How to make them yours

1
In a free Canva account, click Create, then Upload, and choose this PDF.

2
Canva turns every page into an editable design.

3
Add your logo, business name and colors.

4
Download as PDF to print, or fill in on a tablet.

BEFORE YOU USE THESE

These templates are a starting point, not legal or medical advice. Licensing and scope vary by state and country: some states restrict lash and brow tinting, and no tint is FDA-approved for lashes or brows. Check your board rules, set each waiting period to your own policy, and have a local attorney review your forms.

Rather go paperless?

Send, sign and store every one of these forms from your phone with SlickChart.

INFORMED CONSENT & RELEASE · LASH & BROW

Lash & Brow Service Consent

CLIENT NAME

BIRTH DATE | DATE | SERVICE(S) I'M CONSENTING TO

WHAT THESE SERVICES ARE
Lash extensions, lifts, lamination, tinting and brow shaping are cosmetic. Results are temporary and need upkeep.

DURING YOUR VISIT
You lie still, eyes closed, for lash work. Opening them early can let fumes or solution in.

PRODUCTS USED
Lash glue (cyanoacrylate), lift and lamination solutions, tints or henna, and wax. Each can cause a reaction.

Possible risks

Allergic reaction. Puffy, itchy or red lids or skin from glue, tint or solution. Can start after many visits.

Eye irritation. Red, watery or stinging eyes from fumes or product, usually gone within a day.

Infection. Rare with clean tools and good aftercare. Watch for discharge, swelling or pain.

Natural lash or brow damage. From heavy extensions, over-processing, picking or pulling, or skipping fills.

Over- or under-processing. A lift or lamination can turn frizzy, kinked or too weak, or set unevenly.

Skin reactions to wax. Redness, lifting or tenderness, bumps, ingrown hairs, rarely a burn or bruise.

Uneven color or shape. Tint and henna take differently on each hair and skin type and fade at their own pace.

Retention varies. Hormones, oily skin, steam, sleep habits and aftercare all change how long lashes last.

Tool injury. A slip of tweezers or scissors near the eye is rare but possible if you move suddenly.

Product in the eye. Flushed right away with sterile saline. Seek eye care if pain or blurred vision lasts.

Tinting note: in the US, no color additive is FDA-approved for dyeing lashes or brows. Any tint or henna is used off-label at your informed choice, after a patch test. Some states restrict lash and brow tinting.

Results depend on your natural lashes and brows, growth cycle, skin oiliness, hormones, medications, lifestyle and how closely you follow aftercare. Lashes shed naturally every day, so extensions need regular fills.

Please initial each statement

	Initials
I've read the risks above and had my questions answered. No specific result has been promised to me.	
My health history is true and complete, and I've listed all medications, eye drops and lash serums.	
I'll remove contact lenses, keep my eyes closed and still, and tell you right away if anything stings or burns.	
I approved my lash or brow design, length, curl or shade before the service started.	
I've completed a patch test, or I've signed the patch test waiver and accept the added risk.	
I'll follow aftercare and contact you, and a healthcare provider, if signs of infection or allergy appear.	
I won't remove extensions myself. Removal by a professional may cost extra.	
I release [Your Business Name] from claims caused by details I withheld or aftercare I skipped, as [State] law allows.	
I am 18 or older, not under the influence of alcohol or drugs, and signing of my own free will.

PLANNED SERVICE

KNOWN ALLERGIES OR SENSITIVITIES

APPOINTMENT DATE

ABOUT YOUR PATCH TEST

Each planned product is tested before your first service and checked at 24 and 48 hours. Adhesive: a few extensions at the outer corner, or a dot behind the ear. Tint or henna: behind the ear or inner elbow, 48 hours ahead and whenever the product changes. Lift or lamination solution: behind the ear. A clear test can't rule out a future reaction; adhesive sensitivity can develop after many sets.

Products tested

Test	Brand · shade	Lot #	Test area	Date · time	Applied by

After 48 hrs	☐	☐	☐	☐	☐		

RESULT ☐ Clear to proceed ☐ Proceed with a different product ☐ Do not proceed; see a doctor

I consent to this patch test. If the spot burns, blisters, swells or itches badly, I'll wash it with cool water and call [Phone]. If I have trouble breathing or swelling of the face or throat, I'll call 911.

CLIENT SIGNATURE

DATE

ARTIST INITIALS

or

I decline the patch test

I was offered a patch test and chose not to have one. I understand this means an allergy to the lash adhesive, tint, henna or lift solution won't be found before my service, and that a reaction could cause eyelid or skin swelling, need medical care, or mean my extensions have to be removed. I accept these risks and release [Your Business Name] from claims related to a reaction a patch test might have shown, as far as [State] law allows.

DEPOSIT · FILLS · CANCELLATION

Lash & Brow Booking Policy

YOUR LOGO

Lash and brow appointments are reserved just for you, and some take up to [2.5] hours. These policies keep things fair and help your lashes and brows look their best.

DEPOSIT
[$25–50]
Due at booking to hold your time. Non-refundable; applied to your total.

NOTICE TO CHANGE
[48] hours
To move your appointment and keep your deposit.

GRACE PERIOD
[15] minutes
After that, we may need to reschedule.

Rescheduling	With [48] hours' notice, your deposit moves once. A second change needs a new deposit.
No-show & late change	Your deposit is forfeited. After [2] no-shows, a full prepayment is needed to book.
Late arrival	After [15] minutes your service may be shortened (fewer lashes) or rescheduled, and the deposit is forfeited.
Come prepared	Arrive with clean lashes and brows, no eye makeup and contacts out. Cleansing time comes out of your service.
Fill window	Fills are booked every [2–3] weeks and need at least [40]% of your extensions remaining. Less than that is priced as a new full set.
Another artist's lashes	We don't fill another artist's work. It's removed and replaced with a new full set [or your policy].
Retention check	Lashes lost in the first [72] hours due to application are replaced free. Shedding, oils, steam or picking aren't covered.
Lift & lamination	Wait 6–8 weeks between services. A free re-do within [7] days applies only if [the curl or set didn't take and aftercare was followed].
Feeling unwell?	Pink eye, a stye, cold or flu? Tell us as soon as you can and we'll reschedule with no fee.
Refunds	Services can't be refunded once performed. Tell us about any concern within [72] hours so we can fix it.

CARD ON FILE FOR DEPOSITS AND FEES, CHARGED ONLY AS DESCRIBED ABOVE

☐ Card saved in [booking system] ☐ I prefer to prepay Never write card numbers on this form.

My deposit is non-refundable, and I understand the fill window and the [40]% rule. ☐

Lashes lost to skipped aftercare, oils, steam or picking aren't covered by the retention check. ☐

By signing, I confirm I've read and agree to this policy, including the non-refundable deposit and fill rules.

INFORMED CONSENT

Lash Extension Consent

YOUR LOGO

CLIENT NAME _____ ARTIST _____ DATE _____

WHAT IT IS

Single extensions (classic) or light fans (volume, hybrid) bonded to your natural lashes with adhesive.

WHAT TO EXPECT

About 1.5 to 2.5 hours lying down with eyes closed. Under-eye pads protect your lower lashes.

HOW LONG IT LASTS

Extensions shed with your natural lashes. Fills every 2 to 3 weeks keep the set full.

POSSIBLE RISKS AND SIDE EFFECTS

- Allergy to adhesive: puffy, itchy or red eyelids
- Red or watery eyes from adhesive fumes, short-lived
- Infection, more likely without daily cleansing
- Lash loss from picking, pulling or home removal
- Allergy can start after many sets without issue
- Eye irritation if pads or tape shift
- Natural lash damage from extensions that are too heavy
- Minor eye injury from tools, which is rare

Shedding 1 to 5 natural lashes a day is normal; extensions come out with them. That is not lash damage.

