How to make them yours

1
In a free Canva account, click Create, then Upload, and choose this PDF.

2
Canva turns every page into an editable design.

3
Add your logo, business name and colors.

4
Download as PDF to print, or fill in on a tablet.

BEFORE YOU USE THESE

These templates are a starting point, not legal or medical advice. Massage rules vary by state and country, so check your licensing board for scope, draping and record-keeping rules. Massage therapists don't diagnose or prescribe: refer clients to their doctor, get physician clearance where a form calls for it, and have a local attorney review your consent forms.

Rather go paperless?

Send, sign and store every one of these forms from your phone with SlickChart.

INFORMED CONSENT & RELEASE · MASSAGE

Massage Therapy Consent

CLIENT NAME _____

BIRTH DATE _____ DATE _____ MASSAGE SERVICE(S) I'M CONSENTING TO _____

WHAT MASSAGE INVOLVES
Hands-on techniques on muscles and soft tissue, with oil or lotion, while you rest under a sheet or blanket.

WHAT IT ISN'T
Not a diagnosis, treatment or cure, and not a substitute for care from your doctor or other provider.

YOU'RE IN CONTROL
Change the pressure, skip any area, stay clothed, or stop at any time. Just say so.

Possible effects

Muscle soreness. Tenderness for 24–72 hours, more likely after deeper or focused work.

Bruising. Light bruising can happen, especially with blood thinners or easy bruising.

Lightheadedness. Feeling dizzy or relaxed-heavy when you sit up. Rise slowly.

Tiredness. Feeling sleepy or low on energy for the rest of the day.

Skin reaction. Redness or itching from oils or lotions, most often nut oils or fragrance.

Emotional release. Tears or strong feelings can surface. This is normal; we can pause anytime.

Temporary flare. Old aches can feel more noticeable for a day before easing.

Rare injury. Serious injury from massage is rare. Honest health information helps prevent it.

Please tell me if you are pregnant, take blood thinners, or have had recent surgery, injury, a clot or heart issues.

Allergic to nuts or fragrance? A nut-free, unscented lotion is available. Some conditions need a doctor's OK first.

Please initial each statement

	Initials
I've read this page and had my questions answered. No specific result was promised to me.	
My health information is honest and complete. I'll share any changes before each session.	
I understand draping and boundaries: only the area being worked is uncovered, and I can stay clothed.	
I'll speak up about pressure, pain, temperature or discomfort, and I know I can stop the session at any time.	
Massage isn't medical care. My therapist doesn't diagnose or prescribe; I'll see my doctor.	
Sexual contact is never part of massage. Inappropriate behavior ends the session, charged in full.	
I'm not under the influence of alcohol or drugs. My session may be declined or ended if I am.	
I release [Your Business Name] from claims arising from health details I withheld, per [State] law.	
I am 18 or older, or my parent or guardian signs below and stays [in the room / on site] for my session.

BOOKING · CANCELLATION · STUDIO CONDUCT

Booking, Cancellation & Studio Policy

YOUR LOGO

Your appointment time is reserved just for you. These policies keep things fair for every client and help every session feel safe, calm and professional.

NOTICE TO CHANGE
[24] hours
To cancel or reschedule at no charge.

NO-SHOW
[100]%
Of the booked service, charged to your card on file.

LATE ARRIVAL
Full price
Your session still ends on time so the next client starts on time.

Booking	A card on file or a [deposit] holds your time. Deposits go toward your service.
Late cancellation	Less than [24] hours' notice is charged [50]% of the service. Sudden illness? Message us and we'll do our best.
Health changes	Tell us before each visit about new injuries, surgery, medications or pregnancy. Some need your doctor's clearance first.
Feeling unwell?	Fever, a cold, a contagious illness or a skin infection? Please reschedule. We waive the fee when you let us know [your policy].
Professional conduct	Every session is therapeutic and professional, and you stay draped except for the area being worked on. Sexual comments, requests or behavior end the session at once, charged in full.
Alcohol & drugs	We can't massage anyone under the influence. The session is canceled and charged in full.
Minors	Under 18? A parent or guardian signs consent and stays in the room [your policy].
Gratuity	Gratuity is [appreciated but never expected]. [Edit to match your policy.]
Gift cards & packages	Gift cards are valid for [period, per local law] and can't be exchanged for cash. Packages are non-refundable and expire [12] months after purchase.
Refunds	Services can't be refunded once performed. Tell us during your session if anything feels wrong so we can adjust right away.

CARD ON FILE FOR LATE CANCELLATION AND NO-SHOW FEES, CHARGED ONLY AS DESCRIBED ABOVE

☐ Card saved in [booking system] ☐ I prefer to prepay Never write card numbers on this form.

I understand late cancellations and no-shows are charged as described above. ☐

I'll keep my health information up to date and I agree to the professional conduct policy. ☐

By signing, I confirm I've read and agree to this policy, including the cancellation, no-show and conduct terms.

CLIENT NAME _____ THERAPIST _____ DATE _____

WHAT IT IS
Flowing, light to moderate strokes, kneading and gentle stretches to help you relax and ease tension.

WHAT TO EXPECT
You undress to your comfort level in private and stay draped under a sheet. It should feel good.

HOW LONG EFFECTS LAST
Most people feel looser and calmer for a day or two. Regular sessions every [2–4] weeks help most.

TODAY'S SESSION ☐ 60 min ☐ 90 min ☐ 120 min Add-ons: ☐ Hot towels ☐ Aromatherapy

FOCUS AREAS ☐ Full body ☐ Back ☐ Neck & shoulders ☐ Legs & feet ☐ Arms & hands ☐ Scalp

POSSIBLE EFFECTS

- Mild tenderness for 24 to 48 hours, like after a workout
- Skin reaction to an oil, lotion or essential oil
- Easy bruising if you take blood thinners
- Feeling lightheaded or sleepy when you first sit up
- Brief redness of the skin where strokes were firm
- A short flare of an old ache as muscles let go

Quick health check

- Fever, cold or feeling unwell
- Recent surgery or injury
- High blood pressure or heart issue
- Diabetes or numbness
- Blood clot or DVT, ever
- Pregnant or may be pregnant
- Rash, sunburn or open skin
- Cancer or current treatment
- Blood thinners or bleeding disorder
- Osteoporosis
- Varicose veins
- Recent Botox, filler or tattoo

☐ **None of these apply to me** or list any that do: _____

About oils and scents. Our usual oil is [oil name], which may contain nut oils. A nut-free, unscented lotion is always available, and aromatherapy is optional.

☐ Nut-free, unscented
☐ Usual oil is fine

Please initial each statement

	Initials
I've shared my full health and medication history, and I'll tell my therapist about any changes.	
I understand massage is for relaxation and wellness. It does not diagnose, treat or replace medical care.	
I'll speak up if pressure is too much or too little, or if anything feels uncomfortable or painful.	
I can change pressure, skip an area or stop the session at any time, for any reason.	
I'll stay draped at all times. Glutes, abdomen or chest wall are worked only with my OK first.	
I've told my therapist about any allergies to nuts, oils, lotions or scents.	
Inappropriate behavior or arriving intoxicated ends the session at once, charged in full.	
Fees, late arrival and cancellations follow [Your Business Name] policy, which I've read.	

By signing, I confirm I am 18 or older (or have parent or guardian consent and presence per [your policy and local law]), have read this form, had my questions answered, and consent to the massage I checked above.

CLIENT SIGNATURE _____ DATE _____ THERAPIST · LICENSE # _____ DATE _____

PRACTITIONER PROTOCOL

Swedish & Relaxation Massage

Times in [brackets] suit a 60-minute session. Check your state board rules.

