 hours.

Keep it simple
Cleanser, moisturizer, SPF. That's it for a week.

CALL ME RIGHT AWAY IF YOU NOTICE

- Blisters, oozing, yellow crusts or pimples that look infected
- Burning or itching that doesn't stop
- Dark patches, or redness lasting more than 1–2 weeks
- Pain or swelling that gets worse instead of better
- A cold sore or a cluster of small blisters
- Hives or any sign of an allergic reaction

Trouble breathing, or swelling of the face or throat: call 911.

General Treatment Consent

CLIENT NAME _____

BIRTH DATE _____ DATE _____ SERVICES I'M CONSENTING TO _____

WHAT THIS COVERS
Facials, extractions, exfoliation, masks, massage, skin devices and waxing. [Edit to your menu.]

WHAT YOU MAY FEEL
Warmth, tingling, pressure with extractions and a quick sting as wax comes off. It fades fast.

YOUR RIGHT TO STOP
You can ask questions, or pause or stop any service at any time. Just tell me.

Possible risks

SERVICE	COMMON, TEMPORARY	LESS COMMON
Facials & extractions	Redness for a few hours; a few breakouts	Allergic reaction; marks or bruising
Exfoliation	Pinkness or light flaking for 1 to 3 days	Irritation, sun sensitivity, darker patches
Waxing & tweezing	Brief pain, redness and bumps for 1 to 2 days	Ingrown hairs, folliculitis, burns, skin lifting
Massage & devices	Mild redness or warmth	Not used with some implants, pregnancy or seizures

Isotretinoin (now or in the past 6 months), prescription retinoids and some antibiotics thin the skin, so waxing could lift or tear it.

Please initial each statement

	Initials
My answers are true. I'll tell you about any health, medication or skincare change before each visit.	
These services are cosmetic. You don't diagnose or treat conditions and may refer me to a physician.	
I've read the possible risks above. Results vary, and no specific result has been promised to me.	
I'll speak up if anything is too hot or painful. You may skip a service that isn't right for my skin.	
I'll follow aftercare. If a reaction lasts or worsens, I'll contact you and see a healthcare provider.	
I release [Your Business Name] from reactions caused by details I didn't share or aftercare I skipped, as far as [State] law allows.	
This consent lasts 12 months. Specialized treatments, such as peels, need their own consent.	

Under 18: a parent or legal guardian must sign here and complete the Minor Consent form before any service. [State] rules may also require them to stay during the visit.

CLIENT NAME _____ BIRTH DATE _____ DATE _____

About dermaplaning

WHAT IT IS
A sterile, single-use blade gently lifts dead surface skin and fine 'peach fuzz' hair.

WHAT YOU'LL FEEL
Light, feathery strokes. It shouldn't hurt; tell me if anything stings.

WHAT TO EXPECT
Smooth skin, pink for a few hours. Hair grows back soft and fine, not thicker or darker.

OTHER OPTIONS
No treatment, an enzyme or gentle peel, or a doctor visit for coarse or fast-growing hair.

POSSIBLE RISKS AND SIDE EFFECTS

- Small nicks or cuts, which are uncommon
- Breakouts, or spread of bacteria over active acne
- A cold sore flare or, rarely, infection
- Redness, dryness or stinging for a day or two
- Darker patches, more likely in deeper skin tones
- More sun sensitivity for about a week

Before your treatment

	Yes	No
Accutane (isotretinoin) in the past 6 months	☐	☐
Prescription retinoid in the past 14 days	☐	☐
Retinol, acids or scrubs in the past 3 days	☐	☐
Active acne, cold sore or rash on the face now	☐	☐
Sunburn now, or tanning in the past 2 weeks	☐	☐

	Yes	No
Peel, laser or facial waxing in the past 2 weeks	☐	☐
Botox or filler in the past 2 weeks	☐	☐
Blood thinners or a bleeding disorder	☐	☐
Rosacea, eczema or psoriasis on the face	☐	☐
Diabetes, keloids or slow healing	☐	☐

I never dermaplane over active breakouts; I'll work around them or reschedule. A yes may mean a doctor's OK first.

Please initial

	Initials
My health and medication history is complete. I'll share any changes before each visit.	
I understand the risks above. Results vary, aren't guaranteed, and hair will grow back.	
I'll follow my aftercare and wear SPF 30+ daily. I can ask to stop at any time.	
My questions were answered. Services can't be refunded once performed.	

PHOTOS ☐ Private chart only ☐ Social, face hidden ☐ Social, face visible ☐ No photos

PRACTITIONER PROTOCOL

Dermaplaning

The blade maker's directions and your state board's rules always come first. Times are typical.

SCOPE
Some states limit or bar blade services for estheticians. Confirm with your board in writing.

CONSULT
Intake and consent signed. No Accutane in 6 months. No active acne, cold sore or sunburn.

INTERVAL
Every 3–4 weeks, about one skin cycle. Pair with a peel only if your state and the peel allow it.

SET UP FIRST ☐ Sealed sterile blade & handle ☐ Sharps container in reach ☐ Gloves ☐ Prep solution ☐ Gauze & first-aid kit ☐ Mag lamp

#	STEP	TIME	HOW
1	**Review & inspect**	3 min	Confirm health changes. Under the mag lamp, map breakouts, raised moles, skin tags and broken skin to skip.
2	**Cleanse**	2 min	Hair back. Gentle cleanser, rinse. Gloves on.
3	**Prep dry**	1–2 min	Prep solution or 70% isopropyl, then let skin dry fully. Blade work is done on clean, dry skin.
4	**Open the blade**	1 min	Open the sealed blade in front of the client. Attach to the handle pointing away from you and the client.
5	**Hold taut, set angle**	—	Stretch skin firmly with your free hand. Blade at about 45°. Too flat or too upright raises the risk of nicks.
6	**Plane**	15–20 min	Short, light, feathering strokes, one section at a time. Skip the eyelids, the eyebrows unless shaping is in scope, the nostrils and lips, and anything you mapped.
7	**Dispose at once**	1 min	Remove the blade with a one-handed method straight into the sharps container. Never recap, set down loose or reuse.
8	**Calm**	5–10 min	Wipe away debris. Hydrating, fragrance-free mask or serum. No acids or retinol today.
9	**Protect**	1 min	Moisturizer, then mineral SPF 30+.
10	**Educate & rebook**	3 min	Aftercare handout. Remind them hair grows back the same soft texture. Book 3–4 weeks out.

IF SOMETHING GOES WRONG

- Nick: stop, press with clean gauze, skip that area.
- Blood on the blade: discard it and open a new one.
- Burning or welts: stop and cool. No more product.
- Sharps injury to you: wash, follow your exposure plan.
- Always write an incident report and check in with the client within 24–48 hours.

AFTERCARE

After Your Dermaplaning

Your skin is freshly exfoliated and extra open to products and sun for about a week. Here's how to keep that glow.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Day 0 today	Smooth, soft skin. Light pinkness or warmth for a few hours.	Leave on what I applied. Tonight, rinse with lukewarm water and moisturize.	Makeup for [__] hours, touching your face, heat, sweat and pools.
Days 1–2	Slight dryness or sensitivity. Products may tingle more than usual.	Gentle cleanser, moisturizer, SPF 30+ every morning. Clean pillowcase.	Sauna, steam, hot tubs, swimming, hard workouts, scrubs and facial waxing.
Days 3–7	Skin looks bright and even. A small breakout can happen.	Keep it simple and hydrated. Restart retinol and acids once nothing stings, usually by day [3–5].	Picking at bumps, tanning, and other exfoliating treatments.
Weeks 2–4	Fine hair grows back soft, the same as before. Glow fades as skin renews.	SPF daily. Book your next visit about 3–4 weeks out.	Home blades or razors on your face between visits unless we've talked about it.

WILL MY HAIR GROW BACK THICKER?

No. The blade cuts fine hair at the surface and doesn't touch the root, so it can't change how thick, dark or fast it grows. Regrowth can feel blunt for a few days because the tip is cut straight. If you notice coarse or fast-growing facial hair, mention it; it can be worth a visit to your doctor.

SPF daily

Broad-spectrum 30+. New skin burns faster.

Hands off

Clean hands only, and no picking.

Stay cool

No heat, sweat or pools for 24–48 hours.