Quick health check

- Eye infection, stye or pink eye
- Allergy to adhesive or glue
- Pregnant or breastfeeding
- Lash serum or glaucoma drops
- Lash lift or tint in 2 weeks
- Blepharitis or dry eye flare
- Sensitive skin, eczema near eyes
- Chemo, now or recently
- Contact lenses (remove today)
- Another artist's extensions on
- Eye or eyelid surgery, LASIK
- Allergy to latex or tape
- Alopecia or trichotillomania
- Asthma or fume sensitivity
- Trouble lying flat for 2 hours

☐ **None of these apply to me** or list any that do: _____

Style approval. We agreed on my style, length and curl; my artist may adjust to protect my lashes. ☐

Please initial each statement

	Initials
I've shared my full health and eye history honestly, and will tell my artist about any changes.	
I'll keep my eyes closed throughout and tell my artist right away about stinging, burning or discomfort.	
I was offered an adhesive patch test. A clear test doesn't rule out a reaction later.	
If my eyelids swell, itch or turn red, I'll contact my artist and have the set removed professionally.	
I'll follow my aftercare. Retention varies with skin, hormones and habits, and isn't guaranteed.	
I won't pick, pull or remove extensions myself. This can take my natural lashes out with them.	
Fills need [40]% of extensions left, or a full set is charged. Fees follow [Your Business Name] policy.	
Before and after photos for my private record are OK. Social media use only with my separate OK.	

By signing, I confirm I am 18 or older (or have parent or guardian consent per [your policy and local law]), have read this form, had my questions answered, and consent to lash extensions and future fills.

CLIENT SIGNATURE _____ DATE _____ ARTIST SIGNATURE · LICENSE # _____ DATE _____

PRACTITIONER PROTOCOL

Lash Extensions

Follow your state board rules and your adhesive maker's instructions. Times are typical for a full set.

SCREEN

Intake cleared, photo ID (18+). No active eye infection; eye surgery needs doctor clearance.

PATCH TEST

Adhesive on a few outer lashes or behind the ear; check at 24–48 hours. Waiver if declined.

PRE-CARE SENT

Arrive with clean, mascara-free lashes. No oils near eyes for 24 hours. Bring glasses, not contacts.

SET UP FIRST

- ☐ Hands washed, nitrile gloves on
- ☐ Tweezers cleaned and disinfected
- ☐ Humidity and temp logged (40–60%, 68–75°F)
- ☐ Adhesive brand, lot, opened date recorded
- ☐ Fresh pads, tape, spoolies; fan running
- ☐ Saline eyewash in reach

#	STEP	TIME	HOW
1	**Consult & screen**	10 min	Confirm health changes. Assess lash strength, density, eye shape.
2	**Consent & photos**	5 min	Consent signed. Close-up photos, eyes open and closed, even light.
3	**Style & map**	10 min	Agree style, curl, lengths. Pick a diameter the lash can carry.
4	**Prep lashes**	5 min	Contacts out. Cleanse with lash foam, rinse, dry. Prime per adhesive.
5	**Isolate lowers**	3–5 min	Pads or tape below the waterline, never touching the eye.
6	**Adhesive**	Ongoing	Shake well. Fresh drop on the ring; replace every 15 to 20 min.
7	**Application**	75–120 min	One natural lash at a time. Classic 1:1 or light fans. 0.5–1 mm off lid.
8	**Separation check**	5 min	Brush through and check every lash. Separate any stickies.
9	**Cure**	1–2 min	Fan or nano mist only if your adhesive calls for it. Eyes stay closed.
10	**Remove pads**	1 min	Peel out and down with eyes closed, then open slowly. Check for redness.
11	**Aftercare & fill**	5–10 min	Mirror check. Review sheet and card, give spoolie. Book fill at 2–3 weeks.

ENDPOINT AND SAFETY

- Fully isolated, no stickies, even line from lid
- Weak or short lashes: lighter diameter, shorter length
- Extension weight suits each natural lash
- Sensitive eyes: lower-fume adhesive, more air flow

IF SOMETHING GOES WRONG

- Stinging or watery eye: pause, check pads, let fumes clear with the fan before going on.
- Lid swelling, itching or hives: stop and remove. Call 911 if breathing is affected.
- Tool slip touching the eye: stop, flush, refer for same-day eye care.
- Adhesive or cleanser in the eye: flush with sterile saline for 15 minutes; eye care if irritation stays.
- Pad or tape rubbing the eye: reposition or replace it before going on.
- Reaction reported at 24–48 hours: professional removal, refer to a physician.

Always write an incident report and check in with the client within 24 to 48 hours.

RECORD FOR THIS SESSION

Humidity · temperature	**Pads or tape used**	**Retention notes**	**Next fill · initials**

AFTERCARE

Caring for Your Extensions

Your lashes are bonded one by one, and the adhesive keeps curing for the first day or two. A little daily care keeps them full, comfortable and lasting longer.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
24–48 hrs adhesive curing	Lashes may feel slightly stiff or heavy. A faint adhesive smell is normal.	Keep lashes dry for [24] hours. Brush gently with a clean spoolie morning and night. Sleep on your back or side.	Water, steam, saunas, hot showers on your face and sweaty workouts for 48 hours. Rubbing or touching.
First week settling in	Lashes soften and settle into place. A few may twist; brushing fixes most.	Start cleansing daily with lash-safe foam. Rinse, pat dry, then brush through. Remove makeup with oil-free remover.	Oil-based cleansers, balms or eye creams near lashes. Mascara and lash curlers. Picking at a stray lash.
Weeks 2–3 fill time	Natural shedding leaves gaps, mostly at the outer corners. This is normal.	Keep cleansing and brushing daily. Come to your fill with clean lashes and no eye makeup.	Waiting too long between fills. Pulling out lashes that are growing out or twisted.
Ongoing every day	1 to 5 natural lashes shed each day, taking their extensions with them.	Cleanse daily, brush often, sleep on your back or side. Book fills every 2 to 3 weeks.	Removing extensions at home. Oils, steam and rubbing, which shorten retention.

About shedding

Each lash grows in about 6 to 8 weeks, then falls out naturally. Finding a few lashes on your pillow is normal, and is not a sign of damage.

Keep it dry

No water or steam on lashes for the first [24] hours.

Cleanse daily

Lash-safe foam keeps the lash line clean and healthy.

Skip the oils

Oil breaks down adhesive. Choose oil-free products.

Hands off

No picking, pulling or rubbing. Brush instead.

CALL ME RIGHT AWAY IF YOU NOTICE

- Puffy, itchy or red eyelids, even days later
- A rash on the lids or around the eyes
- Yellow or green discharge or crusting
- Redness or soreness that keeps getting worse

For swelling, itching or a rash, I'll remove the set professionally; see your doctor too.

Eye pain or vision changes: get urgent eye care. Trouble breathing or face or throat swelling: call 911.

YOUR STYLE · CURL _____

LASH-SAFE CLEANSER _____

YOUR NEXT FILL _____

INFORMED CONSENT

Lash Lift & Tint Consent

YOUR LOGO

CLIENT NAME _____ ARTIST _____ DATE _____

WHAT IT IS
A lifting solution and setting lotion curl your natural lashes over a silicone shield. Tint is optional.

WHAT TO EXPECT
About 45 to 75 minutes lying back with your eyes closed the whole time. Contacts come out first.

HOW LONG IT LASTS
Usually 6 to 8 weeks, as new lashes grow in. Wait at least 6 to 8 weeks between lifts.

POSSIBLE RISKS AND SIDE EFFECTS

- Over-processing: frizzy, kinked or crimped lashes
- Lash dryness or breakage, more so if lashes are fine
- Stinging, redness or watery eyes from the solution
- Allergic reaction to lift solution or tint, even later
- Under-processing: a weak or short-lived curl
- An uneven curl between eyes or across the lash line
- Solution or tint getting into the eye
- Light skin staining from tint, usually gone in 1–2 days

Quick health check

- Eye infection, stye or pink eye now
- Lift or lash perm in past 6–8 weeks
- Allergy: tint, PPD, lift solution
- Rash, eczema or sunburn near eyes
- Trichotillomania or alopecia
- Eye or eyelid surgery in [3] months
- Lash serum (e.g. bimatoprost)
- Contact lenses
- Pregnant or breastfeeding
- Very short, sparse or fragile lashes
- Lash extensions on now
- Glaucoma or other eye drops
- Dry eye or blepharitis
- Chemotherapy, now or recent
- Very sensitive or watery eyes

☐ **None of these apply to me** or list any that do: _____

About lash tint. In the US, no color additive is FDA-approved for tinting eyelashes or eyebrows and FDA has reported serious eye injuries from tints, so any tint is used off-label, at my informed choice, after a patch test.