SCREEN

Intake and health check reviewed. No fever, clot signs, acute injury or open skin.

CHECK-IN

Ask about goals, pressure (1–5), focus areas, areas to avoid and any changes since last visit.

PRE-SESSION

Ask about nut, oil and scent allergies. Confirm consent for any sensitive areas.

SET UP FIRST ☐ Fresh linens & cover ☐ Table disinfected ☐ Room warm ☐ Oils in pumps ☐ Nut-free oil ☐ Bolsters ☐ Hands washed

#	STEP	TIME	HOW
1	**Intake review**	3 min	Review intake and health check. Defer or refer if anything is a red flag.
2	**Consent & draping**	2 min	Explain the flow and draping. Client may stop or change pressure any time.
3	**Privacy to undress**	3 min	Step out. Client undresses to comfort level and lies under the top sheet.
4	**Positioning**	2 min	Knock first. Prone or supine; bolster ankles or knees, adjust cradle.
5	**Warming strokes**	5 min	Broad effleurage with the chosen oil to warm tissue and settle breathing.
6	**Main work by region**	35 min	Back and shoulders, legs, arms, neck: petrissage, friction, gentle stretch.
7	**Pressure check-ins**	ongoing	Ask early and at each new area. Adjust for wincing or held breath.
8	**Endangerment sites**	ongoing	Light or no pressure on front of neck, back of knee, armpit, inner elbow.
9	**Finishing strokes**	3 min	Slow effleurage, then still hands. Tell the client the session has ended.
10	**Privacy to dress**	3 min	Step out. Invite the client to sit up slowly and take their time.
11	**Notes & water**	5 min	Offer water, review aftercare card, write SOAP notes, rebook.

ENDPOINT AND SAFETY

- Genitals and gluteal cleft always draped
- Pressure matched to feedback, never past comfort
- Uncover only the area being worked
- Skip rashes, wounds, varicose veins, new tattoos

IF SOMETHING GOES WRONG

- Dizzy or faint: sit slowly, or lie back with legs up. Water and rest.
- Skin reaction: remove the product, wash with mild soap, switch to nut-free.
- Client uneasy with draping: pause, re-drape and ask what they need.
- Sharp pain, numbness or tingling: stop and reposition. Avoid the area.
- Clot signs (one calf swollen, red, warm, sore): stop, refer urgently.
- Chest pain, trouble breathing or stroke signs: call 911 right away.

Always write an incident report and check in with the client within 24 to 48 hours.

AFTERCARE

After Your Swedish Massage

Your muscles have softened and your body has had time to settle. A few easy habits help that loose, relaxed feeling last.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Today right after	Feeling sleepy, relaxed or a little lightheaded when you first stand.	Sit up slowly. Drink water if you're thirsty. Rest, or take a warm bath or shower tonight.	Rushing off, driving while groggy, alcohol, or a hard workout straight after.
24–72 hours settling in	Mild tenderness for a day or two, like after gentle exercise.	Gentle stretching, a short walk and a warm compress or bath for any tender spots.	Heavy training on sore muscles. Pressing hard on tender areas to test them.
The week keep it going	Tension may creep back with stress, long drives or desk work.	Take stretch breaks, check your posture and keep up the habits that felt good.	Holding one position for hours. Ignoring an ache that keeps getting worse.
Next visit in [2–4] weeks	Regular sessions often feel deeper as your body learns to let go.	Tell me what felt good, any soreness, and any new health changes or medications.	Booking on the same day as a new injury, fever or a fresh tattoo or sunburn.

GOOD TO KNOW

- Feeling emotional or very sleepy is normal
- A warm bath with Epsom salt can ease tenderness
- Shower off oil if it bothers your skin or clothes
- Sleep well tonight; relaxation often deepens rest
- Water is for comfort; drink what feels right to you
- Soreness should fade within about 48 hours
- Tell me if any oil or scent irritated your skin
- Gentle movement helps more than staying still

Slow down
Give yourself a quiet hour after.

Stay warm
Warm bath, shower or compress.

Move gently
Stretch and walk; no hard training.

Rest well
Sleep helps your body recover.

CALL YOUR DOCTOR IF YOU NOTICE

- One calf swollen, red, warm or painful
- Numbness or tingling that doesn't fade
- Bruising that spreads or keeps growing
- Pain that gets worse instead of better

Chest pain or sudden shortness of breath: call 911. Then let me know so I can note it in your record.

PRESSURE WE USED _____

AREAS TO STRETCH _____

YOUR NEXT VISIT DATE _____

INFORMED CONSENT

Deep Tissue & Sports Consent

YOUR LOGO

CLIENT NAME _____ THERAPIST _____ DATE _____

WHAT IT IS
Slow, firm pressure into deeper muscle layers, focused on tight or overworked areas.

WHAT TO EXPECT
Strong but tolerable pressure, worked in gradually. You undress in private and stay draped.

HOW LONG EFFECTS LAST
Some soreness for 1 to 3 days, then easier movement. Regular sessions every [2–4] weeks help most.

TODAY'S SESSION ☐ 60 min ☐ 90 min ☐ 120 min Add-ons: ☐ Hot towels ☐ Aromatherapy

FOCUS AREAS ☐ Back ☐ Neck & shoulders ☐ Legs & feet ☐ Hips & glutes* ☐ Arms

POSSIBLE EFFECTS

- Muscle soreness for 24 to 72 hours, like after training
- Feeling lightheaded or tired when you first sit up
- Brief discomfort while a tight area releases
- Light bruising, more likely if you bruise easily
- Skin reaction to an oil, lotion or essential oil
- Redness or tenderness where pressure was firm

About pressure. Deep work should never be sharp or make you hold your breath. On a 1 to 10 scale we stay at about 7 or below [policy], and I'll check in often. Tell me any time. Initials _____

Quick health check

- Blood thinners or bleeding disorder
- Recent surgery or fracture
- High blood pressure or heart issue
- Diabetes or numbness
- Blood clot or DVT, ever
- Injury in the last 72 hours
- Pain meds or muscle relaxants today
- Varicose veins
- Osteoporosis or fragile bones
- Pregnant or may be pregnant
- Steroid use (thin skin)
- Rash, sunburn or open skin

☐ **None of these apply to me** or list any that do: _____

Please initial each statement

	Initials
I've shared my full health and medication history, and I'll tell my therapist about any changes.	
I understand massage supports wellness and recovery. It does not diagnose, treat or replace medical care.	
I'll speak up right away if pressure feels sharp, numb, tingly or more than I can relax into.	
I can change pressure, skip an area or stop the session at any time, for any reason.	
I'll stay draped. *Glutes, inner thigh, abdomen or chest wall are worked only with my OK first.	
I understand soreness or light bruising can follow deep work, and results aren't guaranteed.	
I've shared any nut, oil or scent allergies. A nut-free, unscented lotion is available.	
Intoxication or inappropriate behavior ends the session, charged in full [policy].	

By signing, I confirm I am 18 or older (or have parent or guardian consent and presence per [your policy and local law]), have read this form, had my questions answered, and consent to the massage I checked above.

CLIENT SIGNATURE _____ DATE _____ THERAPIST · LICENSE # _____ DATE _____

PRACTITIONER PROTOCOL

Deep Tissue & Sports Massage

Times in [brackets] suit a 60-minute session. Check your state board rules.

SCREEN

Intake reviewed. No clot signs, fever, acute injury under 72 h, or recent surgery without clearance.

CHECK-IN

Ask about goals, training, problem areas, areas to avoid, medications and today's pain level.

PRE-SESSION

Explain the 1–10 scale and the policy limit. Ask about nut, oil and scent allergies.