Go gentle

Skip actives until nothing stings.

CALL ME RIGHT AWAY IF YOU NOTICE

- A nick that is red, warm, swollen or oozing
- Bumps that look infected or keep spreading
- Dark patches that appear in the next few weeks
- Burning or stinging that lasts past day 2
- A cold sore or a cluster of small blisters
- Hives or any sign of an allergic reaction

Trouble breathing, or swelling of the face or throat: call 911.

CHECK YOUR STATE · Some states, including California, don't allow estheticians to microneedle. Use this form only where your license covers it. Delete this note before printing.

CLIENT NAME _____ BIRTH DATE _____ DATE _____ AREA _____ MAX DEPTH [__ mm] _____

WHAT IT IS
An FDA-cleared pen with a sterile, single-use needle cartridge makes tiny channels at a cosmetic depth to improve texture and tone.

WHAT YOU'LL FEEL
Light pressure, vibration or a sandpaper feel. Bony areas are more tender. Tell me if you need a break.

WHAT TO EXPECT
Redness like a sunburn for 1–3 days, then dryness. Results build slowly over a series of visits and aren't permanent.

OTHER OPTIONS
No treatment, peels or homecare, or a physician for deeper scars, laser or prescription care.

POSSIBLE RISKS AND SIDE EFFECTS

· Redness, swelling, pinpoint bleeding, bruising
· Dryness, peeling, itching, milia or breakouts
· Infection, or a reaction to products or metal
· Darker or lighter patches, more likely in deeper skin tones
· A cold sore flare if you've had them before
· Track-like marks or scarring, which are rare

Before your treatment

	Yes	No
Pregnant or nursing	☐	☐
Accutane (isotretinoin) in the past 6 months	☐	☐

PRACTITIONER PROTOCOL

Cosmetic Microneedling

The device maker's directions always come first. Times are typical.

CHECK YOUR STATE FIRST · Many states, including California, bar estheticians from microneedling; others cap depth or require a medical director. Get it in writing from your board. Stay at or under [__ mm, per your state & device].

DEVICE
FDA-cleared pen only. Sealed, sterile, single-use cartridge for every client and every visit.

CONSULT
Intake, consent and Fitzpatrick done. No Accutane in 6 months. Retinoids off 5 days.

INTERVAL
4–6 weeks apart, never under 3. Series of 3–6. Prime deeper skin tones with daily SPF.

SET UP FIRST ☐ Pen in a fresh barrier sleeve ☐ Sealed cartridge ☐ Sharps container ☐ Gloves & sterile gauze ☐ Antiseptic & saline ☐ Approved glide

#	STEP	TIME	HOW
1	**Review & photo**	3–5 min	Confirm health changes. Stop for active acne, cold sore, infection or sunburn. Before photos.
2	**Cleanse & numb**	2–30 min	Cleanse. Topical numbing only if your state allows it for estheticians; remove it completely.
3	**Antiseptic prep**	2 min	Fresh gloves. Antiseptic over the whole area; let it dry. Hair covered.
4	**Open & set depth**	1 min	Open the cartridge in front of the client. Set depth for each zone: shallower on the forehead and around the eyes.
5	**Treat**	15–20 min	Thin layer of glide the device maker allows. Skin taut, pen upright, light pressure. Small sections, 2–3 crosshatch passes. Ease off over bone.
6	**Watch the endpoint**	—	Even pink to red. Cosmetic depth gives little or no pinpoint bleeding. Don't chase bleeding.
7	**Dispose**	1 min	Cartridge straight into sharps. Never reuse. Discard the sleeve; disinfect the pen per the maker.
8	**Cleanse & calm**	5 min	Saline gauze. Cool compress. Simple, sterile, fragrance-free soothing product only.
9	**Educate & rebook**	3 min	Aftercare handout. Mineral SPF from tomorrow. Book 4–6 weeks out.

IF SOMETHING GOES WRONG

- Heavy bleeding: stop, press with gauze.
- Hives or swelling: stop. 911 if breathing is affected.
- Pustules, oozing, fever later: refer to a physician.
- Needlestick to you: wash, follow your exposure plan.
- Always write an incident report and check in with the client within 24–48 hours.

RECORD FOR THIS TREATMENT

Device · cartridge lot	Depth by zone (mm)	Speed · passes	Glide · numbing used
Endpoint · redness 0–3	**Products after**	**Client comfort 0–10**	**Reaction · initials**

AFTERCARE

After Your Microneedling

Tiny channels close within a day or two, and your skin keeps rebuilding for months. Clean and gentle is the whole plan.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Day 0 today	Red, warm and tight like a sunburn. Mild swelling or a little clear fluid.	Clean hands only. Tonight, rinse with lukewarm water and apply only the soothing product I gave you.	Makeup, sunscreen, touching, sweating, alcohol-based or scented products.
Days 1–2	Pinkness fading. Tight, dry, sensitive. Products may sting.	Gentle cleanser, plain moisturizer, mineral SPF 30+. Clean pillowcase. Mineral makeup from [__] hours if needed.	Workouts, sauna, steam, pools, hot tubs, the beach and direct sun.
Days 3–7	Dryness, light flaking or rough patches. A few small bumps are possible.	Keep moisturizing and use SPF every day. Let flakes fall on their own.	Retinol, acids, vitamin C, scrubs, waxing and picking for 7 days.
Week 2+	Healed on the surface. Texture keeps improving over 3–6 months.	Restart your routine slowly once nothing stings. Book your next visit 4–6 weeks out.	Tanning, and other facial treatments until I've checked your skin.

WHY SO FEW PRODUCTS?

For the first day or two, the tiny channels let products sink in far deeper than usual. Strong actives, fragrance or anything not sterile can sting, irritate or trigger a reaction. Use only what I've approved until your skin feels normal again, and ask me before trying anything new.

Keep it clean

Wash hands first. Fresh towel and pillowcase.

SPF daily

Mineral 30+ from day 1. Hat outdoors.

No sweat

No workouts, heat or pools for 48 hours.

Go gentle

No actives for a full week.

CALL ME RIGHT AWAY IF YOU NOTICE

- Pus, yellow crusts, or bumps that keep spreading
- Fever, chills or swollen glands
- Lines, tracks or dark patches that don't fade
- Redness, heat or pain that gets worse after day 2
- A cold sore or a cluster of small blisters
- Hives, itching or any sign of an allergic reaction

Trouble breathing, or swelling of the face or throat: call 911.

CLIENT NAME _____ BIRTH DATE _____ DATE _____

AREAS ☐ Brows ☐ Lip / chin ☐ Underarm ☐ Arms ☐ Legs ☐ Bikini ☐ Brazilian ☐ Other

WHAT IT IS
Warm wax lifts hair from the root. I use hard wax for delicate areas and soft wax with strips for larger ones.

WHAT YOU'LL FEEL
Warmth, then a quick sting as each strip comes off. It usually gets easier with regular visits.

WHAT TO EXPECT
Redness or small bumps for a few hours to a day. Smooth for about 3–6 weeks. Hair about 1/4 inch long works best.

OTHER OPTIONS
Shaving, trimming, sugaring, threading, or laser or electrolysis from a qualified provider.

POSSIBLE RISKS AND SIDE EFFECTS

- Redness, swelling, small bumps or pinpoint bleeding
- Ingrown hairs or infected hair follicles
- Bruising, or darker patches in deeper skin tones
- Skin lifting or tearing, mostly with thin or treated skin
- Burns, which are rare when wax is tested
- A cold sore flare (lip waxing) or allergic reaction

Before your wax

	Yes	No
Accutane (isotretinoin) in the past 6 months	☐	☐
Retinoid on the area in the past 7 days	☐	☐
Acids, scrubs or peel there in the past 3 days	☐	☐
Antibiotics or steroids right now	☐	☐
Laser or microneedling there in 2 weeks	☐	☐

	Yes	No
Sunburn, rash, cut or cold sore on the area now	☐	☐
Blood thinners or a bleeding disorder	☐	☐
Diabetes or poor circulation	☐	☐
Varicose veins, moles or skin tags in the area	☐	☐
Pregnant, or allergy to rosin, pine or latex	☐	☐

Please initial

	Initials
My health and medication history is complete. I'll tell you about changes, including new skin products.	
I understand the risks above. Results vary and hair grows back.	
For intimate waxing, I know what will be uncovered and that I can ask to pause or stop at any time.	
I'll follow my aftercare. Services can't be refunded once performed.

