Chemical Service Consent

CLIENT NAME

BIRTH DATE

DATE

CHEMICAL SERVICE(S) I'M CONSENTING TO

WHAT THIS COVERS
Color, lightening, toner, keratin and smoothing, perms and relaxers.

PRODUCTS USED
Color, developer, lightener, and waving, smoothing or relaxing solutions.

BEFORE WE START
An allergy alert test before color, and a strand test if your history calls for it.

Possible risks

Allergic reaction. Itching, swelling or rash on scalp, face or neck, even after years of safe use.

Scalp irritation or burn. Tingling is common; burning is not. Speak up right away.

Breakage or damage. Dry, weak or stretchy hair, most often on hair processed before.

Hair history reactions. Box dye, henna or metallic dyes can react with peroxide and break hair.

Fumes. Some products, especially smoothing ones, can irritate eyes, nose and lungs.

Unexpected result. Your hair's history and porosity can make results differ from photos.

More than one visit. Big changes and color correction may take several sessions.

Fading and change. Color fades and shifts with washing, sun, chlorine and heat.

Product in the eyes. Flushed with cool water. Seek care if pain or blurry vision lasts.

Hair loss or thinning. Rare; possible with over-processing, tension or a health condition.

Results depend on your hair's history, porosity and condition, your health and medications, and your aftercare. Pregnant, breastfeeding, or have a scalp or medical condition? Check with your physician first.

Smoothing note: some smoothing products release formaldehyde when heated, even some labeled "formaldehyde-free." Ask what we use.

Please initial each statement

	Initials
I've read the risks above and had my questions answered. No specific result has been promised to me.	
My health and hair history are true and complete, including box dye, henna and past chemical services.	
I've had an allergy alert test (or signed the waiver), and I agree to a strand test when recommended.	
I'll tell my stylist right away if anything burns, stings or feels wrong during the service.	
I approved the service plan, formula goal and price before the service started.	
I'll follow aftercare and contact you, and a healthcare provider, if signs of a reaction appear.	
I release [Your Business Name] from claims from details I withheld or aftercare I skipped, per [State] law.	
I am 18 or older (or my guardian signs below), not under the influence, and signing of my own free will.

Allergy Alert & Strand Test

YOUR LOGO

CLIENT NAME | PHONE | PLANNED SERVICE

KNOWN ALLERGIES, INCL. ANY BLACK HENNA TATTOO | APPOINTMENT DATE

WHY WE TEST

Most hair colors contain PPD, PTD or related dyes, and allergy can develop at any time, even after years of safe use. We test [48 hours] before every color service, or as the manufacturer directs. A strand test shows how your hair lifts and holds up, and is a must if box dye, henna or "progressive" dye may be present.

Allergy alert test

Brand · shade	Developer	Lot #	Test area	Date · time	Applied by

Check	None	Redness	Itching	Swelling	Blisters	Notes · date · checked by	Initials
After 48 hrs	☐	☐	☐	☐	☐		

RESULT ☐ Clear to proceed ☐ Retest with a different product ☐ Do not color; see a doctor

Strand test

Formula: brand · shade · developer · ratio	Time	Lift or result	Hair condition after

STRAND RESULT ☐ Strong ☐ Slight stretch ☐ Gummy or breaking ☐ Heat, fizz or smoke

PLAN ☐ Proceed as planned ☐ Adjust formula or plan ☐ Do not proceed

I consent to these tests. If the spot burns, blisters or itches badly, I'll rinse it and call [Phone]. For trouble breathing or face or throat swelling, I'll call 911.

CLIENT SIGNATURE | DATE | STYLIST INITIALS

or

I decline testing

☐ Allergy alert test ☐ Strand test

I was offered the test(s) checked above and chose not to have them. I understand an allergy or poor hair reaction may not be found first, and could cause swelling, breakage, an unwanted result or need for medical care. I accept these risks and release [Your Business Name] from related claims as far as [State] law allows.

DEPOSIT · BOOKING · CANCELLATION

Salon Booking Policy

YOUR LOGO

Your appointment is reserved just for you, and color, chemical and extension services can take [3–6] hours. These policies keep things fair for every client and help your hair look its best.

DEPOSIT
[$50] or [25]%
For color, chemical and extension services. Non-refundable; applied to your total.

NOTICE TO CHANGE
[48] hours
To move your appointment and keep your deposit.

GRACE PERIOD
[15] minutes
After that, we may need to shorten or reschedule.