SET UP FIRST ☐ Fresh linens & cover ☐ Table disinfected ☐ Room warm ☐ Oils in pumps ☐ Nut-free oil ☐ Bolsters ☐ Hands washed

#	STEP	TIME	HOW
1	**Intake & consent**	5 min	Review intake. Explain draping, pressure scale and right to stop.
2	**Privacy to undress**	3 min	Step out. Client undresses to comfort level and lies under the top sheet.
3	**Positioning**	2 min	Knock first. Prone or supine; bolster ankles or knees, adjust cradle.
4	**Warm tissue first**	8 min	Broad effleurage and petrissage over the region before deep work.
5	**Slow sink-in pressure**	30 min	Region by region, sink in slowly; wait for the tissue to give.
6	**Stay within tolerance**	ongoing	Check in often; stay at or under about 7/10 [policy].
7	**Endangerment sites**	ongoing	No deep pressure on front of neck, back of knee, armpit, groin.
8	**Finishing strokes**	3 min	Lighter effleurage to finish, then still hands. Session ends.
9	**Privacy to dress**	3 min	Step out. Invite the client to sit up slowly and take their time.
10	**Notes & water**	6 min	Offer water. Review soreness, ice or heat. SOAP notes; rebook.

ENDPOINT AND SAFETY

- Genitals and gluteal cleft always draped
- Tissue warm before deep work; slow in, slow out
- Glutes, inner thigh, abdomen only with consent
- Sharp, burning or radiating pain means stop

Blood thinners, bleeding disorders or osteoporosis: light to moderate pressure only, no deep work. Acute injury: avoid the area for 48 to 72 hours.

IF SOMETHING GOES WRONG

- Dizzy: sit slowly, or lie back with legs up. Water, rest.
- Skin reaction: remove the product, wash with mild soap, switch to nut-free.
- Bruising: note it, advise ice, lighter pressure next time.
- Sharp pain, numbness or tingling: stop and reposition. Avoid the area.
- Clot signs (one calf swollen, red, warm, sore): stop, refer urgently.
- Chest pain, trouble breathing or stroke signs: call 911 right away.

Always write an incident report and check in with the client within 24 to 48 hours.

AFTERCARE

After Deep Tissue Massage

Deep work asks a lot of your muscles, so some soreness is normal. These habits help you recover comfortably.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Today right after	Feeling tired, a little lightheaded or tender in the areas we worked.	Sit up slowly. Drink water if you're thirsty. Ice or heat, whichever feels better.	Heavy training or long runs for [24] hours. Alcohol and hot tubs tonight.
24–72 hours recovery	Soreness like after a hard workout, maybe light bruising, easing daily.	Gentle stretching, walking, a warm bath, or ice for 10 to 15 minutes on sore spots.	Pressing on or rolling bruised spots. Training hard through sharp or worsening pain.
The week back to it	Freer movement and less tightness, even if some returns with load.	Ease back into training. Keep up stretching, sleep and any exercises I suggested.	Jumping straight to your heaviest sessions, or ignoring worsening pain.
Next visit in [2–4] weeks	Each session tends to feel less sore as your tissue adapts to the work.	Tell me how long soreness lasted, any bruising, and any new injury or medication.	Booking on the day of a race, a new injury, or right after a hard training block.

GOOD TO KNOW

- Soreness for 1 to 3 days is common after deep work
- Ice calms hot, sore spots; heat eases stiffness
- Muscle soreness should ease a little each day
- Sleep and gentle movement speed recovery
- Light bruising can happen, more so on blood thinners
- Water is for comfort; drink what feels right to you
- Tell me what pressure felt right for next time
- Plan big events [2–3] days after deep work

Ease off
No heavy training for [24] hours.

Ice or heat
Whatever feels best on sore spots.

Stretch gently
Short, easy stretches, no bouncing.

Rest well
Sleep is when you recover.

CALL YOUR DOCTOR IF YOU NOTICE

- One calf swollen, red, warm or painful
- Numbness or tingling that doesn't fade
- Bruising that spreads or keeps growing
- Sharp pain or soreness past 3 days

Chest pain or sudden shortness of breath: call 911. Then let me know so I can note it in your record.

YOUR LOGO

CLIENT NAME | THERAPIST | DATE

WEEKS PREGNANT · DUE DATE | PRENATAL CARE PROVIDER | PROVIDER PHONE

WHAT IT IS
Gentle massage adapted for pregnancy, with you on your side or semi-reclined on pillows.

WHAT TO EXPECT
About [60] minutes, light to moderate pressure. Breaks or position changes anytime.

HOW LONG IT LASTS
Ease often lasts a day or two. Many clients book every [2–4] weeks as pregnancy goes on.

POSSIBLE EFFECTS AND RISKS

- Mild tenderness in the back or hips for a day or two
- Feeling faint lying flat, so we avoid that position
- Skin reaction to oil or lotion (nut-free on request)
- Lightheadedness when you sit up or change position
- Heartburn or nausea in some positions
- Leg cramps; tell me and I'll adjust right away

Massage doesn't replace prenatal care. Your therapist doesn't diagnose or treat conditions.

Quick pregnancy health check

- High BP or pre-eclampsia
- Gestational diabetes
- Bleeding this pregnancy
- Heart or kidney condition
- Placenta previa or abruption
- Twins or multiples
- Severe swelling or headaches
- Blood thinners or other meds
- Preterm labor history
- Blood clot or clotting disorder
- Varicose veins
- Nut or fragrance allergy

☐ **None of these apply to me** or list any that do: _____

Today's session ☐ Side-lying ☐ Semi-reclined, left tilt ☐ Postpartum ☐ Clearance on file

Please initial each statement

	Initials
I've shared my health and pregnancy history honestly and will tell you about any changes at each visit.	
I'm under the care of a prenatal provider. If my pregnancy is high-risk, I'll bring written clearance first.	
I understand I won't lie flat on my back after about 20 weeks. I'll say if any position feels uncomfortable.	
I'll speak up right away about dizziness, nausea, cramping, pain or anything that doesn't feel right.	
You'll stop and refer me to my provider for warning signs such as bleeding, contractions or leaking fluid.	
Leg pressure stays light, with no deep abdominal work. I can change pressure or stop anytime.	
Sensitive areas such as the abdomen or glutes are worked only with my OK, which I can withdraw.	
Fees follow [Your Business Name] policy. Cancellations for pregnancy reasons or labor are [waived].	

By signing, I confirm I am 18 or older (or have parent or guardian consent per [your policy and local law]), have read this form, had my questions answered, and consent to prenatal massage today and at future visits this pregnancy.

PRACTITIONER PROTOCOL

Prenatal Massage

Follow your prenatal training, state board rules and the client's provider guidance. Times for 60 minutes.

SCREEN

Intake, weeks and due date noted. Any high-risk factor: written clearance first.

CHECK TODAY

Ask about bleeding, cramping, headaches or swelling. Any warning sign: refer.

PRE-SESSION

Book from [13] weeks per policy. Light snack and restroom before the session.

SET UP FIRST ☐ Hands washed ☐ Fresh linens and covers ☐ Pillows, bolsters, wedge ready ☐ Nut-free, unscented lotion ☐ Room warm, not hot ☐ Water within reach

#	STEP	TIME	HOW
1	**Check-in & consent**	5 min	Review changes and warning signs. Clearance on file if needed.
2	**Position**	3 min	Side-lying with pillows, or semi-reclined with a left tilt.
3	**Back & hips**	12 min	Light to moderate effleurage, petrissage. Glutes only with consent.
4	**Neck & shoulders**	8 min	Slow strokes on upper trapezius and back of neck. No anterior neck.
5	**Legs**	6 min	Light strokes toward the heart. No deep inner leg or calf work.
6	**Turn & repeat**	12 min	Assist a slow roll, reset bolsters, repeat back, hips and shoulders.
7	**Arms & hands**	4 min	Gentle strokes toward the heart. Very light over swollen hands.
8	**Feet**	3 min	Broad, gentle strokes. No sustained deep pressure at the ankles.
9	**Abdomen (optional)**	2 min	Only if requested: feather-light strokes. Never deep abdominal work.
10	**Rise slowly**	3 min	Roll to side, push up, sit a moment. Check for dizziness.
11	**Aftercare & rebook**	2 min	Review sheet and card. Record session. Rebook at [2–4] weeks.

