SERVICE

6 months
before

Waxing: took isotretinoin (Accutane) in the last 6 months? No wax; I'll tweeze or thread.

Eye surgery (LASIK, cataract, eyelid)? Wait [3] months and get your eye doctor's OK.

2 weeks
before

Waxing: no chemical peels, laser or microneedling near the brows.

Using a lash serum or glaucoma drops? Tell me now.

1 week
before

Waxing: pause prescription retinoids (tretinoin, adapalene) near the brows.

Let any sunburn on the area heal fully.

3–5 days
before

Pause retinol, AHA/BHA acids and scrubs near the brows.

No oil-based eye products or cleansers.

48 hours
before

Patch test done for tint, henna, lift solution or lash adhesive.

Had Botox near the brows? Wait 48 hours to wax.

Day of
your visit

Clean lashes and brows: no mascara, eye makeup or brow products.

Contacts out; wear your glasses.

Twitchy eyes? Skip the extra coffee.

Lash extensions

· Come with clean, dry lashes; no oils on the eyes for 24 hours.

· A full set takes [1.5–2.5] hours with eyes closed, so get comfy.

· Wearing another artist's set? Tell me; it may need removal first.

· Bring a photo of the look you like.

Lift & lamination

· Your last lift or lamination should be at least 6–8 weeks ago.

· Lash extensions must come off before a lift.

· Using a lash serum? Tell me; it changes how a lift takes.

· Don't wax or tweeze your brows first; I tidy them after lamination.

Tint, henna & wax

· Patch test 48 hours before your first tint and whenever products change.

· Let brows grow for [1–2 weeks] so I can see your natural shape.

· Bring a photo of brows you love.

· Wax over recent retinoids can lift skin, so follow the timeline.

PLEASE CALL TO RESCHEDULE IF YOU HAVE

· Pink eye, a stye or any eye infection

· Red, itchy or swollen eyes or eyelids

· A sunburn, rash or broken skin in the area

· A fever, cold or flu, or feel unwell

· Any redness or itching from your patch test

· Recent eye surgery without your eye doctor's OK

We ask for [48] hours' notice. If it's about your safety, just call. We'll find a new time together.

Important

Pregnant or breastfeeding? It's not an automatic no, but hormones can change how lifts and extensions take, so check with your doctor and tell me. Never stop a prescribed medication without your doctor's OK.