PRACTITIONER PROTOCOL

Face & Body Waxing

The wax maker's directions and heater settings always come first. Times are typical.

CONSULT

Consent signed. No Accutane in 6 months; retinoids paused 7 days; no antibiotics or steroids now.

PICK THE WAX

Hard wax: face, underarm, bikini, Brazilian, sensitive skin. Soft wax and strips: arms, legs, back.

HAIR LENGTH

About 1/4 inch, or 2–3 weeks of growth. Trim longer hair first. Rebook every 3–6 weeks.

SET UP FIRST ☐ Clean pot, no drips on the rim ☐ Plenty of single-use sticks ☐ Fresh table paper ☐ Gloves ☐ Pre- & post-wax products ☐ Tweezers, scissors, cold pack

#	STEP	TIME	HOW
1	**Review & inspect**	2 min	Confirm meds and products. Skip moles, skin tags, varicose veins, broken or sunburned skin.
2	**Cleanse & dry**	1–2 min	Gloves on. Pre-wax cleanser; skin must be fully dry. Hard wax: thin layer of pre-wax oil. Soft wax: light dusting of powder.
3	**Test the heat**	Every time	Test on the inside of your own wrist, then a small patch on the client. Warm, never hot. Don't trust the dial alone.
4	**Apply**	—	New stick for every dip; never double-dip. Apply in the direction of growth. Small sections. Never wax the same spot more than twice.
5	**Remove**	—	Hold skin taut. Pull fast, low and parallel to the skin, against growth. Press right away with a gloved hand.
6	**Brazilian care**	20–30 min	Explain each step and drape. Client helps hold skin taut. Hard wax only. Never apply wax to mucous membrane.
7	**Tidy**	2–5 min	Tweeze strays. Remove residue with post-wax oil.
8	**Soothe**	1 min	Calming, fragrance-free post-wax product. Cold pack if needed.
9	**Clean & rebook**	3 min	Bin sticks, strips, gloves and paper. Disinfect the station and wipe the pot. Aftercare handout. Book 3–6 weeks out.

SANITATION, EVERY CLIENT

- Heated wax doesn't kill germs. One stick, one dip.
- Fresh gloves for each client, and new ones if torn.
- Wooden sticks only; never put metal in the pot.
- Wax that touched skin is never returned to the pot.

IF SOMETHING GOES WRONG

- Burn: cool running water 10–20 minutes.
- Blisters or a large burn: refer to a physician.
- Skin lifts: stop there. Cool, cover, no more wax.
- Hives or swelling: stop. 911 if breathing is affected.
- Always write an incident report and check in with the client within 24–48 hours.

Hair length · growth	**Skin response**	**Lifting · bruising**	**Next visit · initials**

AFTERCARE

After Your Wax

Freshly waxed follicles are open and easily irritated for a day or two. A little care now means smoother skin and fewer ingrown hairs.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Day 0 today	Redness, tenderness and small raised bumps around follicles. Tiny dots of blood can happen.	Wear loose, breathable cotton. Use a cool compress if it feels warm. Keep the area clean.	Hot showers and baths, sauna, steam, hot tubs, workouts, sex, tanning and scented products.
Days 1–2	Bumps settle. Skin is smooth but still a bit sensitive.	Lukewarm water, gentle fragrance-free soap, light moisturizer. Wash hands before touching.	Heat, friction and tight clothing for 24–48 hours. Pools, the beach, deodorant on fresh underarms.
Day 3 on	Back to normal. New hair starts to grow in.	Gently exfoliate 2–3 times a week and moisturize daily to help prevent ingrown hairs.	Picking or squeezing bumps, and digging out ingrowns.
Weeks 3–6	Regrowth, often finer and sparser over regular visits.	Let it grow to about 1/4 inch. Rebook on schedule to keep hair in one cycle.	Shaving or tweezing between visits, which resets your growth.

KEEPING INGROWN HAIRS AWAY

An ingrown hair curls back into the skin instead of growing out, leaving a small, sometimes itchy bump. They're most common on the bikini line and legs. Gentle exfoliation and daily moisturizer keep the surface soft so new hairs can break through. If one gets red, sore or full of pus, don't dig at it; let me take a look.

Stay cool

No heat or sweat for 24–48 hours.

Go loose

Soft, breathable fabric to cut friction.

Exfoliate later

Start gently after 48 hours, not before.

Hands off

No picking bumps or ingrowns.

CALL ME RIGHT AWAY IF YOU NOTICE

- Pus-filled bumps, spreading redness or warmth
- A blister, raw patch, or skin that looks lifted
- A cold sore after lip waxing
- Bumps that last more than a few days or keep growing
- A painful lump, or a fever
- Hives or any sign of an allergic reaction

Trouble breathing, or swelling of the face or throat: call 911.

Signature Facial & Extractions

Follow your product directions and your state board's rules. Times are typical for a 60-minute facial.

CONSULT

Intake and consent signed. Note Fitzpatrick type, retinoid or isotretinoin use, and any rosacea.

STEAM OR NOT

Skip steam for rosacea, visible capillaries, sensitivity, asthma, sunburn or a recent peel. Use warm towels or an enzyme.

LANCET RULES

Some states ban lancets entirely. Where allowed: sterile, single-use, surface only, straight to sharps.

SET UP FIRST ☐ Nitrile gloves ☐ Mag lamp ☐ Cotton or swabs ☐ Antiseptic ☐ Sharps container ☐ Steamer filled, preheated ☐ Disinfected tools

#	STEP	TIME	HOW
1	**Review & cleanse**	5 min	Confirm changes. Remove makeup, double cleanse, pat dry.
2	**Analyze**	3 min	Under magnification. Map open and closed comedones and milia. Mark inflamed lesions as no-touch.
3	**Exfoliate & soften**	8–10 min	Enzyme or gentle AHA/BHA. Steam 12–18 in. away for 5–8 min if cleared; check comfort often. Or warm towels.
4	**Extract**	10 min max	Fresh gloves, cotton-wrapped fingertips or swabs. Press down, then in and up from both sides. Never use nails.
5	**Know the limits**	—	Two or three tries per pore, then leave it for next visit. Never extract papules, pustules, nodules or cysts. Stop if skin bruises or bleeds freely.
6	**Disinfect**	2 min	Antiseptic toner on extracted areas. Optional high frequency per device directions.
7	**Massage**	10 min	Avoid freshly extracted areas. Light pressure over capillaries.
8	**Mask**	10 min	Calming or clay mask for skin type. Remove with cool, damp mitts.
9	**Finish**	3 min	Serum, moisturizer, broad-spectrum SPF 30+.
10	**Educate & rebook**	3 min	Aftercare handout. Explain purging vs breakout. Rebook in 4–6 weeks.

IF SOMETHING GOES WRONG

- Dizzy or flushed under steam: stop, sit up, cool cloth, water.
- Hives or swelling: remove product. Call 911 if breathing is affected.
- Lancet stick or blood exposure: wash, follow your exposure plan, and write an incident report.
- Bleeding: clean gauze and light pressure; stop extracting there.
- Signs of infection later: refer to a physician.

RECORD FOR THIS TREATMENT

Skin type · Fitzpatrick	Exfoliant · time	Steam · minutes or none	Areas extracted

AFTERCARE

After Your Facial

Your skin is freshly cleared and a little sensitive. A few easy habits over the next few days protect your glow.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Day 0 first 24 hours	Pinkness for a few hours. Small red dots or tiny scabs where pores were cleared.	Wash tonight with lukewarm water and a gentle cleanser. Moisturize. SPF 30+ if you go outside.	Makeup for 12–24 hours, touching or picking, workouts, sauna, steam rooms and swimming pools.
Days 2–3	Marks fade. Skin may feel a bit dry or tight.	Moisturize morning and night. Use a clean pillowcase. Keep your phone screen clean.	Retinol, acids, scrubs, waxing and hair-removal cream for 48 hours.
Days 4–7 possible purging	A few small whiteheads in your usual spots as loosened clogs surface. This settles within a week or so.	Let them come up and calm down on their own. Restart your normal routine once skin feels comfortable.	Squeezing anything at home. It can push debris deeper and leave dark marks or scars.
Week 2+	Smoother, brighter skin. Pores look clearer.	Keep up your homecare plan and daily SPF. Book your next facial.	Ignoring breakouts that are new, painful, spreading or lasting longer than 2 weeks. Tell me about them.