ENDPOINT AND SAFETY

- Never flat on the back after about 20 weeks
- Essential oils minimal; unscented default
- No prone unless approved cushion [policy]
- Post C-section: provider clearance, [6] weeks

IF SOMETHING GOES WRONG

- Bleeding, leaking fluid, contractions: stop; client calls provider now.
- Calf pain, warmth or one-sided swelling: no leg work; urgent care.
- Heartburn or hip pain: raise the head, adjust the bolsters.
- Severe headache, vision changes, sudden swelling: stop; call provider.
- Dizziness or nausea: left side, pause, water. End if it persists.
- Chest pain, trouble breathing or fainting: call 911.

Write an incident report and check in with the client within 24 hours.

AFTERCARE

After Your Prenatal Massage

Pregnancy asks a lot of your body. These habits help you keep the ease from your session and know what to watch for.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Getting up right after	Feeling relaxed, sleepy or a little lightheaded as you sit up.	Roll to your side, push up slowly and sit a moment before standing.	Jumping up quickly, or driving if you feel dizzy.
Today first 24 hours	Mild tenderness in your back or hips, and feeling calm or tired.	Rest, sip water, have a snack. A warm, not hot, shower is lovely.	Hot tubs, saunas and very hot baths. Strenuous activity.
Tonight sleeping	Settling may feel easier. Some aches return as your baby moves.	Sleep on your side with a pillow between your knees and under your bump.	Lying flat on your back for long stretches after about 20 weeks.
Ongoing between visits	Aches shift as your bump grows. That is very common.	Gentle walks and stretches your provider approves. Rebook in [2–4] weeks.	Deep rubbing or massagers on your calves or inner legs.

Your provider Mention your massage at prenatal visits, and tell me about any new diagnosis.

After baby Postpartum massage is welcome when you feel ready. After a C-section, wait for your provider's OK, usually around [6] weeks.

Side sleep
Pillows under your bump and between your knees.

Sip water
Keep a bottle nearby for comfort through the day.

Move gently
Short, easy walks ease stiffness.

Feet up
Rest with your feet raised when ankles swell.

CALL YOUR PROVIDER RIGHT AWAY IF YOU NOTICE

- Vaginal bleeding or fluid leaking
- A severe headache or changes in vision
- Pain, warmth or swelling in one calf
- Regular contractions or cramping
- Sudden swelling of your face or hands
- Your baby moving less than usual

Then let me know, so I can adjust or pause your sessions.

Chest pain, trouble breathing or fainting: call 911.

WEEKS TODAY _____ POSITION THAT FELT BEST _____ YOUR NEXT VISIT _____

Hot Stone Massage Consent

YOUR LOGO

CLIENT NAME _____ THERAPIST _____ DATE _____

WHAT IT IS
Smooth, heated basalt stones that glide with oil as an extension of your therapist's hands.

WHAT TO EXPECT
About [60–90] minutes. Every stone is temperature checked before it touches your skin.

HOW LONG IT LASTS
Warmth and relaxation often linger for hours. Light pinkness fades within a few hours.

TODAY'S SESSION ☐ Full body ☐ Back, neck & shoulders ☐ Add-on to massage ☐ Cool stones, if offered

POSSIBLE EFFECTS AND RISKS

- Skin redness or pinkness that fades within hours
- Feeling too warm, lightheaded or very sleepy
- Skin reaction to oil or lotion (nut-free on request)
- Discomfort from the weight of a placed stone
- A burn or blister if a stone is too hot
- Mild muscle tenderness for a day or two
- Bruising, more likely if you take blood thinners
- Less heat warning where feeling is reduced

Quick health check

- Diabetes or numbness (neuropathy)
- High blood pressure
- Blood thinners
- Varicose veins
- Poor circulation
- Heart condition
- Sunburn, rash or skin condition
- Recent Botox or fillers
- Heat sensitivity or MS
- Pregnant
- Recent injury or swelling
- Nut or oil allergy

☐ **None of these apply to me** or list any that do: _____

About heat and safety. Stones are heated in a professional heater, thermometer checked and tested on your therapist's skin first.

☐ I prefer mild warmth
☐ I prefer it warmer

Please initial each statement

	Initials
I've shared my health history honestly, including diabetes, circulation, heat sensitivity and medications.	
I understand the risks above, including the small chance of a burn if a stone is too hot.	
I'll tell my therapist right away if any stone feels too hot, uncomfortable or too heavy.	
Placed stones rest on a sheet or towel and are never left under my body on bare skin.	
I can ask for less heat, change pressure, or stop the session at any time.	
Sensitive areas are worked only with my prior OK, which I can withdraw at any time.	
I'll check my skin afterward and report any blister, burn or redness that doesn't fade.	
Fees follow [Your Business Name] policy, including cancellation and late arrival.	

By signing, I confirm I am 18 or older (or have parent or guardian consent per [your policy and local law]), have read this form, had my questions answered, and consent to the hot stone service I checked above.

CLIENT SIGNATURE _____ DATE _____ THERAPIST SIGNATURE · LICENSE # _____ DATE _____

PRACTITIONER PROTOCOL

Hot Stone Massage

Follow your heater manufacturer's instructions and state board rules. Times are for 75 min.

SCREEN

Intake cleared. Neuropathy, poor circulation, heat sensitivity: no stones or modify.

HEAT CHECK

Thermometer in heater, about 120–130°F [per manufacturer]. Forearm test each stone.

PRE-SESSION

Heater on [45–60] min ahead, stones covered with water. Stones inspected for cracks.

SET UP FIRST ☐ Hands washed ☐ Fresh linens, barrier sheet ☐ Calibrated thermometer ☐ Slotted spoon, no bare-hand dipping ☐ Cool water and towels ☐ Nut-free oil option

#	STEP	TIME	HOW
1	**Screen & consent**	5 min	Review health changes, medications and skin. Agree heat and pressure.
2	**Log temperature**	2 min	Read the thermometer and log it. Too hot: add cool water, wait, recheck.
3	**Forearm test**	Each stone	Hold on your inner forearm several seconds before it touches the client.
4	**Placed stones**	5 min	On top of the sheet or a towel only. Never under the body on bare skin.
5	**Warm up**	8 min	Hands-on effleurage with oil first, then bring in stones while moving.
6	**Back & shoulders**	20 min	Stones glide with oil and keep moving. Swap stones as they cool.
7	**Legs & feet**	12 min	Gliding strokes. Avoid varicose veins and the back of the knee.
8	**Turn & front**	15 min	Remove placed stones first. Arms, legs, gentle neck; no anterior neck.
9	**Check in**	Throughout	Ask about heat at each new stone and area. Lift at once if too hot.
10	**Remove & skin check**	3 min	Count all stones out. Look for redness that doesn't fade or blistering.
11	**Aftercare & rebook**	5 min	Water offered, rise slowly. Review the card. Log end temperature.