☐ Tint, please
☐ Lift only

Please initial each statement

	Initials
I've shared my full health, eye, medication and lash serum history honestly, and will report any changes.	
I understand the risks above. My curl depends on my lashes and their growth stage, and isn't guaranteed.	
I'll keep my eyes closed and tell my artist right away if I feel stinging, burning or anything unusual.	
I had a patch test on [date] with no reaction, or I declined it and signed the patch test waiver.	
I won't have another lift sooner than 6 to 8 weeks; lifting too soon can over-process and break lashes.	
I'll follow my aftercare. Water, steam or mascara in the first 24 hours can weaken or drop the curl.	
Before and after photos for my private record are required. Social media use only with my separate OK.	
Deposits and fees follow [Your Business Name] policy. Re-dos only as stated in [your re-do policy].	

By signing, I confirm I am 18 or older with photo ID (or have parent or guardian consent per [your policy and local law]), have read this form, had my questions answered, and consent to a lash lift and any tint I chose above.

CLIENT SIGNATURE _____ DATE _____ ARTIST SIGNATURE · LICENSE # _____ DATE _____

PRACTITIONER PROTOCOL

Lash Lift & Tint

Times in [brackets] follow your lift system's instructions and the client's lash type. Check your state board rules on tinting.

SCREEN

Intake cleared, 18+ with ID. No extensions on, no lift in 6–8 weeks, no active eye issue.

PATCH TEST

Behind the ear, 24–48 hours ahead and whenever products change. Waiver if declined.

PRE-CARE SENT

Arrive with clean lashes, no mascara. Bring glasses or a lens case. Disclose lash serums.

SET UP FIRST ☐ Hands washed, gloves on ☐ Shields in every size ☐ Microswabs, spoolies ☐ Pads, tape, cling film ☐ Products in date, lots noted ☐ Saline eyewash, timer

#	STEP	TIME	HOW
1	**Consult & screen**	5–10 min	Confirm health changes. Assess lash length, strength, density.
2	**Consent & photos**	5 min	Consent signed, tint choice noted. Before photos, eyes open.
3	**Cleanse & protect**	5 min	Contacts out. Oil-free cleanse, dry. Pads and tape on lower lashes.
4	**Shield & lift**	10 min	Size shield to lash length. Comb lashes up, separated, no crossing.
5	**Lifting solution**	[ ] min	Root to mid-length, off skin and tips. Fine or damaged: less time.
6	**Remove**	1–2 min	Wipe off completely with a clean dry microswab, root to tip.
7	**Setting lotion**	[ ] min	Same placement as step 5. Remove completely before tinting.
8	**Tint (optional)**	[ ] min	Patch-tested shade, mixed per label. Lashes only, off the lid.
9	**Condition & release**	5 min	Cleanse off all product, condition, release from shield with water.
10	**Check & photos**	5 min	Brush into place, check eyes for redness, take after photos.
11	**Aftercare & rebook**	5 min	Review aftercare: dry, no mascara 24 hours. Rebook in 6–8 weeks.

ENDPOINT AND SAFETY

- Even, open curl; lashes straight and separated
- Fine, damaged or serum-treated lashes: cut time
- Client's eyes stay closed the entire time
- Never over extensions or within 6–8 weeks

IF SOMETHING GOES WRONG

- Solution or tint in the eye: flush with sterile saline or eyewash for 15 minutes, then seek eye care.
- Hives, swelling or wheezing: stop, remove product. Call 911 if breathing is affected.
- Lashes stuck to the shield: soften with water and release slowly; never pull.
- Stinging or burning: stop, remove all product, cleanse and assess before going on.
- Frizzy or over-curled result: never re-process. Condition and wait 6–8 weeks.
- Later redness, discharge or eye pain: refer the client to an eye doctor.

Always write an incident report and check in with the client within 24 to 48 hours.

AFTERCARE

Caring for Your Lash Lift

The first 24 hours set your curl. After that, a little daily care keeps your lashes lifted, healthy and soft for 6 to 8 weeks.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
First 24 hours the curl sets	A strong, very curled look that softens in a day or two. Tint may leave a faint shadow on the skin.	Keep lashes completely dry. Sleep on your back. Leave them alone; they're still setting.	Water, steam, showers on your face, sweat, mascara, eye makeup and rubbing your eyes.
Days 2–7 settling in	The curl relaxes into a natural lift. A stray lash or two may point a different way.	Brush lashes up each morning with a clean spoolie. Start a non-prostaglandin lash conditioner.	Oil-based removers or cleansers near eyes, waterproof mascara and lash curlers.
Weeks 2–6 enjoy it	Lift holds well. Tint slowly softens. New, straight lashes start to grow in between.	Water-based mascara only, removed gently. Keep conditioning nightly and brushing daily.	Pulling, picking or tugging at lashes, and harsh scrubs or acids around your eyes.
Weeks 6–8 next lift	The curl grows out with your natural lash cycle. Mixed straight and curled lashes are normal.	Book your next lift and tint. Tell me about any new eye drops, serums or health changes.	Lifting again sooner than 6 weeks, or a home perm kit; both can over-process lashes.

GOOD TO KNOW

- Contacts can go back in today unless eyes feel irritated
- Pools, sauna and steam rooms are fine after 24 hours
- A nourishing lash conditioner keeps lashes soft
- Lash serums with prostaglandins can over-curl lashes
- Chlorine and sun can fade tint a little faster
- Gentle, oil-free eye makeup remover only

Stay dry
No water or steam on lashes for 24 hours.

Skip mascara
For 24 hours, then water-based only.

Oil-free
Oils near eyes can relax the curl.

No curler
Your lift does the work; curlers can snap lashes.

CALL ME RIGHT AWAY IF YOU NOTICE

- Eyelid swelling, itching or a rash
- Discharge, crusting or a gritty feeling
- Redness that gets worse instead of better
- Lashes that feel brittle or are breaking

Eye pain or any change in your vision: get urgent eye care today. Trouble breathing, or swelling of the face or throat: call 911.

TINT SHADE USED _____

YOUR NEXT LIFT DATE _____

INFORMED CONSENT

Brow Lamination Consent

YOUR LOGO

CLIENT NAME _____ ARTIST _____ DATE _____

WHAT IT IS

Lifting and setting lotions reshape brow hairs so they sit brushed up and fuller. Tint is optional.

WHAT TO EXPECT

About 45 to 60 minutes. Any tweezing, waxing or threading comes after lamination.

HOW LONG IT LASTS

Usually 6 to 8 weeks, as new hairs grow in. Wait at least 6 to 8 weeks between laminations.

POSSIBLE RISKS AND SIDE EFFECTS

- Over-processing: frizzy, fluffy or brittle hairs
- Dryness or breakage, more so if hairs are fine
- Skin redness, stinging or dryness under the brows
- Allergic reaction to the solution or tint, even later
- Under-processing: hairs that drop back quickly
- An uneven set between brows or within a brow
- Solution or tint running toward the eye
- Skin staining from tint, usually gone in 1–2 days

Quick health check

- Eye infection or irritation now
- Accutane in the past 6 months
- Allergy: tint, PPD, lift solution
- Broken skin, rash or sunburn
- Trichotillomania or alopecia
- Brow lamination in past 6–8 weeks
- Retinoids/acids on brows (7 days)
- Botox near brows in past 48 hours
- Pregnant or breastfeeding
- Very fine, sparse or fragile brow hair
- Brow PMU healing (under 6 weeks)
- Peel, laser or microneedling (2 wks)
- Blood thinners or easy bruising
- Chemotherapy, now or recent
- Very sensitive or reactive skin

☐ **None of these apply to me** or list any that do: _____

About brow tint. In the US, no color additive is FDA-approved for tinting eyelashes or eyebrows and FDA has reported serious eye injuries from tints, so any tint is used off-label, at my informed choice, after a patch test.