Hands off
No picking or squeezing. Leave that to me.

SPF daily
Broad-spectrum 30+, even on cloudy days.

Keep it clean
Fresh towel, pillowcase and makeup brushes.

Go gentle
No actives or heat for 48 hours.

PURGING USUALLY LOOKS LIKE

Small whiteheads or blackheads in the places you normally break out, showing up within a few days and clearing within about a week.

A REACTION OR BREAKOUT LOOKS LIKE

Red, itchy, burning or painful bumps, or spots in new areas, that keep coming or last longer than 2 weeks. Let me know.

CALL ME RIGHT AWAY IF YOU NOTICE

- Swelling, warmth or pain that gets worse
- Redness that lasts more than 2–3 days
- A painful, deep bump where a pore was cleared
- Yellow crusts, oozing or a red streak
- A rash, hives or itching after new products
- A cold sore or a cluster of small blisters

Trouble breathing, or swelling of the face or throat: call 911.

PRACTITIONER PROTOCOL

Acne Facial

Mild to moderate, non-cystic acne only.
Product and device directions come first.
Times are typical.

REFER OUT
Grade III–IV, nodules or cysts, scarring, on isotretinoin, or no change after 3 months. Facial only with physician OK.

DEEPER SKIN TONES
Fitzpatrick IV–VI: PIH risk. Lower strengths, no aggressive extraction, no steam on inflamed skin, tinted SPF.

ACIDS & BPO
No salicylic with aspirin allergy or pregnancy without a doctor's OK. BPO bleaches towels and fabric; warn the client.

SET UP FIRST ☐ Nitrile gloves ☐ Mag lamp ☐ Cotton or swabs ☐ Acne exfoliant ☐ LED & opaque goggles ☐ Sharps container ☐ Timer

#	STEP	TIME	HOW
1	**Review & grade**	5 min	Confirm meds and homecare. Map lesions: comedones, papules, pustules, nodules. Photo with consent.
2	**Cleanse**	3 min	Gentle or salicylic cleanser. No scrubbing over active breakouts.
3	**Exfoliate**	Per label	Salicylic or mandelic solution to loosen clogs; mandelic or lower strength for deeper tones. Use in place of steam.
4	**Extract**	10 min max	Fresh gloves. Open and closed comedones only, cotton-wrapped fingertips or swabs. Two or three tries, then move on.
5	**Leave alone**	—	Never press papules, nodules or cysts. Surface pustules only if your state and training allow; never lance.
6	**Calm**	10 min	Antiseptic toner, then a sulfur, clay or calming mask. Cool to remove.
7	**Blue LED, optional**	Per device	Clean, dry skin. Opaque goggles. Skip for photosensitizing meds or light-triggered seizures. Helps red bumps, not cysts.
8	**Finish**	2 min	Oil-free moisturizer, broad-spectrum SPF 30+; tinted with iron oxides for PIH-prone skin.
9	**Homecare plan**	5 min	One acne active at a time; BPO start at 2.5%. Commit 6–12 weeks. Rebook every 2–4 weeks.

IF SOMETHING GOES WRONG

- Strong burning: remove exfoliant with cool water right away.
- Hives or swelling: remove product. Call 911 if breathing is affected.
- Bleeding: clean gauze and pressure; stop extracting there.
- Worsening, painful or spreading acne: refer to a physician.
- Always write an incident report and check in with the client within 24–48 hours.

Check your state board's scope rules before use

AFTERCARE

After Your Acne Facial

Clear skin is built at home between visits. Be gentle, be consistent, and give your routine time to work.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Day 0 first 24 hours	Pinkness, mild tingling, and small red marks where pores were cleared.	Wash tonight with lukewarm water and a gentle cleanser. Oil-free moisturizer. SPF 30+ outdoors.	Makeup for 12–24 hours, picking, sweaty workouts, sauna and pools.
Days 2–3	Some dryness. A few small whiteheads may surface.	Restart your acne products on the night I told you. Moisturize if you feel dry.	Scrubs, extra acids or new products. Don't layer actives we didn't plan.
Weeks 1–4	Breakouts come and go. Dryness or peeling while skin adjusts to your products.	Use your routine every day, as directed. Benzoyl peroxide can bleach towels and pillowcases: use white ones.	Stopping and starting products, or switching every week. Give each one time.
Weeks 6–12	Fewer new breakouts. Dark marks fade slowly; that can take months.	Keep going and keep your facial visits. SPF every day, tinted if you get dark marks.	Tanning, which deepens marks. Squeezing, which can scar.

Hands off
Picking leaves dark marks and scars.

Every day
Consistency beats strength. Give it 6–12 weeks.

SPF daily
Broad-spectrum 30+ keeps marks from darkening.

Keep it clean
Fresh pillowcase, phone and makeup brushes.

Hydrodermabrasion Facial Consent

YOUR LOGO

CLIENT NAME | BIRTH DATE | DATE

WHAT IT IS
A device facial that cleanses and exfoliates, applies a mild acid solution, gently suctions out pores, then infuses hydrating serums.

WHAT YOU'LL FEEL
A cool, wet tip gliding with light suction, and brief tingling from the acid step. Tell me if anything feels too strong.

WHAT TO EXPECT
Little or no downtime. Some pinkness for a few hours. Results are temporary; regular visits keep them going.

OTHER OPTIONS
A classic facial, a light peel, homecare products only, or a referral to a dermatologist.

POSSIBLE RISKS AND SIDE EFFECTS

· Redness, mild swelling, stinging or itching
· Suction marks, bruising or broken capillaries
· Reaction to an acid or serum
· Dryness or light flaking for a day or two
· A few breakouts afterward
· Dark marks, more likely in deeper skin tones

Before your facial

	Yes	No
Isotretinoin now or in the past 6 months	☐	☐
Prescription retinoid in the past 7 days	☐	☐
Peel, laser, Botox or filler in the past 2 weeks	☐	☐
Waxing or hair-removal cream in the past 5 days	☐	☐
Allergy to aspirin, salicylates or shellfish	☐	☐

	Yes	No
Rosacea flare, broken capillaries or easy bruising	☐	☐
Cystic acne, or a cold sore now or often	☐	☐
Sunburn, rash, eczema or open wound in the area	☐	☐
Pregnant or nursing	☐	☐
Autoimmune condition, diabetes or slow healing	☐	☐

A yes doesn't always mean no treatment. I may skip the acid step, lower suction, or reschedule.

Please initial

	Initials
My health and medication history is complete. I'll tell you about changes before each visit.	
I understand this is a cosmetic treatment. Results vary, are temporary and aren't guaranteed.	
I'll follow my aftercare and wear SPF 30+ every day.	
I can ask questions, and I can stop any part of the treatment at any time.

PRACTITIONER PROTOCOL

Hydrodermabrasion Facial

Your device manufacturer's settings, solutions and training always come first. Times are typical.

CONSULT

Intake and consent signed. Device use within your state's esthetics scope and your training.

CHOOSE SOLUTIONS

Skip the acid step for salicylate allergy, sensitivity, rosacea flare or recent retinoid; use a gentle solution.

TIP HYGIENE

New single-use tip per client, or clean and disinfect reusable parts exactly per the manual. Never reuse disposables.

SET UP FIRST ☐ Gloves ☐ New tips ☐ Solutions in date ☐ Waste jar empty ☐ Suction tested on forearm ☐ Eye pads

#	STEP	TIME	HOW
1	**Review & inspect**	3 min	Confirm changes. Look under magnification. Stop for cold sore, open lesions, sunburn or cystic acne.
2	**Cleanse**	2 min	Remove makeup and SPF. Pat dry. Eye pads on.
3	**Cleanse & exfoliate**	5–7 min	Exfoliating tip with cleansing solution. Short overlapping passes, skin held taut, one to two passes per zone.
4	**Acid step**	3–5 min	Mild AHA/BHA solution per manufacturer. Watch for even pinkness; stop at hot spots or blanching.
5	**Vortex extraction**	5–7 min	Suction with extraction solution. Keep the tip moving; never park it. Lowest setting over capillaries, thin or bony areas.
6	**Infuse**	5 min	Hydrating or antioxidant serum through the infusion tip.
7	**LED, optional**	Per device	Blue for breakouts, red for calming. Opaque goggles.
8	**Finish**	2 min	Moisturizer and mineral SPF 30+. Show the client the waste jar if they'd like.
9	**Clean down**	5 min	Discard tips. Empty and clean the waste jar. Flush lines and disinfect handpiece per the manual.