ENDPOINT AND SAFETY

- Stones always moving unless placed over a barrier
- Wash with soap and water, then disinfect per label
- Count stones in and out of the heater
- Drain and clean heater daily; retire cracked stones

IF SOMETHING GOES WRONG

- Stone too hot: lift at once, set it aside and check the skin.
- Large, deep or facial burn: seek medical care. Note it on the record.
- Heater over temperature: unplug, add cool water, recheck before use.
- Burn or blister: cool running water 20 minutes. Don't pop or cover tightly.
- Overheated or lightheaded: remove stones, cool cloth, water, sit slowly.
- Cracked or chipped stone: remove from service right away.

Always write an incident report and check in with the client within 24 to 48 hours.

AFTERCARE

After Your Hot Stone Massage

Warmth helps muscles let go, and the ease can last for hours. These steps keep your skin comfortable and show you what is normal.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Right after first few hours	Skin looks pink or flushed where stones were. You may feel warm and sleepy.	Sip water, get up slowly, and let your body cool down gradually.	Driving if you feel lightheaded. Rushing straight into a busy day.
Today rest of the day	Pinkness fades within a few hours and doesn't hurt. Muscles feel loose.	Wear loose clothing. A lukewarm shower removes leftover oil.	Hot tubs, saunas, sunbathing, and heating pads on warm skin.
Days 1–2 settling	Mild muscle tenderness can happen, then it eases.	Gentle stretching, walking and rest. Ice or warmth, whichever feels good.	Intense workouts if you feel sore. Ignoring any skin change.
Burn check if skin looks off	Redness that stings, lingers or blisters is a burn, not normal pinkness.	Cool, not icy, running water for 20 minutes. Then call me.	Ice right on skin, popping blisters, butter or greasy creams.

GOOD TO KNOW

- Normal pinkness is even, painless and fades in hours
- Your stones were washed and disinfected before use
- Feeling thirsty after warmth is common; sip water
- Reduced feeling in an area? Check that skin tonight
- Tell me next time if any stone felt too hot
- Oil may linger on skin and hair; a shower removes it

Rise slowly
Sit a moment before you stand.

Cool down
Let warmth fade on its own.

Check skin
Look tonight where stones were.

Skip the heat
No hot tubs or sun today.

CALL ME RIGHT AWAY IF YOU NOTICE

- A blister, or skin that is white, shiny or very sore
- Swelling, or pain that gets worse instead of better
- Redness that is still there the next day
- Dizziness or faintness that doesn't pass

For a burn, cool it under running water for 20 minutes first, then call. Large, deep or facial burns, chest pain or trouble breathing: call 911.

CLIENT FORM · INFORMED CONSENT

Cupping Therapy Consent

YOUR LOGO

CLIENT NAME _____ THERAPIST _____ DATE _____

WHAT IT IS
Gentle suction from silicone, plastic or glass cups lifts skin and muscle. Cups stay still or glide.

WHAT TO EXPECT
About [30–60] minutes, alone or in a massage. A pulling feeling, never sharp pain. No fire used.

HOW LONG MARKS LAST
Round marks are common and usually fade in about [3–10] days. They usually aren't painful.

TODAY'S SESSION ☐ Static cups ☐ Gliding cups ☐ Cupping with massage ☐ Areas: [ ]

POSSIBLE EFFECTS AND RISKS

- Round marks or discoloration for [3–10] days
- Temporary redness, itching or skin sensitivity
- Bruising, more likely with blood thinners
- Irritation from an oil or the cup material
- Tenderness or mild soreness in cupped areas
- Light-headedness, more likely on an empty stomach
- Rarely, blisters or broken skin from strong suction
- Marks may show in photos or sleeveless clothes

Blood thinners or a bleeding disorder? Cupping is usually skipped. We'll choose a different treatment unless your physician has given a written OK.

☐ Doesn't apply to me
☐ Physician OK on file

Quick health check

- Bleeding disorder
- Active cancer or treatment
- Very thin or fragile skin
- Sunburn or rash
- Diabetes or neuropathy
- Blood thinners or daily aspirin
- Pacemaker or implanted device
- Steroid medication
- Open wounds or skin lesions
- Recent surgery or injury
- Pregnant
- Varicose veins
- Bruise easily or anemia
- Tattoo under [2–4] weeks old
- Fever or feeling unwell

☐ **None of these apply to me** or list any that do: _____

Please initial each statement

	Initials
I've shared my full health history honestly, including all medications and blood thinners.	
I understand cupping usually leaves round marks that fade in about [3–10] days.	
I'll speak up right away if the suction feels too strong, sharp, hot or numb.	
Cups avoid the front of my neck, large blood vessels, bony areas, moles and broken skin.	
Only dry cupping is offered. No fire is used and skin is never cut (wet cupping isn't offered).	
Cupping doesn't diagnose or treat medical conditions and doesn't replace care from my doctor.	
Before and after photos for my private record are OK. Social media use only with my separate OK.	
Deposits, fees and cancellations follow [Your Business Name] policy.	

By signing, I confirm I am 18 or older (or have parent or guardian consent per [your policy and local law]), have read this form, had my questions answered, and consent to cupping therapy as checked above.

CLIENT SIGNATURE _____ DATE _____ THERAPIST · LICENSE # _____ DATE _____

PRACTITIONER PROTOCOL

Cupping Therapy

Suction and times in [brackets] follow your training, your cup maker and the client. Check your state board rules.

SCREEN

Intake cleared. No bleeding disorder, blood thinners, active cancer, pacemaker or fever.

CHECK

Pregnant: no cups on abdomen or low back. Varicose veins, thin skin, sunburn: avoid area.

PRE-SESSION SENT

Eat a light meal first. Plan for visible marks for [3–10] days after the session.

SET UP FIRST ☐ Cups disinfected, log signed ☐ Cups inspected, no cracks ☐ Pump and valves working ☐ Oil in pump, nut-free option ☐ Fresh linens, cradle cover ☐ Hands washed, timer set

#	STEP	TIME	HOW
1	**Consult & screen**	5 min	Confirm health changes, medications and goals. Agree on areas.
2	**Consent & photos**	3 min	Consent signed. Explain marks. Before photos only if client agrees.
3	**Skin check**	2 min	Good light. Skip moles, lesions, new tattoos and broken skin.
4	**Warm up**	5–10 min	Massage the area with oil to warm tissue and gauge pressure.
5	**Test cup**	1 min	One cup on a fleshy area, light suction. Ask how it feels.
6	**Static cups**	[5–10] min	Light to moderate suction. Check skin and comfort every few minutes.
7	**Gliding cups**	[5–10] min	Well-oiled skin, low suction. Glide slowly along muscle, never over bone.
8	**Release**	2 min	Press the skin beside the rim to break the seal. Never pull a cup off.
9	**Settle**	5 min	Light strokes over cupped areas. Wipe off excess oil. Keep client warm.
10	**Aftercare & rebook**	5 min	Sit up slowly. Review sheet and card. Rebook once marks have faded.

CUP CARE

Soap and water first, then EPA-registered disinfectant, full label contact time

Every client

Wash, rinse, disinfect for [ ] min per the cup maker, then air dry.

End of day

Clean pump, valves and case. Store cups dry and covered.

Inspect

Discard cups with cracks, chips, tacky silicone or weak suction.

Log it

Date, cup set and initials for every clean. Keep [ ] years.

Endpoint: even marks, client comfortable, no blisters or broken skin. **Safety:** no fire cupping [policy] and no wet cupping (outside massage scope). Keep cups off endangerment sites, large vessels, nerves and bony areas.

IF SOMETHING GOES WRONG

- Sharp pain, tingling or numbness: release now.
- Blister: release, don't pop it, clean dressing.
- Dizzy or faint: remove all cups, lay client flat.
- Cup stuck: press skin at the rim; never pull.
- Broken skin: gloves, gauze, bag waste, disinfect.
- Raise legs, offer water, sit up only when ready.