☐ Tint, please
☐ Lamination only

Please initial each statement

	Initials
I've shared my full health, medication and skincare history honestly, and will report any changes.	
I understand the risks above. Results depend on my brow hair and how it grows, and aren't guaranteed.	
I'll keep my eyes closed when asked and say right away if I feel stinging, burning or anything unusual.	
I had a patch test on [date] with no reaction, or I declined it and signed the patch test waiver.	
I won't laminate again sooner than 6 to 8 weeks; doing it too soon can over-process and break brow hairs.	
I'll follow my aftercare. Water, sweat, steam or brow makeup in the first 24 hours can weaken the set.	
Before and after photos for my private record are required. Social media use only with my separate OK.	
Deposits and fees follow [Your Business Name] policy. Re-dos only as stated in [your re-do policy].	

By signing, I confirm I am 18 or older with photo ID (or have parent or guardian consent per [your policy and local law]), have read this form, had my questions answered, and consent to brow lamination, tidying, and any tint I chose above.

CLIENT SIGNATURE _____ DATE _____ ARTIST SIGNATURE · LICENSE # _____ DATE _____

PRACTITIONER PROTOCOL

Brow Lamination

Times in [brackets] follow your lamination system's instructions and the client's hair type. Check your state board rules on tinting.

SCREEN

Intake cleared, 18+ with ID. No lamination in 6–8 weeks, no broken or irritated skin.

PATCH TEST

Behind the ear, 24–48 hours ahead and whenever products change. Waiver if declined.

PRE-CARE SENT

No brow makeup. Retinoids off brows 7 days. No waxing or tweezing beforehand.

SET UP FIRST ☐ Hands washed, gloves on ☐ Brow brushes, lamination glue ☐ Single-use spoolies, swabs ☐ Cotton pads, cling film ☐ Products in date, lots noted ☐ Saline eyewash, timer

#	STEP	TIME	HOW
1	**Consult & screen**	5–10 min	Confirm health changes. Assess hair density, direction, skin.
2	**Consent & photos**	5 min	Consent signed, tint choice noted. Before photos, even light.
3	**Design & cleanse**	5–10 min	Agree on shape. Oil-free cleanse of brows, dry fully.
4	**Lifting solution**	[ ] min	On hairs, minimal skin contact. Brush up, cover with film.
5	**Remove**	1–2 min	Wipe off completely with a dry pad, following hair direction.
6	**Set & shape**	[ ] min	Setting lotion on. Brush hairs into the agreed shape, film on.
7	**Remove**	1–2 min	Wipe off completely. Check the set is even on both brows.
8	**Tint (optional)**	[ ] min	Patch-tested shade, mixed per label. Keep well away from eyes.
9	**Nourish**	2–3 min	Keratin or nourishing oil to restore moisture to the hairs.
10	**Tidy**	10 min	Only now tweeze, wax or thread strays. Accutane in 6 months: no wax.
11	**Photos & aftercare**	5 min	After photos. Review sheet and card. Rebook in 6–8 weeks.

ENDPOINT AND SAFETY

- Hairs set upward, even and soft, not frizzy
- Fine, light or tinted hair: shorter times
- Eyes closed whenever product is near them
- Never within 6–8 weeks or on broken skin

IF SOMETHING GOES WRONG

- Solution or tint in the eye: flush with sterile saline or eyewash for 15 minutes, then seek eye care.
- Hives, swelling or wheezing: stop, remove product. Call 911 if breathing is affected.
- Skin lifting or burn from wax: stop, cool compress, no more wax there.
- Stinging or burning: stop, remove all product, cleanse and assess before going on.
- Frizzy or over-processed: never re-process. Nourish, wait 6–8 weeks.
- Later rash, blistering or swelling: refer the client to a physician.

Always write an incident report and check in with the client within 24 to 48 hours.

RECORD FOR THIS SESSION

AFTERCARE

Caring for Laminated Brows

The first 24 hours set your brows. After that, a little daily brushing and oil keeps them full, soft and in place for 6 to 8 weeks.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
First 24 hours brows are setting	Brows look very upright and set, and may feel stiff. Tint can leave a light skin stain for 1–2 days.	Keep brows completely dry. Sleep on your back. Try not to touch, rub or brush them yet.	Water, steam, sweat, workouts, brow makeup and any face products on your brows.
Days 2–7 settling in	Hairs soften and settle. Brows can feel a little dry; a few hairs may stray out of place.	Brush brows into shape each morning. From day 2, a drop of nourishing brow oil nightly.	Steam and heavy sweat until 48 hours. Extra waxing or tweezing until 48 hours.
Weeks 2–6 enjoy it	The shape holds well. Tint slowly softens. New hairs start to grow in at their own angle.	Keep brushing daily and oiling at night. Brow gel helps hold stray hairs in place.	Retinoids, acids, scrubs and peels on your brows. Tanning beds and long sun without SPF.
Weeks 6–8 next visit	Brows gradually return to their natural direction as hairs grow and shed. That's normal.	Book your next lamination. Tell me about any new skincare, medication or health changes.	Laminating again sooner than 6 weeks, or a home kit; both can over-process brow hairs.

GOOD TO KNOW

- Brows can look a little fluffy for a day or two
- Sauna, steam rooms and hot yoga after 48 hours
- Use a clean spoolie and wash it every week
- Brow makeup and gel are fine after 24 hours
- A nightly drop of oil keeps hairs soft, not brittle
- Sun, chlorine and oily skin fade tint faster
- Keep retinoids and acids off your brows
- Tint lasts about 3–6 weeks on the hairs

Stay dry
No water or steam on brows for 24 hours.

Skip makeup
No brow products for 24 hours.

Brush daily
Brush into shape every morning.

Sun safe
SPF around brows helps tint last.

CALL ME RIGHT AWAY IF YOU NOTICE

- Itching, a rash or bumps on or near the brows
- Blistering, oozing or crusting skin
- Redness or burning that gets worse, not better
- Swelling around the brows or eyelids

Eye pain or any change in your vision: get urgent eye care today. Trouble breathing, or swelling of the face or throat: call 911.

Questions? Text [Phone] · [Your Business Name] [Website]

INFORMED CONSENT

Brow Tint & Henna Consent

YOUR LOGO

CLIENT NAME _____ SERVICE: TINT · HENNA _____ DATE _____

WHAT IT IS
Brow tint is a dye that colors the hairs. Henna brows color the hairs and stain the skin for a fuller look.

WHAT TO EXPECT
About 30 to 45 minutes, with shaping. A patch test 48 hours before is required.

HOW LONG IT LASTS
Tint: hairs 3 to 6 weeks, skin 1 to 2 days. Henna: hairs 4 to 6 weeks, skin up to 2 weeks.

POSSIBLE RISKS AND SIDE EFFECTS

- Allergy to PPD or dye, even after past tints
- A shade darker, warmer or cooler than expected
- Faster fading on oily skin or with exfoliants
- Redness, itching or stinging on brow skin
- Uneven or patchy skin stain
- Dye in the eye (rare), flushed at once

In the US, no color additive is FDA-approved for tinting brows or lashes (FDA has reported serious eye injuries from tints), so tint and henna are used off-label at your informed choice; some states restrict this service.

