WHAT IT IS
A glass comb or rake electrode glides over your scalp, giving a gentle, low-level electrical current.

WHAT TO EXPECT
About [5–10] minutes of light tingling and buzzing. A fresh ozone smell is normal.

HOW LONG IT LASTS
Your scalp may feel fresh and clean for a few days. Often booked every [1–4] weeks.

TODAY'S SERVICE ☐ High frequency ☐ Add-on to ritual ☐ Violet / argon ☐ Orange / neon ☐ Other: [ ]

POSSIBLE EFFECTS AND RISKS

- Tingling, buzzing or a light snapping sound
- Mild pinkness or warmth for a few hours
- Brief headache or tension in some people
- Irritation if skin is broken or inflamed
- Small sparks if the electrode lifts off the skin
- Dryness, especially on a dry or sensitive scalp
- Burn risk with flammable products in the hair
- Results vary. Hair regrowth is not promised.

Pacemaker, metal implants in head/neck, epilepsy or pregnancy? High frequency isn't safe for you. I'll gladly offer a scalp massage or LED session instead.

Please initial each statement

	Initials
I've shared my full health history honestly, including implants, devices and medications.	
I have no hairspray, dry shampoo or alcohol-based product on my scalp or hair today.	
I've removed my jewelry, hair clips and pins, and I'll keep my hands off metal surfaces.	
I understand tingling, buzzing and an ozone smell are normal, and the setting starts low.	
I'll speak up right away if anything stings, feels hot, or I feel dizzy or unwell.	
I understand this is a cosmetic service. It doesn't diagnose or treat hair loss or disease.	
Before and after scalp photos for my private record are OK. Social media use only with my separate OK.	
Deposits and fees follow [Your Business Name] policy. I'll tell you about any health changes.	

By signing, I confirm I am 18 or older (or have parent or guardian consent per [your policy and local law]), have read this form, had my questions answered, and consent to a high-frequency scalp treatment and the services checked above.