Chest pain, trouble breathing or fainting that doesn't pass: call 911. Write an incident report.

RECORD FOR THIS SESSION

AFTERCARE

After Your Cupping

Cupping marks are normal and fade on their own. Here's what to expect and how to help your skin and muscles settle after your session.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Today marks appear	Round pink, red or purple marks. Areas may feel warm, tight or a little tender.	Keep marked areas warm and covered. Rest, and drink water if you like.	Hot tubs, saunas, cold plunges and intense exercise for [24] hours.
Days 1–3 settling in	Marks may darken slightly before they fade. Mild itching or stiffness is common.	Warm showers, gentle stretching and loose, soft clothing over marks.	Sun on marked skin. Scrubbing, exfoliating or scratching itchy areas.
Days 3–10 fading	Marks lighten to yellow or brown, then fade. Darker marks take longer.	Cover marks with clothing, or use sunscreen on them outdoors.	Cupping, scrubs or strong pressure on the same area until marks fade.
[2–4] weeks next visit	Areas feel looser. Marks may be lighter with repeat sessions.	Book your next session. Tell me about health or medication changes.	Starting blood thinners or new medications without letting me know.

GOOD TO KNOW

- Mark color varies from person to person
- Dark marks aren't a sign of "toxins" leaving
- Light-headed afterward? Sit, rest and have a snack
- Cupping supports comfort; it doesn't cure conditions
- Marks usually aren't painful to touch
- Marks may show in photos and sleeveless clothes
- Plan big events around visible marks
- Tell your doctor about cupping if they ask about marks

Stay warm
Cover cupped areas and skip drafts today.

Go easy
No hard workouts for [24] hours.

Skip the sun
Marked skin can burn more easily.

Hands off
Don't scratch, scrub or pick at marks.

CALL ME RIGHT AWAY IF YOU NOTICE

- Blisters or broken skin in a cupped area
- Warmth, swelling or pus around a mark
- Pain that gets worse instead of better
- Marks still dark after [2] weeks

Spreading redness, pus or fever: please see a doctor. Chest pain, trouble breathing or fainting: call 911.

Lymphatic Drainage Consent

YOUR LOGO

CLIENT NAME _____ THERAPIST _____ DATE _____

WHAT IT IS
Very light, rhythmic strokes that gently stretch the skin to guide lymph toward your nodes.

WHAT TO EXPECT
About [45–60] minutes, mostly on your back, draped. The touch is gentle and very relaxing.

HOW LONG IT LASTS
Effects vary. After surgery, sessions are often booked as a series on your surgeon's timeline.

POSSIBLE EFFECTS AND RISKS

- Needing to urinate more often for a few hours
- Mild tenderness over healing or swollen areas
- Skin irritation from oil, lotion or garments
- Feeling tired, thirsty or light-headed afterward
- Swelling that changes from day to day
- Fluid shifts that can strain the heart or kidneys

Massage therapists don't diagnose or treat conditions. This work supports, never replaces, your medical care.

Quick health check

- Fever or infection, last 24 hrs
- Congestive heart failure
- Lymphedema
- High or low blood pressure
- Unexplained swelling
- Cellulitis
- Kidney failure or disease
- Aneurysm
- Thyroid condition
- Blood thinners
- Blood clot (DVT), now or past
- Active cancer or treatment
- Recent surgery
- Past radiation treatment
- Pregnant

☐ **None of these apply to me** or list any that do: _____

TODAY'S SESSION ☐ Wellness drainage ☐ Post-surgical ☐ Face & neck ☐ Full body

After surgery: Procedure _____ Surgery date _____ ☐ Surgeon clearance on file

Please initial each statement

	Initials
I've shared my full health history honestly, including heart, kidney, clotting and cancer history.	
I understand the pressure is very light on purpose. Deeper pressure doesn't work better here.	
After surgery, my surgeon's written clearance is on file and I'll follow their compression advice.	
I understand incisions, drains and fresh scars are worked around, never pressed on.	
I'll speak up right away if I feel dizzy, short of breath, in pain or unwell, so we can stop.	
I understand results vary, and this session doesn't diagnose, cure or replace medical care.	
Deposits, fees and cancellations follow [Your Business Name] policy.	
Before and after photos for my private record are OK. Social media use only with my separate OK.	

By signing, I confirm I am 18 or older (or have parent or guardian consent per [your policy and local law]), have read this form, had my questions answered, and consent to manual lymphatic drainage as checked above.

CLIENT SIGNATURE _____ DATE _____ THERAPIST · LICENSE # _____ DATE _____

PRACTITIONER PROTOCOL

Lymphatic Drainage

Offer MLD only with training; post-surgical work needs specific training and surgeon clearance. Check your state board rules.

SCREEN

No fever or infection in 24 h, cellulitis, DVT, heart failure, kidney failure or aneurysm. Active cancer: oncologist OK.

CHECK

Post-op: clearance on file, days since surgery, garment, drains. Unmanaged lymphedema: refer to a certified lymphedema therapist.

PRE-SESSION SENT

Bring your surgeon's clearance and compression garment. Use the restroom before you start.

SET UP FIRST ☐ Clearance letter on file ☐ Fresh linens, bolsters, pillows ☐ Hands washed, nails short ☐ Gloves near incisions ☐ Little or no oil ☐ Garment, towels, water

#	STEP	TIME	HOW
1	**Consult & screen**	10 min	Confirm health changes. Post-op: procedure, date, days since surgery.
2	**Consent & clearance**	5 min	Consent signed, surgeon clearance on file. Before photos if agreed.
3	**Position**	3 min	Supine, head and knees supported. Side-lying for back or flanks.
4	**Breathing**	2 min	Slow belly breaths to begin. No abdominal pressure after surgery.
5	**Neck & clavicles**	5 min	Light stationary circles above the collarbones to open the pathway.
6	**Clear nodes**	5 min	Axillary, then inguinal nodes as needed. Skin stretch only, no glide.
7	**Drain toward nodes**	[15–25] min	Near areas first, then farther out. Slow, rhythmic strokes toward nodes.
8	**Around incisions**	[ ] min	Stay [2–3 cm] clear of incisions and drains. Skip firm, hot or red areas.
9	**Finish**	5 min	Repeat node and collarbone strokes. Sit client up slowly.
10	**Garment**	5 min	Help client into compression as the surgeon advised. Smooth, no folds.
11	**Aftercare & rebook**	5 min	Review sheet and card. Rebook on the surgeon's timeline.

ENDPOINT AND SAFETY

- Pressure just enough to stretch skin, no redness
- Never over incisions, drains or hard, hot tissue
- Always work toward nodes, nearer areas first
- Follow the surgeon's plan; stay within your training

IF SOMETHING GOES WRONG

- Dizzy or faint: stop, lay client flat, raise legs.
- One calf painful, swollen or warm: stop, urgent care.
- Hard, warm or spreading red swelling: don't work it.
- Shortness of breath or chest pain: stop, call 911.
- Incision leaking or opening: gloves, gauze, call surgeon.
- Fever or chills: end the session, refer to a physician.

Note any concern on the record, tell the client to contact their surgeon, and write an incident report.

AFTERCARE

After Lymphatic Drainage

Gentle lymphatic work keeps your body busy for a few hours after you leave. Here's what's normal, what helps, and when to call.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
Today first hours	Needing to urinate more often. Feeling relaxed, sleepy or thirsty.	Drink water and rest. Wear compression exactly as your surgeon advised.	Hot tubs, saunas and heavy exercise. Alcohol tonight.
Days 1–3 settling in	Swelling may ease, then vary day to day. Mild tenderness can happen.	Take gentle walks. Keep incisions clean and dry as your surgeon directs.	Taking compression off early. Pressing or rubbing firm areas yourself.
Ongoing between visits	Changes are gradual. Some days feel puffier than others, especially when warm.	Follow your surgeon's plan. Light movement, rest and regular meals.	Skipping follow-up visits with your surgeon or doctor.
[Interval] next visit	Sessions are often booked as a series. Results vary for everyone.	Book as planned. Tell me about new symptoms, medications or surgeon advice.	Waiting it out if swelling suddenly gets worse. Call instead.