Quick health check

- Allergy to hair dye, PPD or henna
- Eye infection, stye or pink eye
- Eczema or psoriasis near brows
- Pregnant or breastfeeding
- Microblading or powder brows
- Past reaction to a tint or patch test
- Eye or eyelid surgery in 3 months
- Retinoids or acids in 7 days
- Chemotherapy now or recently
- Very sensitive skin or many allergies
- Reaction to black henna
- Broken skin or sunburn on brows
- Peel or laser in 2 weeks
- Alopecia or hair pulling in brows
- Contact lenses (removed today)

☐ **None of these apply to me** or list any that do: _____

Shade and shape approval. I've seen my shade and mapped brow shape in a mirror and approve both. ☐

Please initial each statement

	Initials
I've shared my full health, allergy, medication and skincare history honestly, and will report changes.	
I had a patch test at least 48 hours ago, or signed the waiver. A clear test doesn't rule out a reaction.	
I've read the note above about off-label use of brow tint and henna, and I choose to go ahead.	
I understand the risks above. Color depends on my hair, skin and aftercare, and isn't guaranteed.	
Brows look boldest on day one and soften. Henna skin stain fades over about 1 to 2 weeks.	
I'll follow my aftercare. Water, oil cleansers, scrubs, acids and sun can fade color sooner.	
Before and after photos may be taken for my private record. Social media use only with my separate OK.	
Deposits and fees follow [Your Business Name] policy. Services can't be refunded once performed.	

By signing, I confirm I am 18 or older with photo ID (or have parent or guardian consent per [your policy and local law]), have read this form, had my questions answered, and consent to brow tint and/or henna brows.

CLIENT SIGNATURE _____ DATE _____ ARTIST SIGNATURE · LICENSE # _____ DATE _____

PRACTITIONER PROTOCOL

Brow Tint & Henna Brows

No color additive is FDA-approved for brow tinting in the US; tint and henna are off-label. Check your state board and product labels.

SCREEN
Intake and consent cleared, photo ID (18+). Tint or henna?

PATCH TEST
Behind ear or inner elbow, 48 hours ahead and on any product change.

PRE-CARE SENT
No retinoids on brows 7 days, acids or scrubs 3 to 5 days.

SET UP FIRST ☐ Hands washed, nitrile gloves ☐ Single-use spoolies & swabs ☐ Fresh mixing dish ☐ Barrier cream & remover ☐ Shade & lot recorded ☐ Saline eyewash ☐ Clean tweezers ☐ Mirror & timer

#	STEP	TIME	HOW
1	**Consult & screen**	5–10 min	Check health changes and the patch test site. Assess hair color, density, grays and skin oiliness. Defer if needed.
2	**Consent & photos**	5 min	Consent signed. Contacts out. Photos front and both sides, even light.
3	**Cleanse & map**	10 min	Remove makeup and oil. Map the shape; client approves in a mirror.
4	**Shade selection**	5 min	Light hair: 1 to 2 shades darker. Dark hair: match. Balance warm or ash tones for skin undertone and grays. Client approves.
5	**Protect skin**	2 min	Barrier cream just outside the mapped outline, never near the lash line.
6a	**Tint method**	5–10 min	Mix with developer per label and use at once. Coat hairs tail to front, front last. Time per label; grays may need longer.
6b	**Henna method**	15–30 min	Mix per label. Tails first, front last and softer. Let dry, then layer for a deeper skin stain. Time per label.
7	**Remove & assess**	5 min	Damp pad, then remover on stain outside the shape. Check symmetry.
8	**Tidy shape**	5–10 min	Tweeze, wax or thread strays after color. Soothe with a calming gel.
9	**After photos**	2 min	Client mirror check. Same angles and light as the before photos.
10	**Aftercare & rebook**	3 min	Review sheet and card. Keep dry 24 to 48 hours. Rebook 4 to 6 weeks.

ENDPOINT AND SAFETY

- Never use "black henna" (high PPD)
- Soft front, defined tail; it looks darker day one
- Fresh mix each client; discard leftovers
- Oily skin: henna skin stain fades faster

IF SOMETHING GOES WRONG

- Burning or stinging: remove product, rinse, cool compress.
- Tint in the eye: flush with saline 15 minutes; same-day eye care.
- Later redness, blisters or itching: refer to a physician.
- Hives, swelling or wheezing: stop. 911 if breathing is affected.
- Too dark: lift excess with remover; it softens in days.
- Report reactions to FDA MedWatch (US) and the maker.

Always write an incident report and check in with the client within 24 to 48 hours.

RECORD FOR THIS SESSION

Processing time	**Skin reaction · notes**	**Shaping method**	**Rebook date · initials**

AFTERCARE

Caring for Your Tinted Brows

Brow tint colors your hairs, and henna also stains the skin underneath. Here's what to expect, and how to keep your color fresh for longer.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
First 24–48 hours keep dry	Brows look bolder and more defined than they will settle. A little pinkness from shaping fades within hours.	Keep brows dry for 24 hours (henna: 24 to 48). Wash around them with a damp cloth and pat, don't rub.	Brow makeup for 24 hours, steam, saunas, sweaty workouts, swimming and oil cleansers.
Days 2–14 skin stain fades	Tint stain on the skin is gone in 1 to 2 days. Henna stain fades gradually over up to 2 weeks, faster on oily skin.	Cleanse gently with a mild, oil-free cleanser and pat dry. Brow pencil or gel is fine if you want extra fullness.	Scrubs, peels, retinol, AHA or BHA on your brows, and rubbing them with a towel.
Weeks 3–6 hair color fades	Hair color softens and new hairs grow in uncolored. Tint lasts about 3 to 6 weeks, henna about 4 to 6.	Rebook for fresh color and a tidy-up before the shape grows out. Shade your brows from strong sun.	Box dyes or home tint kits near your eyes. They aren't made for the eye area.

If you had brow tint

Colors the hairs only, for depth and definition. Skin stain: 1 to 2 days. Hair color: about 3 to 6 weeks.

If you had henna brows

Colors hairs and stains skin for a filled-in look. Skin stain: up to 2 weeks. Hair color: about 4 to 6 weeks.

GOOD TO KNOW

- Sun, tanning beds, chlorine and salt water fade color
- Retinol and acids near brows fade color quickly
- A reaction can happen even after past tints
- Oily skin holds the skin stain for less time
- Tell me about new skincare or medication
- We patch test again if the product changes

Stay dry

No water on brows for 24 hours, 48 for henna.

Go gentle

Oil-free cleanser, pat dry, no scrubbing.

Skip the acids

Keep retinol, AHA and BHA off your brows.

Sun safe

Sun and tanning fade color; wear a hat.

CALL ME RIGHT AWAY IF YOU NOTICE

- Itching, burning or redness that gets worse
- A rash, bumps or blisters on or near your brows
- Color in your eye: rinse with clean water
- Swelling of your brows or eyelids
- Oozing, crusting or skin that feels hot
- Eye pain or vision change: urgent eye care

Trouble breathing, or swelling of the face or throat: call 911.

SERVICE · SHADE _____

KEEP DRY UNTIL _____

YOUR NEXT APPOINTMENT _____

INFORMED CONSENT

Brow Wax & Shaping Consent

YOUR LOGO

CLIENT NAME _____ METHOD: WAX · TWEEZE · THREAD _____ DATE _____

WHAT IT IS
Unwanted hairs are removed with warm wax, tweezers or a thread to give a clean, balanced shape.

WHAT TO EXPECT
About 15 to 30 minutes. Mild redness is common and usually settles within a few hours.

HOW LONG IT LASTS
Usually 3 to 5 weeks, depending on your hair growth. Regular visits keep the shape tidy.

POSSIBLE RISKS AND SIDE EFFECTS

- Redness, tenderness or mild swelling
- Burns if wax is too warm
- Breakouts or small bumps afterward
- A shape that isn't quite as expected
- Skin lifting, mostly with retinoids
- Bruising, more likely on blood thinners
- Ingrown hairs or folliculitis
- Allergy to wax, resin or after-products

Accutane in the past 6 months or a recent prescription retinoid? No wax; hairs are tweezed or threaded instead.