Rescheduling	With [48] hours' notice, your deposit moves once. A second change needs a new deposit.
No-show & late change	Your deposit is forfeited. After [2] no-shows, a full prepayment is needed to book.
Late arrival	After [15] minutes your service may be shortened or rescheduled, and the deposit is forfeited.
Come prepared	Arrive with dry, detangled hair, styled as you usually wear it. Skip hard scrubbing of your scalp for [24–48] hours before color, lightener, perm or relaxer.
Consultation first	Color correction, big color changes and extensions need a consultation before booking. An allergy alert test is done [48 hours] before color.
Pricing	Quotes are estimates. The price may change if your hair's length, density, condition or time needed differs from your booking.
Color adjustments	Not happy with your color? Tell us within [7] days and we'll adjust or refresh it at no charge. Fading from skipped aftercare isn't covered.
Extension hair	Hair is custom ordered for you. Once ordered, hair purchases and deposits are non-refundable. Removal by another salon isn't covered.
Feeling unwell?	Cold, flu, lice or a scalp infection? Tell us as soon as you can and we'll reschedule with no fee.
Refunds	Services can't be refunded once performed. Please ask before bringing guests or children [your policy].

CARD ON FILE FOR DEPOSITS AND FEES, CHARGED ONLY AS DESCRIBED ABOVE

☐ Card saved in [booking system] ☐ I prefer to prepay Never write card numbers on this form.

My deposit is non-refundable, and quotes may change if my hair needs more time or product. ☐

Color concerns must be raised within [7] days. Extension hair is non-refundable once ordered. ☐

By signing, I confirm I've read and agree to this policy, including the non-refundable deposit and adjustment window.

WHAT IT IS
Permanent or demi-permanent color to change or refresh your shade, or to blend or cover gray.

WHAT TO EXPECT
About 1.5 to 3 hours. Results depend on hair history; correction may take more visits.

HOW LONG IT LASTS
Permanent color grows out; roots show in 4 to 8 weeks. Demi and gloss fade over [6–8] weeks.

TODAY'S SERVICE ☐ Permanent ☐ Demi-permanent ☐ Gray coverage ☐ Correction ☐ Gloss

POSSIBLE RISKS AND SIDE EFFECTS

- Itching, redness or burning on the scalp
- Staining on the hairline, ears or neck for a day or two
- Uneven color from past color, box dye or porosity
- Dryness or a change in how your hair feels
- Allergic reaction to the dye, even after years of use
- A shade or tone that differs from the photo you love
- Gray that is resistant and covers less fully
- Fading, especially red and copper tones

Quick health and hair check

- Sores, cuts or sunburn on scalp
- Past reaction to hair dye
- Box dye, henna or metallic dye
- Hair loss, chemo or radiation
- Scalp infection, lice or ringworm
- "Black henna" tattoo, ever
- Relaxer, perm or keratin
- Pregnant or breastfeeding
- Psoriasis or eczema flare on scalp
- Allergy: PPD, PTD or dye
- Isotretinoin or minoxidil
- Asthma or sensitive to fumes

☐ **None of these apply to me** or list any that do: _____

About allergy alert tests. Hair dyes contain PPD, and an allergy can develop at any time. Test [48] hours before every color. Never use hair dye on lashes or brows.

☐ Test done, no reaction
☐ Declined, waiver signed

Please initial each statement

	Initials
I've shared my full health, medication and hair history, including box dye, henna and past chemical services.	
I understand the risks above. My result depends on my hair's history and condition, and isn't guaranteed.	
I'll tell my stylist right away if my scalp burns, stings or itches, or if anything feels unusual.	
A strand test may be needed for big changes or unknown hair history, and I agree to one if advised.	
Color correction may take more than one session and is priced [hourly]. My goal may be reached in stages.	
I'll follow my aftercare. Washing too soon, hot water and box dye at home can change or fade my color.	
Before and after photos for my private record are required. Social media use only with my separate OK.	
Fees follow [Your Business Name] policy. Color concerns within [7] days; no refunds after service.	

By signing, I confirm I am 18 or older with photo ID (or have parent or guardian consent per [your policy and local law]), have read this form, had my questions answered, and consent to the hair color service I checked above.

PRACTITIONER PROTOCOL

Hair Color

Times in [brackets] follow your color line's instructions and never pass its maximum. Check your state board rules.

SCREEN

Intake cleared. Scalp free of sores, infection and sunburn. Full chemical history.

ALLERGY ALERT TEST

[48] hours before every color service, or per the maker. Record result; waiver if declined.

STRAND TEST

For correction or unknown history. Required if box dye, henna or metallic dye is possible.