After surgery

Your surgeon's instructions come first. If anything on this page differs from what your surgeon told you, follow your surgeon and let me know so we can adjust your sessions.

GOOD TO KNOW

- Extra bathroom trips are normal and expected
- This work moves fluid; it doesn't "flush toxins"
- Raising your legs can ease leg swelling
- The pressure is light on purpose; deeper isn't better
- Garments should feel snug, never painful or numbing
- Results build over a series and vary person to person

Rest up

Give your body a quiet few hours after.

Sip water

Thirst after a session is common.

Keep moving

Short, gentle walks help fluid move.

Garment on

Wear compression as your surgeon advised.

CALL YOUR SURGEON OR DOCTOR RIGHT AWAY IF YOU NOTICE

- Fever or chills
- Fluid or pus leaking from an incision
- Redness that spreads, or warm, hard swelling
- Pain, swelling or warmth in one calf or leg

Shortness of breath or chest pain: call 911 right away.

Please let me know too, so we can pause sessions until you're cleared.

YOUR COMPRESSION PLAN _____

SURGEON'S PHONE _____

YOUR NEXT SESSION _____

GETTING READY

Before Your Massage

For relaxation, deep tissue, prenatal, hot stone, cupping and lymphatic sessions. A little prep helps you relax and get the most from your time.

YOUR LOGO

NAME

APPOINTMENT DATE & TIME

SERVICE

1 week
before

Tell me about changes: new medications, an injury, surgery or pregnancy.

Fill in your intake form ahead of time if I've sent one.

New tattoo, Botox or fillers? Let me know so we can work around those areas.

Think about what you'd like: areas to focus on, areas to skip, pressure.

Day before
your session

Hydrate well. Water helps you feel comfortable on the table.

Skip alcohol the day before and the day of your session.

Sensitive skin? Avoid shaving or waxing right before; oil can sting fresh skin.

Go easy on the sun; sunburned skin can't be massaged.

Day of
your appointment

Eat lightly about 1 hour before, not a big meal.

Arrive 10 minutes early to settle in and update your health form.

Use the restroom first, and leave jewelry at home.

Skip heavy perfume; scents linger in the room for others.

Prenatal

· Tell me how many weeks along you are.

· High-risk pregnancy? Bring your provider's clearance [policy].

· You'll rest side-lying with pillows for support.

· Bring water and a snack.

Post-op lymphatic

· Bring your surgeon's written clearance.

· Wear or bring your compression garment.

· Know your surgery date and any drains.

· Expect to need the restroom after.

Hot stone & cupping

· Diabetes, neuropathy, heat sensitivity or blood thinners? Tell me first.

· Cupping marks can last [3–10] days; plan around events.

· No stones or cups on sunburn or new tattoos.

· Too hot? Say so right away.

PLEASE TEXT TO RESCHEDULE IF YOU HAVE

· A fever, cold, flu or other contagious illness

· A contagious skin rash or infection

· Recent surgery without your doctor's OK

· A new injury in the last [48–72] hours

· Sunburn on the areas to be massaged

· Felt unwell or dizzy today

One calf swollen, red, warm or painful? Don't come in. It can be a blood clot; get medical care today.

I ask for [24] hours' notice. If it's about your health or safety, just text. We'll find a new time together.

What to expect

You'll undress to your comfort level in private and rest under a sheet. Only the area being worked is uncovered. I'll check in on pressure, and you can speak up, stay clothed or stop at any time.

PLEASE ARRIVE BY

BRING WITH YOU

NOTES FOR YOU

AFTERCARE · SELF-CARE GUIDE

Your Self-Care Guide

Simple ways to feel good between sessions: after-massage care, gentle stretches, heat or ice, and when to call a doctor.

YOUR LOGO

After your massage

The rest of today

REST
Take it easy. Skip hard workouts for [24] hours after deep work.

WARM BATH
A warm bath or shower helps muscles stay relaxed.

MOVE GENTLY
A short walk and easy stretches ease stiffness.

WATER
Sip water if you're thirsty. It simply helps you feel good.

SORE TOMORROW?
Mild soreness for 24–72 hours is common after deeper work.

Gentle stretches

Hold 20–30 seconds, breathe

NECK SIDE STRETCH
Sit tall and tip one ear toward your shoulder. Keep shoulders down.

DOORWAY CHEST
Forearms on a door frame, then step through until your chest opens.

SEATED HAMSTRING
Sit on a chair edge, one heel out, and hinge forward from your hips.

CAT-COW
On hands and knees, slowly round your back, then let it gently dip.

NEVER STRETCH INTO PAIN
A gentle pull is right. Sharp pain or tingling means ease off.

Heat or ice?

A simple guide

HEAT
For tight, stiff muscles. Warm, not hot, for 15–20 minutes.

ICE
For a new bump or swelling. Wrap it; 10–15 minutes at a time.

SKIP BOTH
Numb skin, diabetes or poor circulation? Ask your doctor.

NOT SURE?
Choose what feels better, and always use a cloth barrier.

WHEN TO REBOOK
Every [2–4] weeks for upkeep; sooner for a specific concern.

Posture at your desk

Screen height
Top of the screen at eye level.

Sit back
Feet flat, low back supported.

Soft shoulders
Elbows in, shoulders relaxed.

Move often
Get up every 30–60 minutes.

THIS IS NORMAL

- Mild soreness or tenderness for 24–72 hours
- Feeling sleepy, relaxed or a little thirsty
- Light redness that fades within hours
- A small, faint bruise that fades in days
- Feeling emotional after a session
- Old aches feeling noticeable for a day

CALL YOUR DOCTOR IF YOU NOTICE

- A bruise that grows, or is very painful
- Numbness or tingling that doesn't go away
- Soreness that gets worse after 3 days
- A rash or itching from oil or lotion
- A headache or dizziness that won't ease
- Swelling in a joint, or pain with fever

Get urgent care for pain, swelling, warmth or redness in one calf or leg. It can be a blood clot.

Call 911 for chest pain, sudden shortness of breath, or trouble breathing.

YOUR NEXT SESSION

STRETCHES FOR YOU

NOTES

PRACTITIONER REFERENCE

Pressure & Endangerment Guide

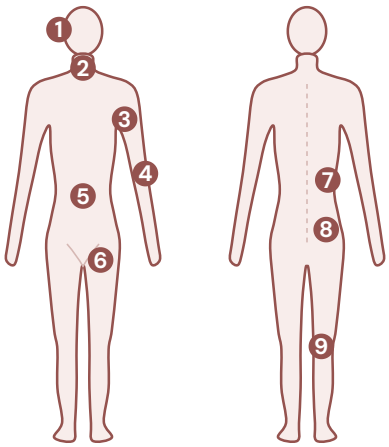

Work within comfort and protect vulnerable areas.

Pressure scale

LEVEL	FEEL	TYPICAL USE	CLIENT CUE WORDS
1 · Very light	Skin surface; slow glide	Lymphatic work, fragile skin, bony areas	"Barely there"
2 · Light	Soothing; muscles stay soft	Relaxation, prenatal, older or frail clients	"Gentle," "relaxing"
3 · Moderate	Firm but comfortable	Most Swedish sessions; warming tissue	"Just right," "firm"
4 · Firm	Deep; a "good hurt"	Deep tissue, sports, specific tight areas	"Good pressure"
5 · Very firm	Near the client's limit	Brief, targeted work only; check in often	"That's my max"

Check in often. A "good hurt" is fine; sharp, burning or radiating pain means stop.