Quick health check

- Isotretinoin in the past 6 months
- Peel, laser or microneedling in 2 wks
- Broken skin, rash or cold sore
- Diabetes or slow healing
- Pregnant or breastfeeding
- Rx retinoid on face in 7 days
- Botox near brows in 48 hours
- Eczema, psoriasis or rosacea flare
- Allergy to wax, resin or pine
- Eye or eyelid surgery in 3 months
- Retinol, AHA, BHA or scrub in 5 days
- Sunburn or fresh tan on the area
- Blood thinners or easy bruising
- Moles or skin tags near brows
- New medication or antibiotics

☐ **None of these apply to me** or list any that do: _____

Shape approval. I've seen the mapped shape in a mirror and approve it before any hair is removed. ☐

Please initial each statement

	Initials
I've shared my full health, medication and skincare history, including retinoids and acne treatment.	
I understand skin lifting and burns are more likely if anything above was left out or changes.	
If my skin isn't suited to wax today, I agree to tweezing or threading instead.	
I understand the risks above. Results and symmetry depend on my natural growth and aren't guaranteed.	
Removed hairs take weeks to grow back, so a shape change can't be undone right away.	
I'll follow my aftercare: no sun, heat, makeup or exfoliation on the area for 24 to 48 hours.	
Before and after photos may be taken for my private record. Social media use only with my separate OK.	
Deposits and fees follow [Your Business Name] policy. Services can't be refunded once performed.	

By signing, I confirm I am 18 or older with photo ID (or have parent or guardian consent per [your policy and local law]), have read this form, had my questions answered, and consent to brow shaping by wax, tweezing and/or threading.

CLIENT SIGNATURE _____ DATE _____ ARTIST SIGNATURE · LICENSE # _____ DATE _____

PRACTITIONER PROTOCOL

Brow Wax & Shaping

Heat and use wax per the manufacturer. Check your state board rules.

SCREEN
Intake and consent cleared. No isotretinoin in the past 6 months.

TEMPERATURE
Test on your inner wrist, then a small spot on the client.

PRE-CARE SENT
Rx retinoids 7 days, acids 3 to 5 days, peels or laser 2 weeks.

SET UP FIRST ☐ Hands washed, gloves ☐ Fresh spatulas ☐ Spoolies ☐ Wax pot clean ☐ Pre/post-wax oil ☐ Calming gel ☐ Clean tweezers, scissors ☐ Brow pencil

#	STEP	TIME	HOW
1	**Consult & screen**	3–5 min	Check retinoids, acids, Accutane, sunburn, meds. Not suited? Tweeze or thread.
2	**Consent & photos**	3 min	Consent signed. Contacts out if working near the lids. Before photos front and both sides, even light.
3	**Map & approve**	5 min	Mark start, arch and tail. Client approves the shape in a mirror.
4	**Cleanse & prep**	2 min	Oil-free cleanser, pat dry. Brush up and trim long hairs. Pre-wax oil or powder per the wax maker.
5	**Check temperature**	1 min	Stir wax. Test on your inner wrist, then a small spot on the client. Too runny means too hot; let it cool.
6a	**Wax method**	5–10 min	Hold skin taut. Apply with growth in small sections; remove against growth, low and parallel. Avoid repeat passes.
6b	**Tweeze or thread**	5–15 min	Support the skin. Tweeze in the direction of growth. Threading: fresh thread each client, even tension.
7	**Clean up strays**	3–5 min	Tweeze fine strays with the skin supported. Brush up and trim. Work around moles and skin tags.
8	**Soothe & assess**	2 min	Post-wax oil for residue, calming gel or cool compress. Check symmetry.
9	**After photos**	2 min	Client mirror check. Same angles and light as the before photos.
10	**Aftercare & rebook**	2 min	Review sheet and card. No makeup 12 to 24 hours. Rebook in 3 to 5 weeks.

ENDPOINT AND SAFETY

- One spatula per dip; never double-dip
- Small sections, skin held taut every pull
- Never wax broken, irritated or sunburned skin
- Over-removal: stop; hairs take weeks to regrow

IF SOMETHING GOES WRONG

- Skin lifting: stop waxing there; cool and protect.
- Wax on lashes: don't pull; soften with oil, eye closed.
- Hives or wheezing: stop. 911 if breathing is affected.
- Burn: cool running water 20 minutes; refer if blistered.
- Bruising: cool compress. Note any blood thinners.
- Later pus, spreading redness, fever: refer to physician.

Always write an incident report and check in with the client within 24 to 48 hours.

AFTERCARE

Caring for Your Shaped Brows

Freshly shaped brows can look a little pink at first. Here's how to keep your skin calm and your shape clean until your next visit.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
First 24 hours calm skin	Pinkness, mild swelling or tiny bumps around your brows. This usually settles within a few hours.	Use a cool compress or a little aloe gel. Keep your hands off and sleep on a clean pillowcase.	Makeup on the area for 12 to 24 hours, touching or picking, hot showers on your face and sun.
Days 2–3 skin settles	Skin looks normal again. A few small bumps can appear where hairs were removed, and they fade on their own.	Cleanse gently and pat dry. A light, fragrance-free moisturizer keeps skin comfortable.	Sun, tanning, saunas, steam and exfoliation for 48 hours. Retinol and acids on the area.
Weeks 3–5 next shape	New hairs grow back at different rates. Some fuzz around the shape is normal regrowth.	Book your next shape. Let strays grow so there are hairs to work with next time.	Tweezing at home between visits. It's easy to over-pluck and lose the shape.

If you were waxed

Wax lifts hairs from the root along with a thin layer of surface skin, so skip sun and exfoliation for 48 hours.

If you were tweezed or threaded

Gentler on the skin, but the follicles are open. Keep makeup, sweat and fingers away for 12 to 24 hours.

GOOD TO KNOW

- Redness usually settles within a few hours
- Bruising is more likely on blood thinners
- Brush brows into place with a clean spoolie
- Tell me about new retinoids or acne medication
- Prone to ingrowns? Exfoliate gently after 48 hours
- Book every 3 to 5 weeks to keep your shape

Cool it

Cool compress or aloe gel for redness.

Hands off

Don't pick bumps or tweeze strays.

Skip the heat

No sauna, steam or hot yoga for 48 hours.

Sun safe

No tanning for 48 hours, then use SPF.

CALL ME RIGHT AWAY IF YOU NOTICE

- Redness or swelling that gets worse after a day
- Pus, crusting or bumps that keep growing
- Hives or a spreading rash
- Skin that lifted, blistered or weeps
- Skin that feels hot, or a fever
- Eye pain or vision change: urgent eye care

Trouble breathing, or swelling of the face or throat: call 911.

METHOD USED _____

MAKEUP OK FROM _____

YOUR NEXT SHAPE _____

INFORMED CONSENT

Lash Removal Consent

YOUR LOGO

CLIENT NAME _____ ARTIST _____ DATE _____

WHAT IT IS
Your extensions are dissolved off with a professional gel or cream remover. No pulling or oil soaking.

WHAT TO EXPECT
About 20 to 45 minutes lying down with eyes closed. Under-eye pads protect your lower lashes.

AFTERWARD
Your natural lashes may look short or sparse at first. They regrow over the next 6 to 8 weeks.

POSSIBLE RISKS AND SIDE EFFECTS

- Redness or stinging from the remover, usually brief
- Watery eyes or mild eyelid puffiness for a short time
- Some natural lashes coming away during removal
- Eye irritation if pads or tape shift
- Remover getting into the eye, which is flushed out
- Allergy or sensitivity to the remover, which is rare
- Lashes looking thin where extensions were heavy
- Infection, which is rare with clean tools

Lashes that come off during removal are usually ones that were already due to shed. Healthy lashes are not pulled out.

Quick health check

- Eye infection, stye or pink eye
- Swelling or itching from lashes
- Known allergy to adhesive
- Lash serum or glaucoma drops
- Pregnant or breastfeeding
- Blepharitis or dry eye flare
- Sensitive skin, eczema near eyes
- Chemo, now or recently
- Contact lenses (remove today)
- Another artist's extensions on
- Eye or eyelid surgery, LASIK
- Allergy to latex or tape
- Alopecia or trichotillomania
- Asthma or fume sensitivity
- Trouble lying flat for 45 min

☐ **None of these apply to me** or list any that do: _____

Reason for removal. I've told my artist why I'm removing my set (reaction, grow-out, a break, new style). ☐

Please initial each statement

	Initials
I've shared my full health and eye history honestly, including any reaction to my current set.	
I'll keep my eyes closed throughout and tell my artist right away about stinging or burning.	
My lashes may look shorter, thinner or uneven after removal. This is normal regrowth, not damage.	
If I suspect an adhesive allergy, I'll see a doctor before having any new set applied.	
If my lashes are weak, my artist may suggest a [4–6] week rest before any new set.	
I won't soak, pick or pull at extensions at home, now or in the future.	
Removal fees follow [Your Business Name] policy, and services can't be refunded once performed.	
Before and after photos for my private record are OK. Social media use only with my separate OK.	