SET UP FIRST ☐ Hands washed, gloves on ☐ Cape, towel, neck strip ☐ Bowls, brushes, clips ☐ Scale and timer ☐ Color in date, lots noted ☐ Barrier cream, eyewash, SDS

#	STEP	TIME	HOW
1	**Consult**	10–15 min	Assess level, tone, % gray, porosity and history. Agree goal and price.
2	**Consent & photos**	5 min	Consent signed, allergy test result checked. Before photos in good light.
3	**Prep & protect**	5 min	Drape, gloves on. Barrier cream on hairline and ears. Hair dry per label.
4	**Formulate**	5 min	Weigh color and developer: 10 vol to deposit, 20 vol for gray or lift.
5	**Roots & gray**	[ ] min	Regrowth first; resistant gray areas first. Pre-soften if needed.
6	**Mids & ends**	[ ] min	Pull through only if faded. Demi or gloss on lengths avoids banding.
7	**Process**	[ ] min	Timer per manufacturer. No heat unless label allows. Check comfort.
8	**Strand check**	2 min	Wipe a strand: coverage and even tone. Extend only to label max.
9	**Emulsify & rinse**	5 min	Massage with water, rinse until clear. Color-safe shampoo, conditioner.
10	**Finish & photos**	10+ min	Remove any skin stain, style, check the result. Take after photos.
11	**Aftercare & rebook**	5 min	Review aftercare: wait [48–72] hours to wash. Roots in [4–8] weeks.

ENDPOINT AND SAFETY

- Even coverage root to ends; no banding or hot roots
- 40 vol is off-scalp only; never on the scalp
- Gloves for all mixing, applying and rinsing
- Never use hair dye on lashes or brows

IF SOMETHING GOES WRONG

- Color in the eye: flush with cool running water or eyewash for 15 minutes, then seek medical care.
- Hives, swelling or wheezing: stop and rinse out. Call 911 if breathing is affected.
- Too dark or off-tone: don't re-process today. Plan a correction and book a follow-up.
- Burning or itching on the scalp: stop, rinse thoroughly with cool water, and assess before going on.
- Heat, smoke or odor while processing: likely metallic dye. Rinse at once; no more chemicals.
- Later blisters, oozing or swelling: refer to a physician. Report to the maker and FDA MedWatch.

Always write an incident report and check in with the client within 24 to 48 hours.

AFTERCARE

Caring for Your Hair Color

The first few days lock in your color. After that, a few gentle habits keep it rich, shiny and true to tone until your next visit.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
First 72 hours color settles	A little color in the rinse water or on your pillowcase. Any hairline staining fades in a day or two.	Wait [48–72] hours before your first shampoo. If you need to wet your hair, rinse with cool water only.	Shampoo, hot showers, swimming, saunas, heavy sweat, and clarifying or dandruff shampoos.
Weeks 1–2 settling in	Your color looks its richest. Red and copper tones soften a little first; that's normal.	Sulfate-free, color-safe shampoo and conditioner. Wash 2 to 3 times a week in cool water.	Hot tools without heat protectant, chlorine pools, and long hours in the sun without a hat or UV spray.
Weeks 4–8 refresh time	Roots and gray start to show. Demi color and gloss fade; ends may look lighter or warmer.	Book your root touch-up every [4–8] weeks and a gloss or toner refresh every [4–6] weeks.	Box dye or home color between visits. It builds up and can mean a longer, costly correction.
Ongoing keep it healthy	Gentle fading from sun, water and heat over time. Ends get drier and need trims.	Trim every [8–12] weeks. Tell me about new medications, allergies or health changes.	Henna, "progressive" or metallic dyes; they can react badly with salon color.

GOOD TO KNOW

- Hard water and chlorine dull color; a shower filter helps
- Root spray or powder can blend gray between visits
- A weekly hydrating mask keeps ends soft and shiny
- Wet hair and add leave-in before you swim
- Dry shampoo stretches the time between washes
- Use the color-depositing products I recommend

Wait to wash
[48–72] hours before your first shampoo.

Cool water
Hot water opens the cuticle and fades color.

Color-safe
Sulfate-free shampoo and conditioner only.

Protect
Heat protectant and UV spray, every time.

CALL ME RIGHT AWAY IF YOU NOTICE

- Itching, burning or redness on the scalp
- Blisters, oozing or crusting on the scalp
- A rash or swelling at the hairline, ears or neck
- Hair that feels gummy or breaks easily

Swelling of the face, eyes or throat, or trouble breathing: call 911. Severe scalp pain or blistering: get medical care today.

SHAMPOO & CONDITIONER _____

YOUR COLOR FORMULA ON FILE _____

YOUR NEXT VISIT DATE _____

INFORMED CONSENT

Lightening Consent

YOUR LOGO

CLIENT NAME _____ STYLIST _____ DATE _____

WHAT IT IS
Lightener and developer remove natural or artificial pigment. A toner then sets your shade.

WHAT TO EXPECT
About 2 to 5 hours. Going from dark to blonde often takes more than one session.