IF SOMETHING GOES WRONG

- Burning: stop the acid, rinse with cool water, cool compress.
- Suction mark or bruise: lower suction, skip the area.
- Hives or swelling: remove product. Call 911 if breathing is affected.
- Solution in the eye: flush with saline; see a doctor if irritation lasts.
- Device fault: stop, log it, and contact the manufacturer. Always write an incident report.

RECORD FOR THIS TREATMENT

Device · tip type	Suction setting	Acid solution · lot	Infusion serum
LED · color · minutes	Skin after · redness 0–3	Tips replaced · Y/N	Reaction · initials

AFTERCARE

After Your Hydrodermabrasion

Freshly exfoliated skin absorbs everything and burns more easily. Keep it simple for a couple of days.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Day 0 first 24 hours	A glow, light pinkness or slight tightness for a few hours.	Leave the serums on tonight if you can. Wash gently with lukewarm water. Moisturize. SPF if outside.	Makeup for 6–12 hours, hot showers on your face, sauna, steam rooms, hard workouts and pools.
Days 2–3	Skin feels smooth. A little dryness or light flaking is possible.	Gentle cleanser, moisturizer, SPF 30+ every morning.	Retinol, acids, scrubs, waxing, hair-removal cream and other facial treatments for 48–72 hours.
Day 4+	Back to normal. A few small breakouts can surface and settle within a week.	Restart your usual routine and actives. Keep up SPF and drink water.	Tanning or long sun exposure for a week. Picking at any spots.
Weeks 2–4	The glow fades gradually as skin renews.	Book your next visit. Regular treatments keep results going.	Booking a peel, laser or microneedling without telling me first.

SPF daily
Fresh skin burns faster. Broad-spectrum 30+.

Stay cool
No heat, steam or heavy sweat for 24 hours.

Pause actives
No retinol or acids for 48–72 hours.

Hydrate
Moisturize morning and night.

HOW OFTEN
Most clients come every [4] weeks, about one skin cycle. For breakouts or dullness, I may suggest a short series [2–4] weeks apart.

BEFORE YOUR NEXT VISIT
Stop retinoids [5–7] days before and avoid waxing or sunburn the week before. Tell me about any new medication.

CALL ME RIGHT AWAY IF YOU NOTICE
- Redness or burning lasting more than 24–48 hours
- Blisters, oozing or yellow crusts
- Dark patches developing
- Bruising or suction marks that don't fade
- A rash, hives or itching
- A cold sore or a cluster of small blisters

Trouble breathing, or swelling of the face or throat: call 911.

LED Light Therapy Consent

YOUR LOGO

CLIENT NAME | BIRTH DATE | DATE | LIGHT COLOR | AREA

WHAT IT IS

Low-level light from LEDs, with no UV. Blue light works near the surface and is used for breakouts. Red and invisible near-infrared reach deeper and are used for calming and the look of fine lines.

WHAT YOU'LL FEEL

Usually nothing, or gentle warmth. You'll wear eye protection the whole time. Tell me if you feel hot, dizzy, get a headache or want to stop.

WHAT TO EXPECT

No downtime. Changes are gradual and need a series of [8–12] sessions, then maintenance. Results vary, aren't permanent and aren't guaranteed.

OTHER OPTIONS

No treatment, homecare products, other facials, or a referral to a physician for medical light treatments or prescription care.

POSSIBLE RISKS AND SIDE EFFECTS (UNCOMMON)

- Temporary redness, warmth, dryness or tightness
- Rash or irritation if you take a light-sensitizing medicine
- Eye strain, glare or a headache
- Darker patches in some skin tones, or a flare of rosacea

Before your session

	Yes	No
Epilepsy, or seizures or migraines set off by light	☐	☐
Light-sensitizing medicine (e.g. some antibiotics, isotretinoin, lithium)	☐	☐
Lupus or another light-sensitive condition	☐	☐
A retinal or inherited eye condition, or recent eye surgery	☐	☐

	Yes	No
Pregnant or nursing	☐	☐
Cancer now, or skin cancer in the area	☐	☐
Botox, filler, peel, laser or a new tattoo in the area in the past [2] weeks	☐	☐
Rash, wound, cold sore or infection in the area	☐	☐

A yes doesn't always mean no treatment. I follow the device maker's guidance and may adjust, reschedule or ask for your physician's OK.

Please initial

	Initials
I've shared my health history honestly and will tell you about any change, including new medicines.	
I'll keep the eye protection on and my eyes closed, and I won't look into the lights.	
LED is a cosmetic service, not medical treatment. Results vary and aren't guaranteed. I can stop at any time.	
This covers my LED series. My questions were answered. Services can't be refunded.

PRACTITIONER PROTOCOL

LED Light Therapy

Your device maker's directions for distance, time and settings always come first. Times are typical.

CONSULT
Intake and consent signed. Screen for seizures, light-sensitizing meds, eye conditions, pregnancy and cancer.

CHOOSE THE LIGHT
Blue: surface, for breakouts. Red: calming, tone. Near-infrared (invisible): deepest. Combine per device.

PLAN THE SERIES
Typically [1–3] sessions a week for [4–6] weeks, then every [2–4] weeks. Use the device's cleared settings.

SET UP FIRST ☐ Opaque eye shields for client ☐ Goggles for you ☐ Panel cleaned ☐ Cords and arm checked ☐ Timer

#	STEP	TIME	HOW
1	**Review & inspect**	2–3 min	Ask about new medicines and supplements since last visit. Stop for open lesions, active cold sore or sunburn.
2	**Cleanse**	2–3 min	Remove all makeup and SPF so nothing blocks or reflects the light. Pat dry.
3	**Prep (optional)**	Varies	Any facial steps before the light. No acids, retinoids or fragranced products under the light unless the maker allows them.
4	**Protect eyes**	1 min	Opaque shields on the client, eyes closed. Put your own goggles on before switching on.
5	**Position**	1 min	Set the panel at the maker's distance, evenly over the area. Don't touch the skin unless designed to.
6	**Treat**	Per device	Usually [10–20] min. Use the preset program. Don't stack extra cycles to speed results.
7	**Monitor**	Throughout	Stay in the room. Check comfort and warmth. Stop for heat, dizziness, headache or any seizure sign.
8	**Finish**	2 min	Switch off before removing eye shields. Check the skin for redness.
9	**Calm & protect**	2 min	Hydrating serum and moisturizer, then broad-spectrum SPF 30+.
10	**Clean & rebook**	3 min	Disinfect panel and shields per maker. Give aftercare. Book the next session in the series.

IF SOMETHING GOES WRONG

· Too warm or red: stop, cool compress, note it.
· Seizure: switch off, keep the client safe on their side, call 911.
· Eye pain or vision change: stop; refer to an eye doctor.
· Rash or hives: stop. Call 911 if breathing is affected.
· Always write an incident report and check in with the client within 24–48 hours.

AFTERCARE

After Your LED Session

There's no downtime, and you can go right back to your day. Results build with each visit, so consistency matters most.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Right after	A healthy glow, or slight pinkness or warmth that fades within an hour or so.	Keep the moisturizer and SPF I applied. Makeup is fine if your skin isn't red.	Rubbing your face or eyes. Long, direct sun exposure.
First 24 hours	Skin may feel a little dry. A breakout may surface as blemishes come to a head.	Gentle cleanser, moisturizer and drink water. SPF 30+ in the morning.	Strong exfoliants, scrubs, tanning, and hot tubs or saunas if you feel warm or pink.
Between sessions	Gradual, subtle change. Most people notice more after several visits.	Keep your homecare routine. Tell me about any new medicine or supplement.	Picking at breakouts. Skipping sessions, which slows results.
After the series	Results fade slowly over time without upkeep.	Book maintenance about every [2–4] weeks. SPF every day.	Using a home LED device without asking me first, so we don't overdo it.