By signing, I confirm I am 18 or older (or have parent or guardian consent per [your policy and local law]), have read this form, had my questions answered, and consent to professional lash extension removal.

PRACTITIONER PROTOCOL

Lash Extension Removal

Follow your state board rules and your remover maker's instructions. Times are typical for a full set.

SCREEN

Intake cleared, photo ID (18+). Note why: reaction, grow-out, foreign set or a break.

SUSPECTED REACTION

Swollen, itchy lids: remove promptly and gently, then refer to a physician. No new set today.

REMOVER

Professional gel or cream only. Never oil soaks, picking or pulling. Patch test if sensitive.

SET UP FIRST

- ☐ Hands washed, nitrile gloves on
- ☐ Tweezers cleaned and disinfected
- ☐ Remover brand, lot, opened date
- ☐ Fresh pads, tape, microswabs
- ☐ Fan on, good light
- ☐ Saline eyewash in reach

#	STEP	TIME	HOW
1	**Consult & screen**	5 min	Confirm health changes. Check lids, lash condition, adhesive type.
2	**Consent & photos**	5 min	Consent signed. Close-up photos of the current set, eyes closed.
3	**Cleanse**	3 min	Contacts out. Cleanse lashes with lash foam, rinse and dry.
4	**Protect lowers**	3–5 min	Pads or tape fully cover lower lashes, never touching the eye.
5	**Apply remover**	2–3 min	Microswab or brush to the bond area only. Keep it away from the lash line.
6	**Process**	Per label	Wait the full label time. Client reports any stinging right away.
7	**Slide off**	10–20 min	Glide a clean microswab down; extensions should slide free.
8	**Repeat if needed**	5 min	Stubborn bonds: reapply, wait again. Never tug or force an extension.
9	**Cleanse thoroughly**	5 min	Remove all remover and adhesive with lash foam; rinse well.
10	**Remove pads**	1 min	Peel out and down, eyes closed, then open slowly. Check for redness.
11	**Aftercare & plan**	5 min	Mirror check. Review sheet and card. Discuss a rest or a new set.

ENDPOINT AND SAFETY

- Every extension and adhesive bead removed
- Natural lashes intact, brushed and dry
- No remover left on lashes or skin
- Lash condition noted for the next service

IF SOMETHING GOES WRONG

- Stinging or watery eye: pause, check pads, wipe excess remover, let it settle.
- Lid swelling, rash or hives: finish removal gently. Call 911 if breathing is affected.
- Tool slip touching the eye: stop, flush, refer for same-day eye care.
- Remover in the eye: flush with sterile saline for 15 minutes; eye care if irritation stays.
- Pad or tape rubbing the eye: reposition or replace it before going on.
- Suspected adhesive allergy: refer to a physician; no new set until cleared.

Always write an incident report and check in with the client within 24 to 48 hours.

AFTERCARE

After Your Lash Removal

Your natural lashes are free again. They may look shorter or sparser than you remember for a few weeks. That's normal regrowth, not damage.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Today just removed	Lashes may look short, thin or uneven. Eyes can be a little pink or watery for a few hours.	Leave lashes alone to settle. If eyes feel irritated, rinse with cool water and rest them.	Rubbing your eyes, eye makeup and curling your lashes. Contacts if eyes feel irritated.
First week settling	Small gaps where extensions were heaviest. A few lashes shedding each day.	Cleanse lashes daily with a gentle lash-safe foam. Brush through with a clean spoolie.	Waterproof mascara and harsh removers. Picking at any leftover bits; I can clean them for you.
Weeks 2–6 regrowth	New lashes grow in over 6 to 8 weeks. Fullness slowly returns.	Optional: a non-prostaglandin conditioning serum. Rest [4–6] weeks if lashes are weak.	Starting a new set before lashes recover, especially after a reaction.

Lash regrowth

Each lash takes about 6 to 8 weeks to grow in, and every lash is at a different stage, so fullness returns gradually. Shedding 1 to 5 lashes a day is normal.

After a reaction

If your set was removed because of swelling, itching or redness, please see your doctor before having any new lashes applied. Sensitivity to adhesive can return with every set.

Be patient

Sparse lashes are normal. They grow back in 6 to 8 weeks.

Cleanse daily

Gentle lash foam keeps the lash line clean and calm.

Go gentle

Use a mild remover and don't rub or tug.

Hands off

Never pick or pull at lashes or leftover bits.

CALL ME RIGHT AWAY IF YOU NOTICE

- Redness, puffiness or itching that lasts past a day
- Yellow or green discharge or crusting
- A rash on the lids or around the eyes
- Lashes falling out in clumps or patches

Get urgent eye care right away for eye pain, vision changes or ongoing light sensitivity.

Trouble breathing, or swelling of the face or throat: call 911.

YOUR NEXT VISIT _____

GETTING READY

Before Your Lash & Brow Visit

A little prep helps your service last longer and keeps your eyes and skin comfortable. Follow the timeline for your service.

YOUR LOGO

NAME

APPOINTMENT DATE & TIME

SERVICE

6 months
before

Waxing: took isotretinoin (Accutane) in the last 6 months? No wax; I'll tweeze or thread.

Eye surgery (LASIK, cataract, eyelid)? Wait [3] months and get your eye doctor's OK.

2 weeks
before

Waxing: no chemical peels, laser or microneedling near the brows.

Using a lash serum or glaucoma drops? Tell me now.

1 week
before

Waxing: pause prescription retinoids (tretinoin, adapalene) near the brows.

Let any sunburn on the area heal fully.

3–5 days
before

Pause retinol, AHA/BHA acids and scrubs near the brows.

No oil-based eye products or cleansers.

48 hours
before

Patch test done for tint, henna, lift solution or lash adhesive.

Had Botox near the brows? Wait 48 hours to wax.

Day of
your visit

Clean lashes and brows: no mascara, eye makeup or brow products.

Contacts out; wear your glasses.

Twitchy eyes? Skip the extra coffee.

Lash extensions

· Come with clean, dry lashes; no oils on the eyes for 24 hours.

· A full set takes [1.5–2.5] hours with eyes closed, so get comfy.

· Wearing another artist's set? Tell me; it may need removal first.

· Bring a photo of the look you like.

Lift & lamination

· Your last lift or lamination should be at least 6–8 weeks ago.

· Lash extensions must come off before a lift.

· Using a lash serum? Tell me; it changes how a lift takes.

· Don't wax or tweeze your brows first; I tidy them after lamination.

Tint, henna & wax

· Patch test 48 hours before your first tint and whenever products change.

· Let brows grow for [1–2 weeks] so I can see your natural shape.

· Bring a photo of brows you love.

· Wax over recent retinoids can lift skin, so follow the timeline.

PLEASE CALL TO RESCHEDULE IF YOU HAVE

· Pink eye, a stye or any eye infection

· Red, itchy or swollen eyes or eyelids

· A sunburn, rash or broken skin in the area

· A fever, cold or flu, or feel unwell

· Any redness or itching from your patch test

· Recent eye surgery without your eye doctor's OK

We ask for [48] hours' notice. If it's about your safety, just call. We'll find a new time together.

Important

Pregnant or breastfeeding? It's not an automatic no, but hormones can change how lifts and extensions take, so check with your doctor and tell me. Never stop a prescribed medication without your doctor's OK.