Endangerment sites

1. **Eyes & ears.** No pressure on the eyeball or into the ear canal.
2. **Anterior neck.** Carotid, jugular, trachea. No deep or sustained pressure.
3. **Axilla.** Brachial plexus, axillary vessels, nodes. Light only.
4. **Inner elbow.** Cubital fossa: median nerve, brachial artery. Light only.
5. **Abdomen.** Aorta. No deep pressure; move away if you feel a pulse.
6. **Femoral triangle.** Femoral artery, vein, nerve. Avoid deep pressure.
7. **Kidney area.** Below the 12th rib. No tapotement or deep pressure.
8. **Sciatic notch.** Sciatic nerve. Ease off if pain or tingling radiates.
9. **Posterior knee.** Popliteal vessels and nerve. Light only.

> Pulse, numbness, tingling or sharp pain? Ease off and move away.

Modalities compared

MODALITY	PRESSURE	LENGTH	KEY CAUTIONS
Swedish	2–3	60 / 90 min	Tenderness for 24–48 h can happen.
Deep tissue	3–5	60 / 90 min	Blood thinners, osteoporosis, acute injury. Soreness 24–72 h.
Sports	2–5	30–90 min	Pre-event brief and brisk; post-event light. Skip acute injuries.
Prenatal	1–3	60 min	Side-lying after ~20 wk; light legs; no deep abdominal work.
Hot stone	2–3	75–90 min	~120–130°F [per maker]. Avoid neuropathy, heat sensitivity.
Cupping	2–4	30–60 min	No blood thinners, fragile skin or large vessels. Marks [3–10] days.
Lymphatic	1	45–60 min	Screen fever, DVT, CHF, kidney failure. Surgeon OK post-op.

OILS, LOTIONS & MEDICATIONS

- **Ask about nut allergies** (almond oil and others).
- Keep a nut-free, fragrance-free option on hand.
- Essential oils diluted [1–2%]; minimal in pregnancy.
- Pain meds, muscle relaxants dull feedback: go lighter.
- Blood thinners bruise easily; steroids thin the skin.
- Pump-dispense oils and lotions; never double-dip.

Scope. Massage therapists don't diagnose. Refer when in doubt, and check your state board rules.

[1] Reschedule once well and fever-free [24] h.
[2] No session until resolved or cleared.
[3] Avoid the area 48–72 h; no heat on it.
[4] Work around it; new tattoos [2–4] weeks.
[5] Avoid treated areas for [24 h–2 weeks].
[6] No pressure or cups directly over veins.
[7] Calf swollen, red, warm, painful: urgent care.
[8] Physician clearance; light pressure on legs.
[9] Lighter pressure only; no deep work or cups.
[10] Physician input first; no heat. Rise slowly.
[11] Physician input first. CHF: no lymphatic work.
[12] Physician input. Kidney failure: no lymphatic.
[13] Physician clearance; avoid the incision area.
[14] Surgeon clearance and specific training.
[15] Oncologist input; avoid tumor, radiation sites.
[16] Gentle pressure; no cups over bony areas.
[17] Less sensation: lighter, no heat; skip injection sites.
[18] [Many start after 1st trimester.] High-risk: clearance.
[19] Pacemaker, port, pump: avoid the area.
[20] End the session [charged per policy].
[21] Guardian consent and present [policy].

Conservative defaults; check your state board rules. Physician advice and state rules come first. When unsure, refer.

AFTERCARE

Swedish & Relaxation

Today

take it slow

DO

· Sit up slowly and take your time
· Drink water if you're thirsty
· Warm bath or shower tonight
· Gentle stretching and a short walk

AVOID

· Driving while you still feel groggy
· Hard workouts straight after
· Alcohol for the rest of today
· Pressing hard on tender spots

Mild tenderness can last **24–48 hours**. Book again in [2–4] weeks. **Next visit:** [date]

CALL ME IF

Numbness or tingling that won't fade · bruising that spreads · one calf swollen, red or painful: see your doctor. Chest pain or short of breath: call 911.

Questions? Text [Phone] [Your Business Name]

AFTERCARE

Deep Tissue & Sports

Next 24–72 hours

soreness is normal

DO

· Sit up slowly and take your time
· Ice or heat, whichever feels better
· Gentle stretching and walking
· Drink water if you're thirsty

AVOID

· Heavy training for [24] hours
· Pressing on or rolling bruises
· Alcohol and hot tubs tonight
· Pushing through sharp pain

Soreness or light bruising can last **1–3 days**. **Next visit:** [date]

CALL ME IF

Numbness or tingling that won't fade · bruising that spreads · one calf swollen, red or painful: see your doctor. Chest pain or short of breath: call 911.

Questions? Text [Phone] [Your Business Name]

Aftercare cards · 4 × 6 in · cut along the dotted lines

AFTERCARE

Prenatal Massage

Today & tonight

rest and rise slowly

DO

· Roll to your side to sit up
· Rest, sip water, have a snack
· Sleep on your side with pillows
· Warm, not hot, showers
· Tell your provider about massage

AVOID

· Hot tubs, saunas, hot baths
· Lying flat on your back for long
· Deep rubbing on calves or inner legs
· Jumping up quickly
· Strong essential oils

Next visit in [2–4] weeks: _____

CALL YOUR PROVIDER IF

Bleeding or leaking fluid · contractions · severe headache or vision changes · sudden swelling · calf pain. **911** for chest pain or trouble breathing.

Questions? Text [Phone] [Your Business Name]

AFTERCARE

Hot Stone Massage

Today

pinkness fades in hours

DO

· Sip water and rise slowly
· Loose clothes, lukewarm shower
· Check your skin tonight
· Rest and stretch gently

AVOID

· Hot tubs, saunas and sun today
· Heating pads on warm skin
· Ice directly on your skin
· Popping any blister

Burn or blister? Cool running water for **20 minutes**, then call me. **Next visit:** [date]

CALL ME IF

A blister, or white, shiny or painful skin · redness still there tomorrow · dizziness that doesn't pass. Trouble breathing or chest pain: call 911.

Questions? Text [Phone] [Your Business Name]

Aftercare cards · 4 × 6 in · cut along the dotted lines

AFTERCARE

Cupping Therapy

First 24 hours

marks are normal

DO

· Keep marked areas warm and covered
· Rest; drink water if you like
· Warm showers and gentle stretching
· Clothing or sunscreen over marks

AVOID

· Hot tubs, saunas and cold plunges
· Intense exercise for [24] hours
· Sun on marked skin
· Scratching, scrubbing or picking marks

Marks usually fade in about **[3–10] days**; rebook once they have. **Next visit:** [date]

CALL ME IF

Blisters or broken skin · worsening pain · marks still dark after [2] weeks. **See a doctor** for pus, spreading redness or fever.

Questions? Text [Phone] [Your Business Name]

AFTERCARE

Lymphatic Drainage

First 24 hours

extra bathroom trips are normal

DO

· Drink water and rest
· Wear compression as your surgeon advised
· Take short, gentle walks
· Keep incisions clean and dry
· Follow your surgeon's plan first

AVOID

· Hot tubs and saunas today
· Heavy exercise for [24] hours
· Taking compression off early
· Pressing on firm or swollen areas
· Alcohol tonight

Next session in [ ] days: _____

CALL YOUR SURGEON OR DOCTOR IF

Fever · spreading redness · warm, hard swelling · incision leaking · one calf painful or swollen. **Short of breath: call 911.**