Be consistent

Results come from the full series, not one visit.

SPF daily

Broad-spectrum 30+, rain or shine.

Share med changes

Some medicines make skin and eyes light-sensitive.

Come clean

Arrive makeup-free if you can, so the light reaches your skin.

CALL ME RIGHT AWAY IF YOU NOTICE

- Redness, warmth or a rash lasting more than a day
- Eye pain, spots, blurry vision or headaches after treatment
- Blisters, burning or skin that feels sunburned
- New dark patches on your skin

A seizure, trouble breathing, or swelling of the face or throat: call 911.

SESSION # OF SERIES _____

YOUR NEXT SESSION _____

MAINTENANCE FROM _____

INFORMED CONSENT

Microcurrent Facial Consent

YOUR LOGO

CLIENT NAME | BIRTH DATE | DATE | AREA

WHAT IT IS

A very low-level electrical current, delivered through probes or tips over a conductive gel, used to temporarily tone and lift the look of facial muscles and skin.

WHAT YOU'LL FEEL

Mostly nothing, or a light tingle. Some people notice a metallic taste or brief flashes of light near the eyes. Tell me and I'll lower the setting.

WHAT TO EXPECT

No downtime. Effects are temporary and build with a series of [6–12] sessions, then regular maintenance. Results vary and aren't guaranteed.

OTHER OPTIONS

No treatment, facial massage, homecare products, or a referral to a physician for injectables or other medical treatments.

POSSIBLE RISKS AND SIDE EFFECTS (UNCOMMON)

· Brief redness, tingling or mild muscle twitching
· Skin irritation from the conductive gel
· Headache or tiredness after treatment
· Temporary metallic taste or light flashes

Before your session

	Yes	No
Pacemaker, defibrillator or other implanted electrical device	☐	☐
Epilepsy or a history of seizures	☐	☐
Pregnant or possibly pregnant	☐	☐
Active cancer, or a suspicious spot in the area	☐	☐
Heart condition, or blood clots or thrombosis	☐	☐

	Yes	No
Metal plates, pins or threads in the face	☐	☐
Botox in the past [__] weeks or filler in the past [__] weeks	☐	☐
Facial surgery or laser in the past [__] months	☐	☐
Bell's palsy, or numb areas on the face	☐	☐
Broken skin, rash or infection in the area	☐	☐

An implanted electrical device, epilepsy, pregnancy or active cancer means no microcurrent. For other yes answers I follow the device maker's guidance and may ask for your physician's or injector's OK.

Please initial

	Initials
I've shared my health history honestly and will tell you about any change, new implant or injectable before each session.	
I'll remove jewelry from the area and speak up if I feel discomfort. I can stop at any time.	
Microcurrent is a cosmetic service. Effects are temporary, need maintenance and aren't guaranteed.	
This covers my series. My questions were answered. Services can't be refunded.

ESTHETICIAN SIGNATURE · LICENSE # | DATE

PRACTITIONER PROTOCOL

Microcurrent Facial

Your device maker's directions for settings, tips and timing always come first. Times are typical.

HARD STOPS
Pacemaker or implanted device, epilepsy, pregnancy, active cancer. Metal in the face: follow device maker.

INJECTABLES
Wait [__] weeks after neurotoxin and [__] weeks after filler, or as the client's injector advises.

SERIES
Typically [1–2] a week for [6–12] sessions, then maintenance every [2–4] weeks.

SET UP FIRST ☐ Conductive gel (plenty) ☐ Clean probes or tips ☐ Device charged, cords checked ☐ Jewelry off ☐ Mirror for before/after

#	STEP	TIME	HOW
1	**Review & photo**	3 min	Confirm no new implants, injectables or pregnancy. Take a before photo if consented.
2	**Cleanse**	2–3 min	Remove all makeup and oils, which block current. Light exfoliation only if planned.
3	**Apply gel**	1 min	Even, generous layer on one section at a time. Re-wet as it dries; dry skin stings.
4	**Set & test**	1 min	Start at the lowest setting. Test on the jaw and adjust to comfort; more isn't better.
5	**Work the face**	20–40 min	Both probes on the skin. Glide or hold per maker, moving upward and outward, one side then match the other.
6	**Keep clear of**	Throughout	Eyes and eyelids, temples, front of the neck and thyroid, over the heart. Stay off broken skin.
7	**Monitor**	Throughout	Ask about tingling, taste or flashes. Lower the setting or add gel as needed.
8	**Remove & finish**	3 min	Wipe off gel. Serum, moisturizer, broad-spectrum SPF. After photo if consented.
9	**Clean & rebook**	3 min	Clean and disinfect probes per maker. Give aftercare. Book the next session in the series.

IF SOMETHING GOES WRONG

- Stinging or a hot spot: lift probes, add gel, lower setting.
- Dizziness, faintness or palpitations: stop, recline, monitor.
- Seizure: stop, keep the client safe on their side, call 911.
- Rash or welts from gel: remove, cool compress, note product.
- Always write an incident report and check in with the client within 24–48 hours.

RECORD FOR THIS TREATMENT

AFTERCARE

After Your Microcurrent Facial

No downtime. The lifted, toned look is temporary and builds with regular sessions, so here's how to get the most from each one.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Right after	A lifted, refreshed look. Light pinkness or a faint tingle that fades quickly.	Keep the products I applied. Makeup is fine. Drink plenty of water.	Heavy rubbing or massage tools on your face for the rest of the day.
First 24 hours	Some people feel mildly tired or have a light headache.	Stay hydrated and rest if you need to. Gentle cleanser, moisturizer, SPF 30+.	Strong exfoliants or new active products. Booking injectables before asking me.
Between sessions	The effect softens over a few days; each session tends to hold a little longer.	Keep your series on schedule. Tell me about new implants, injectables or pregnancy.	Long gaps early in the series, which slow your progress.
After the series	Results gradually fade without upkeep.	Maintenance about every [2–4] weeks. SPF every day.	Using a home microcurrent device without asking me first.

Hydrate
Water before and after helps you feel your best.

Stay on schedule
Results build with steady sessions.

Keep me posted
New implants, injectables or pregnancy change your plan.

SPF daily
Broad-spectrum 30+, rain or shine.

CALL ME RIGHT AWAY IF YOU NOTICE

- Redness, a rash or itching that lasts more than a day
- Twitching, numbness or weakness in your face
- A headache that lasts or keeps coming back
- Any change near a filler or injectable area

Chest pain, a seizure, trouble breathing, or swelling of the face or throat: call 911.

INFORMED CONSENT

Lash & Brow Tint Consent

YOUR LOGO

CLIENT NAME _____ BIRTH DATE _____ DATE _____ SERVICE ☐ Lashes ☐ Brows

WHAT IT IS & WHAT YOU'LL FEEL

A professional tint darkens your lashes or brows. Your eyes stay closed with pads under them. Most people feel nothing; tell me right away if anything stings.

EXPECT & OPTIONS

Color usually fades over about [3–6] weeks. Shade can vary. Alternatives: mascara, brow pencil or powder, or no treatment.

PLEASE READ: FDA AND STATE RULES

The FDA warns that permanent lash and brow tints and dyes have been known to cause serious eye injuries, including blindness. The only color additive the FDA allows for coloring lashes and brows is silver nitrate, in professional-use products, for ages 16 and up. Other tints are not FDA-approved for this use. State rules on tinting vary. The product I use today: [product name · type].

POSSIBLE RISKS

· Allergic reaction: itching, redness or swelling of the lids
· Rarely, serious eye injury or loss of vision
· Stinging or irritation if tint touches the eye
· Skin staining, or a shade darker or lighter than hoped

Before your tint

	Yes	No
Past reaction to hair dye, tint or henna	☐	☐
Eye infection, stye, pinkeye or sore eyes now	☐	☐
Under 16 years old	☐	☐
Eye surgery in the past [__] months, or an eye condition	☐	☐
Eczema, psoriasis or broken skin near the eyes or brows	☐	☐
Contact lenses (they come out first)	☐	☐
Lash lift, extensions or brow lamination in the past [__] days	☐	☐
Pregnant, nursing, or in chemotherapy	☐	☐

PATCH TEST Date _____ Area _____ Result at 24–48 h _____

Please initial

	Initials
I've read the FDA and state note above and choose to go ahead with the product named.	
I had a patch test. I know a reaction can still happen, even after past tints without one.	
I'll keep my eyes closed and tell you right away if anything stings. I can stop at any time.	
Results vary and aren't guaranteed. My questions were answered. Services can't be refunded.