PAUSE ACTIVES FROM

NOTES FOR YOU

AFTERCARE · LASH GUIDE

Lash Care & Retention Guide

Healthy natural lashes hold extensions best. Here's how the lash cycle works, what affects retention and how to keep your set clean between fills.

YOUR LOGO

Growth cycle

Why lashes shed

GROWING · ABOUT 30–45 DAYS
A new lash grows in. Extensions on these lashes grow out fastest.

TRANSITION · 2–3 WEEKS
The lash stops growing and its root loosens.

RESTING · UP TO ~100 DAYS
The lash sits until it **sheds with its extension attached**, making room for a new one.

ALL STAGES · AT ONCE
Each lash is on its own schedule, so shedding is steady, never all at once.

Retention

What helps & what hurts

OILS & MAKEUP
Oil-based cleansers, creams and makeup weaken the bond.

STEAM & HEAT
Saunas and steam soften adhesive, most in the first 48 hours.

SLEEP & HANDS
Sleep on your back or side. Rubbing and picking pull lashes out.

SKIN & HORMONES
Oily skin, hormones and some medications can shorten wear.

Cleansing

Daily, from [24] hours after

STEP 1 · WET
Close your eyes and wet lashes with clean, lukewarm water.

STEP 2 · FOAM
One pump of lash-safe, oil-free foam. Brush gently downward with a soft lash brush.

STEP 3 · RINSE
Rinse well so no cleanser is left at the base of your lashes.

STEP 4 · DRY & BRUSH
Pat dry with a lint-free towel, then brush through with a clean spoolie.

NORMAL SHEDDING
1–5 natural lashes a day. A new lash takes about 6–8 weeks to grow in.

RETENTION CHECK
Lost lashes within [72] hours of your set due to application? I replace them free.

FILL SCHEDULE
Every 2–3 weeks. Come with at least [40]% of extensions left, or it's a full set.

Keep it dry
No water for [24] hours, no steam for 48.

Oil-free only
No oils, balms or oily removers near the eyes.

Skip the extras
No curlers; extension-safe mascara only.

Hands off
Never pull extensions off. Book a removal.

THIS IS NORMAL

- Finding 1–5 lashes a day with extensions on
- A few twisted or crossed lashes as they grow out
- Small gaps by week 2–3 (that's what fills are for)
- Slightly pink eye whites for a day after your set
- Lashes looking thin for a few weeks after removal
- A little more shedding with seasonal changes

CALL ME IF YOU NOTICE

- Swollen, itchy or puffy eyelids
- A rash or redness on the lids or under-eye area
- Red eyes lasting more than 24–48 hours
- Discharge, crusting or a stye
- An extension poking or bothering your eye
- Natural lashes falling out in clumps

Call 911 for trouble breathing, or swelling of the face or throat. Get **urgent eye care** for eye pain or vision changes.

Possible allergy? Have your extensions removed professionally and see a doctor before any new set.

YOUR NEXT FILL _____

CLEANSER I RECOMMEND _____

NOTES _____

PRACTITIONER REFERENCE

Lash & Brow Styling

Match the style to the eye, and the extension to the natural lash.

Lash curls

J
Straightest

Barely there lift; very natural.

B
Gentle

Soft, natural curl.

C
Classic

Noticeable lift; suits most eyes.

CC
C to D

Extra lift for straight lashes.

D
Dramatic

Doll-like, wide-open look.

L / M
Flat base

Hooded eyes, downward lashes.

Follow the natural lash direction. A strong curl on a straight lash has less bonding contact and can shorten retention.

Diameter & weight

Classic
0.12–0.20 mm · one per lash

0.15 everyday; 0.12 for fine lashes.

Volume
0.03–0.07 mm · fans

2–3D 0.07 · 4–5D 0.05 · 6D+ 0.03

Hybrid
Classic + fans

About half and half for soft texture.

The weight rule

An extension or fan should never weigh more than the natural lash can carry. Keep length within about [2–3] mm of the natural lash, and go finer and shorter on weak, short or fine lashes. Check your brand's weight chart.

Mapping styles

STYLE	WHERE THE LENGTH GOES	BEST FOR
Natural	Mirrors the natural lash line.	First sets; any eye shape.
Open eye / doll	Longest at the center, over the pupil.	Almond, small or close-set eyes.
Cat eye	Builds to the longest at the outer corner.	Round or close-set; skip on downturned.
Squirrel	Peaks at outer third, shorter at the corner.	Lifts downturned or hooded eyes.
Kitten	Long from center to outer third, feathered.	A soft lift for most shapes.

EYE-SHAPE SUGGESTIONS

- **Hooded:** L/M or D curl, open-eye map.
- **Monolid:** L/M curl, doll or squirrel.
- **Downturned:** squirrel; lift the outer third.
- **Round:** cat eye or kitten to lengthen.
- **Almond:** most styles work.
- **Deep-set:** C or CC, mid lengths.
- Suggestions only: the natural lash decides.

BROW TINT SHADE GUIDE

- **Blonde:** 1–2 shades darker than hair.
- **Medium brown:** match or 1 shade darker.
- **Dark or black:** match; avoid flat jet black.
- **Grey or white:** soft brown or taupe.
- **Red:** warm light brown.
- **Undertone:** cool skin ash, warm skin warm.
- Patch test 48 hours first; check your state board.

Brow shape quick rules. Start in line with the side of the nostril. Arch two-thirds out, over the outer iris. End the tail on the line from nostril past the outer eye corner, no lower than the start. Tidy below and between; leave the top line mostly alone.

[1] Not an automatic no. Less predictable results; ventilate.
[2] Pink eye, stye, blepharitis. Removal: doctor's OK.
[3] LASIK, cataract or eyelid: [3] mo plus eye-doctor OK.
[4] Rash, broken skin, sunburn, eczema or psoriasis flare.
[5] Discuss privately; defer if active. Never pull hairs.
[6] Hairs may be fragile. Physician clearance, gentle work.
[7] Cyanoacrylate allergy: no set. Remove gently, refer.
[8] No tint or henna. Lift or laminate without tint.
[9] No waxing; tweeze or thread. Hairs may be dry.
[10] Tretinoin, adapalene, tazarotene: stop [7] days before.
[11] Prostaglandins: lifts may over-process; retention varies.
[12] More bruising. Client never stops prescribed meds.
[13] Same hairs only. Too soon risks over-processing.
[14] Near the area. Ask about any recent at-home peels.
[15] No wax or pressure for 24–48 h after injections.
[16] Fully healed (6+ weeks) and with the PMU artist's OK.

Conservative defaults; check your state rules. This chart uses the more cautious window. State board rules, manufacturer instructions and the client's physician or eye doctor come first. Never treat anyone under the influence.

AFTERCARE

Lash Extensions

Every day

shedding 1–5 lashes a day is normal

DO

· Keep lashes dry for the first [24] hours
· Cleanse daily with lash-safe foam
· Brush through with a clean spoolie
· Use oil-free makeup remover
· Sleep on your back or side

AVOID

· Steam, saunas and sweat for 48 hours
· Oils, balms and eye creams near lashes
· Mascara and lash curlers
· Rubbing, picking or pulling
· Removing extensions at home

Fill in 2–3 weeks: _____

CALL ME IF

Puffy, itchy or red eyelids · rash or discharge. **Urgent eye care** for eye pain or vision change. **911** for trouble breathing or face swelling.

Questions? Text [Phone] [Your Business Name]

AFTERCARE

Lash Lift & Tint

First 24 hours

your curl is setting

DO

· Keep lashes completely dry for 24 hours
· Sleep on your back the first night
· Then brush lashes up daily with a spoolie
· From day 2, a non-prostaglandin conditioner

AVOID

· Steam, sweat and mascara for 24 hours
· Waterproof mascara and oils near eyes
· Lash curlers, rubbing or pulling lashes
· Another lift sooner than 6–8 weeks

After 24 hours, **water-based mascara** only. Your lift lasts about 6–8 weeks. **Next lift:** [date]

CALL ME IF

Lid swelling, itching or rash · worsening redness · discharge. Eye pain or vision change: urgent eye care. Trouble breathing: call 911.
