AFTERCARE

After High Frequency

Your scalp may feel fresh, clean and lightly tingly. Here's what to expect and how to care for your scalp until your next visit.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Today first hours	Light tingling, warmth or slight pinkness for a few hours. A faint ozone smell in your hair.	Leave your scalp product-free if you can. Brush gently with a soft brush.	Heavy styling products, hairspray and dry shampoo. Scratching your scalp.
Days 1–2 settling in	Scalp feels clean and calm. A dry or sensitive scalp may feel a little tight.	Gentle shampoo, lukewarm water. A light, fragrance-free scalp serum if dry.	Hot tools on the roots, very hot showers, and color or chemical services.
Week 1 everyday care	Oil and buildup slowly return to your usual rhythm.	Wash as often as your scalp needs. Hat or scalp sunscreen outdoors.	Harsh scrubs, picking at flakes, and tight styles that pull at the roots.
1–4 weeks next visit	Results are gradual and vary from person to person.	Book your next visit. Tell me about any new implant, pregnancy or medicine.	Home high-frequency wands without guidance, especially with product in your hair.

GOOD TO KNOW

- The ozone smell fades by your next wash
- Arrive next time with clean, product-free hair
- Drink water if you like; it's for comfort, not detox
- Ongoing itching or flaking? See a dermatologist
- A few loose hairs at the next wash are normal
- Leave jewelry and hair clips at home next visit
- This is a cosmetic service; regrowth isn't promised
- A new or changing scalp spot should be checked

Go gentle
Soft brush, light hands, no scratching.

Keep it light
Skip heavy products today.

Lukewarm
Cooler water is kinder to your scalp.

Wait on color
Give it [24–48] hours first.

CALL ME RIGHT AWAY IF YOU NOTICE

- Burning, blisters or a sore spot on your scalp
- Hives, swelling or an itchy rash
- Redness that lasts beyond a day or spreads
- Dizziness or a headache that doesn't settle

Blistering or a burn that worsens: please see a doctor. Sudden severe headache, slurred speech, facial droop or weakness: call 911.