PRACTITIONER PROTOCOL

Lash & Brow Tint

The product label's directions, timing and age limits always come first. Times are typical.

CHECK YOUR STATE

Tinting isn't in every state's esthetics scope, and some boards allow only FDA-compliant silver nitrate tints. Confirm before offering.

PATCH TEST

Required 24–48 hours before the first tint and after any product change. Behind the ear or inner elbow. Record it.

SILVER NITRATE RULES

FDA limits: professional use, clients 16+, no more than 1 minute on, then remove at once.

SET UP FIRST ☐ Sterile saline eyewash ☐ Under-eye pads ☐ Barrier cream ☐ Non-metal dish ☐ Disposable applicators ☐ Damp cotton ☐ Timer

#	STEP	TIME	HOW
1	**Review & inspect**	2–3 min	Check patch test result and consent. Stop for any eye redness, infection, stye or broken skin.
2	**Prep**	2–3 min	Contacts out. Remove makeup and oil from lashes and brows with an oil-free cleanser. Dry well.
3	**Protect**	2 min	Barrier cream on the skin around the area, off the lash line. Pads under lower lashes, eyes closed.
4	**Mix**	1 min	Per label, just before use, in a non-metal dish. Discard leftovers; never reuse mixed tint.
5	**Apply**	1–2 min	Thin coat with a fresh applicator, base to tip, away from the waterline. Brows: shape first, then tint.
6	**Process**	Per label	Start the timer. Stay with the client; eyes closed. Silver nitrate: 1 minute maximum.
7	**Remove**	2–3 min	Damp cotton, wiping down and outward until clear. Eyes stay closed until no tint is left.
8	**Check & clean up**	2 min	Ask about stinging. Check the eyes. Lift skin stain with the maker's remover.
9	**Educate & rebook**	2 min	Give aftercare. Rebook in about [4–6] weeks; patch test again if the product changes.

IF SOMETHING GOES WRONG

- Stinging under the pad: remove tint at once.
- Then: same-day eye doctor. Send the product label.
- Tint in the eye: flush with saline 15+ min, lids open.
- Hives or swollen lids: remove, refer. 911 if breathing is affected.
- Always write an incident report, stop using that product on the client, and check in within 24–48 hours.

AFTERCARE

After Your Lash & Brow Tint

The first day sets your color. A little care now keeps it rich for weeks, and protects your eyes.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Right after	Darker, fuller-looking lashes or brows. Brows may look boldest today. Faint skin stain fades fast.	Put contacts back in only once your eyes feel completely normal.	Rubbing your eyes or brows.
First 24 hours	Color settles and softens slightly.	Keep the area dry if you can. Pat gently if it gets wet.	Oil-based removers, steam, sauna, swimming, mascara and brow products.
Between visits	Gradual fading over [3–6] weeks; brows usually fade faster than lashes.	Use gentle, oil-free cleansers around the eyes. SPF on brow skin.	Scrubs, peels or retinoids on the brows, which fade color faster.
Next tint	Ready for a refresh at about [4–6] weeks.	Tell me about any reaction, new medicine or eye problem.	Home tint kits or salon tints elsewhere between visits.

Hands off
No rubbing your eyes or brows.

Dry for a day
Skip steam, swimming and makeup for 24 hours.

Go oil-free
Oils lift tint. Choose oil-free removers.

Speak up
Any itch or swelling means we re-test first.

CALL ME RIGHT AWAY IF YOU NOTICE

- Itchy, red or swollen eyelids or brows, even a day or two later
- Blurry vision or sensitivity to light
- Eye pain, redness, watering or discharge that doesn't settle
- Rash, blisters or crusting on the skin

If tint gets in your eye: rinse with clean, lukewarm water for at least 15 minutes, then see an eye doctor or urgent care the same day.

Trouble breathing, or swelling of the face or throat: call 911.

NOTES FOR YOU

SKIN ESSENTIALS

Your Daily SPF Guide

Sunscreen is the one step that protects every result we work on together. Here's how to make it count.

YOUR LOGO

30+
SPF
Broad spectrum, so it guards against both burning and aging rays.

1 tsp
FACE & NECK
About two finger-lengths. For your body, about a shot glass.

15 min
BEFORE YOU GO
Apply to dry skin before heading outdoors.

2 hrs
REAPPLY
Every 2 hours outside, and right after swimming or sweating.

Why every day?

UV rays cause most visible aging: dark spots, uneven tone, fine lines and loss of firmness. They also raise your risk of skin cancer, whatever your skin tone. Up to 80% of UV gets through clouds, and aging UVA rays pass through windows. Peels, retinoids and exfoliation make fresh skin even more sensitive, so daily SPF protects your results.

Mineral or chemical?

Mineral (physical)
Zinc oxide and/or titanium dioxide. Gentle, so it's our pick for sensitive or just-treated skin. Can look a little white; tinted versions blend better and help with visible light, which can darken spots.

Chemical
Filters such as avobenzone or octisalate. Light, sheer and easy under makeup. Some sensitive skin stings with them. Hybrids mix both types.

The best sunscreen is the one you'll wear every day. Any broad-spectrum SPF 30+ protects you.

MYTHS, KINDLY CORRECTED

"My makeup has SPF." Most of us apply far too little for the label SPF. Wear sunscreen underneath.

"Darker skin doesn't need it." Everyone can burn, get spots or get skin cancer.

"SPF 100 lasts all day." Higher SPF doesn't buy more time. Reapply.

"Waterproof." No sunscreen is. Water resistant lasts 40 or 80 minutes.

"I'll miss my vitamin D." Food and supplements are the safer source. Ask your doctor.

AFTER A TREATMENT

· Mineral SPF 30+ every morning, even if you stay in
· Hat and shade for the first week. Skip midday sun
· No tanning or tanning beds for at least 2 weeks
· Skip self-tanner until you've fully stopped peeling

Fresh skin darkens easily. Sun now can mean spots later.

MY SPF CHECKLIST

- [ ] Broad spectrum, SPF 30 or higher
- [ ] Last step of my morning routine
- [ ] A travel size in my bag to reapply
- [ ] Ears, neck, chest and backs of hands
- [ ] Lip balm with SPF 30+
- [ ] Sunglasses and a wide-brim hat

[1] Taking now or in the past 6 months. Some brands ask 12; a 2017 expert panel found little evidence to delay superficial peels.

[2] Stop 5–7 days before; restart once skin is fully calm. Skin lifting risk with wax.

[3] Incl. daily aspirin. Never advise stopping a prescribed medicine.

[4] No retinoid or salicylic peels and no electrical currents.

[5] Suggest asking their doctor about an antiviral first.

[6] No galvanic, high frequency or microcurrent. No flashing or pulsed LED modes.

[7] Slow healing. Treat only if well controlled.

[8] Never treat over a lesion. Refer changing moles.

[9] No pressure or devices over injected areas, or follow the injector.

[10] Reschedule; refer to a physician if it looks infected.

[11] e.g. doxycycline and other tetracyclines, some diuretics, St. John's wort. Lower intensity, patch test, strict SPF.

Conservative defaults. Sources disagree on many windows, so this sheet uses the more cautious one. Your state board's scope, the product or device maker's instructions and the client's physician always come first. Review it yearly.

CLIENT RECORD

Patch Test Record

Test a small area behind the ear, inner arm or along the jaw. Check at 24 and 48 hours. Follow the product maker's directions.

WIPE CONTACT TIME (MINUTES)

TASK	MON	TUE	WED	THU	FRI	SAT	SUN
Clients today							
Bed & surfaces between clients Clean, then disinfect. Fresh table cover.							
Tools cleaned, then disinfected Immersed for full contact time.							
Single-use items discarded Wax sticks, applicators, gloves, blades.							
Linens changed Fresh set; used into closed bin.							
Disinfectant solution fresh Per label; daily or if cloudy.							
Sharps container checked Closed, upright, under the fill line.							
Steamer & devices cleaned Per maker; distilled water in steamer.							
Hand hygiene supplies Soap, towels, 60%+ sanitizer.							
End-of-day full clean Counters, sinks, floors, trash.							

CLEAN, THEN DISINFECT

1 · Remove debris, wash with soap and water, dry.
2 · Use an EPA-registered disinfectant per its label.
3 · Keep visibly wet for the full contact time.
4 · Store in a covered container labeled Clean.

IF BLOOD IS PRESENT

· Glove up and clean the area before disinfecting.
· Use a product labeled for bloodborne pathogens.
· Bag soiled items. Sharps go straight in the container.
· Wash hands after removing gloves. Note it below.

NOTES · SUPPLIES TO REORDER · SHARPS CONTAINER REPLACED (DATE) · INCIDENTS

AFTERCARE

Chemical Peel

First 7 days

peeling peaks days 3–5

DO

· Lukewarm water and the gentle cleanser we chose
· Moisturize at least twice a day
· SPF 30+ every morning; reapply outdoors
· Snip loose flakes with clean, small scissors

AVOID

· Heat, steam, pools and hard workouts for 48 hours
· Picking or pulling skin (it can leave dark marks)
· Retinol, acids, scrubs and waxing for a week
· Tanning for 2 weeks

Restart actives once flaking has fully stopped. **Makeup** when I say it's OK.

CALL ME IF

Blisters, oozing or yellow crusts · pain or swelling that gets worse · a cold sore or cluster of small blisters

Questions? Text [Phone] [Your Business Name]

AFTERCARE

Dermaplaning

First 48 hours

extra sensitive for a week

DO

· Leave on what I applied; rinse and moisturize tonight
· Gentle cleanser, moisturizer, SPF 30+ every morning
· Clean hands only, and a clean pillowcase

AVOID

· Heat, sweat, steam and pools for 24–48 hours
· Scrubs, facial waxing and other exfoliating treatments
· Picking at bumps, and tanning
· Home blades or razors on your face between visits

Makeup after [__] hours. **Restart retinol and acids** once nothing stings, usually by day [3–5].

CALL ME IF

A nick that is red, warm, swollen or oozing · burning that lasts past day 2 · a cold sore or cluster of small blisters

Questions? Text [Phone] [Your Business Name]

Aftercare cards · 4 × 6 in · cut along the dotted lines

AFTERCARE

Microneedling

First 48 hours

no actives for 7 days

DO

· Clean hands only; fresh towel and pillowcase
· Tonight, only the soothing product I gave you
· Gentle cleanser, plain moisturizer, mineral SPF 30+
· Let flakes fall on their own

AVOID

· Day 0: makeup, sunscreen, scented products
· Workouts, heat, pools and direct sun for 48 hours
· Retinol, acids, vitamin C, scrubs, waxing: 7 days
· Touching or picking

Mineral makeup from [__] hours if needed. **Restart your routine** slowly once nothing stings.

CALL ME IF

Pus, yellow crusts or spreading bumps · redness, heat or pain that gets worse after day 2 · fever, chills or swollen glands

Questions? Text [Phone] [Your Business Name]

AFTERCARE

Waxing

First 24–48 hours

follicles are open

DO

· Wear loose, breathable cotton
· Cool compress if it feels warm; keep it clean
· Lukewarm water, fragrance-free soap, light moisturizer
· Wash hands before touching the area

AVOID

· Heat, workouts, sex, tanning, scented products
· Tight clothing, pools, deodorant on fresh underarms
· Picking bumps or digging out ingrown hairs
· Shaving or tweezing between visits

Start exfoliating gently after 48 hours, 2–3 times a week. Let hair grow to about 1/4 inch before your next wax.

CALL ME IF

Pus-filled bumps, spreading redness or warmth · a blister or raw patch · a painful lump, or a fever

Questions? Text [Phone] [Your Business Name]

Aftercare cards · 4 × 6 in · cut along the dotted lines

AFTERCARE

Facial

First 48 hours

mild purging is normal

DO

· Tonight, lukewarm water and a gentle cleanser
· Moisturize morning and night; SPF 30+ outside
· Clean pillowcase and phone screen
· Let small whiteheads calm down on their own

AVOID

· Touching, picking or squeezing anything
· Workouts, sauna, steam rooms and pools
· Retinol, acids, scrubs, waxing for 48 hours

Makeup after 12–24 hours. **Restart your routine** once skin feels comfortable.

CALL ME IF

Swelling, warmth or pain that gets worse · yellow crusts, oozing or a red streak · redness lasting more than 2–3 days

Questions? Text [Phone]

[Your Business Name]

AFTERCARE

Acne Facial

First 24 hours, then daily

give it 6–12 weeks

DO

· Tonight, lukewarm water and a gentle cleanser
· Oil-free moisturizer; SPF 30+ every day
· Use your routine every day, as directed
· White towels and pillowcases (benzoyl peroxide bleaches)

AVOID

· Picking or squeezing, which can scar
· Sweaty workouts, sauna and pools on day 0
· Scrubs, extra acids or new products
· Tanning, which deepens dark marks

Makeup after 12–24 hours. **Restart acne products** on the night I told you.

CALL ME IF

Deep, painful lumps or cysts · burning, swelling or a rash from products · warmth, oozing or crusts

Questions? Text [Phone]

[Your Business Name]

Aftercare cards · 4 × 6 in · cut along the dotted lines

AFTERCARE

Hydrodermabrasion

First 48–72 hours

fresh skin burns faster

DO

· Leave the serums on tonight if you can
· Wash gently with lukewarm water
· Moisturize morning and night
· SPF 30+ every morning

AVOID

· Heat, steam, hard workouts and pools for 24 hours
· Retinol, acids, scrubs, waxing for 48–72 hours
· Tanning or long sun exposure for a week
· Picking at any spots

Makeup after 6–12 hours. **Restart your routine and actives** from day 4.

CALL ME IF

Redness or burning past 24–48 hours · blisters, oozing or yellow crusts · bruising or suction marks that don't fade

Questions? Text [Phone] [Your Business Name]

AFTERCARE

LED Light Therapy

First 24 hours

no downtime

DO

· Keep the moisturizer and SPF I applied
· Gentle cleanser, moisturizer, and drink water
· SPF 30+ every morning
· Tell me about any new medicine or supplement

AVOID

· Rubbing your face or eyes
· Long, direct sun exposure and tanning
· Strong exfoliants and scrubs
· Hot tubs or saunas if you feel warm or pink

Makeup is fine right away if your skin isn't red. Results build with each session.

CALL ME IF

Redness or a rash lasting more than a day · blisters or burning · eye pain, blurry vision or headaches after treatment

Questions? Text [Phone] [Your Business Name]

Aftercare cards · 4 × 6 in · cut along the dotted lines

AFTERCARE

Microcurrent Facial

First 24 hours

no downtime

DO

· Keep the products I applied
· Drink plenty of water, and rest if you need to
· Gentle cleanser, moisturizer, SPF 30+
· Tell me about new implants, injectables or pregnancy

AVOID

· Heavy rubbing or massage tools for the rest of the day
· Strong exfoliants or new active products
· Booking injectables before asking me
· Home microcurrent devices without asking me

Makeup is fine right away. Results build with steady sessions.

CALL ME IF

A rash or itching that lasts more than a day · a headache that lasts or keeps coming back · twitching, numbness or weakness in your face

Questions? Text [Phone] [Your Business Name]

AFTERCARE

Lash & Brow Tint

First 24 hours

the first day sets your color

DO

· Keep the area dry; pat gently if it gets wet
· Contacts back in only once eyes feel normal
· Oil-free cleansers around the eyes

AVOID

· Rubbing your eyes or brows
· Steam, sauna, swimming and oil-based removers
· Scrubs, peels or retinoids on the brows

Mascara and brow products after 24 hours. Refresh at about [4–6] weeks.

CALL ME IF

Itchy, red or swollen lids or brows, even a day or two later · eye pain, discharge or blurry vision · rash, blisters or crusting

Tint in your eye: rinse with clean, lukewarm water for 15+ minutes, then see an eye doctor today.