HOW LONG IT LASTS
Lightened hair stays light until cut. Toner fades in [4–8] weeks; regrowth shows by [8–12].

TODAY'S SERVICE ☐ Foil highlights ☐ Balayage ☐ Global lightening ☐ Toner ☐ Bond builder

POSSIBLE RISKS AND SIDE EFFECTS

- Scalp irritation, burning or a chemical burn
- Over-processing: gummy, stretchy or "melted" hair
- Brassy or warm tones that need toning
- Goal shade may need more than one visit
- Breakage, dryness or rough texture
- Uneven lift, banding or spots
- Allergic reaction to lightener or toner
- More porous hair that fades faster

Quick health and hair check

- Sores, cuts or sunburn on scalp
- Past reaction to hair products
- Box dye, henna or metallic dye
- Hair loss, chemo or radiation
- Scalp infection, lice or ringworm
- "Black henna" tattoo, ever
- Relaxer, perm or keratin
- Pregnant or breastfeeding
- Psoriasis or eczema flare on scalp
- Allergy to lightener or dye
- Isotretinoin or minoxidil
- Asthma or sensitive to fumes

☐ **None of these apply to me** or list any that do: _____

About lifting in stages. Hair passes through red, orange and yellow as it lightens. Your stylist stops when your hair's condition says so, even before your goal.

☐ Strand test done
☐ Strand test declined

Please initial each statement

	Initials
I've shared my full health and hair history honestly, including box dye, henna, relaxers and keratin.	
I understand the risks above. My result depends on my hair's history and condition, and isn't guaranteed.	
I'll tell my stylist right away if my scalp burns, stings or itches at any point during the service.	
Big changes, like dark to blonde, may take [2–3] or more sessions spaced [4–8] weeks apart.	
I had an allergy alert test on [date] for any toner or color, or declined it and signed the waiver.	
I'll follow my aftercare, including purple shampoo, deep conditioning and heat protection.	
Before and after photos for my private record are required. Social media use only with my separate OK.	
Fees follow [Your Business Name] policy. Concerns within [7] days; no refunds after service.	

By signing, I confirm I am 18 or older with photo ID (or have parent or guardian consent per [your policy and local law]), have read this form, had my questions answered, and consent to the lightening service I checked above.

PRACTITIONER PROTOCOL

Lightening & Highlights

Times in [brackets] follow your lightener's instructions and never pass its maximum. Check your state board rules.

SCREEN

Intake cleared. No sores, infection or sunburn on the scalp. Full chemical history on file.

STRAND TEST

Required for box dye, henna, metallic dye or unknown history. Record lift and time.

PRE-CARE SENT

No shampooing or scratching the scalp for [24–48] hours before. Arrive with dry hair.

SET UP FIRST ☐ Hands washed, gloves on ☐ Cape, towels, neck strip ☐ Foils, bowls, brushes ☐ Bond builder, toner ☐ Lightener in date, lots noted ☐ Timer, eyewash, SDS

#	STEP	TIME	HOW
1	**Consult**	10–15 min	Level, history, porosity, elasticity. Agree goal, sessions and price.
2	**Consent & photos**	5 min	Consent signed, strand test result checked. Before photos in good light.
3	**Section**	10 min	Plan placement: foils, balayage panels or global. Clean, clipped sections.
4	**Mix**	5 min	Lightener, developer, bond builder by weight. On-scalp: 20 vol max.
5	**Apply**	[ ] min	Off-scalp foils up to 30–40 vol per label. Virgin global: roots last.
6	**Process**	[ ] min	Never add heat to on-scalp lightener. Keep lightener off the skin.
7	**Check lift**	every 5–10	Wipe a strand: level, evenness, elasticity. Stop at maximum time, always.
8	**Rinse**	5 min	Foils off at the bowl, cool rinse. Gentle shampoo, then bond step.
9	**Tone**	[ ] min	On towel-dried hair per label. Watch closely; porous ends grab fast.
10	**Finish & photos**	10+ min	Condition, heat protectant, style. Check tone in daylight. After photos.
11	**Aftercare & rebook**	5 min	Review aftercare. Toner refresh in [4–8] weeks; book the next lift session.

ENDPOINT AND SAFETY

- Even, clean lift to the target level for the toner
- On-scalp 20 vol maximum; no heat on scalp lightener
- Hair stretches and springs back; elasticity intact
- Never past the lightener's maximum time

IF SOMETHING GOES WRONG

- Lightener in the eye: flush with cool running water or eyewash for 15 minutes, then seek medical care.
- Heat, smoke or odor in a foil: likely metallic dye. Rinse at once and stop all chemicals.
- Hives, swelling or wheezing: stop and rinse out. Call 911 if breathing is affected.
- Scalp burning: stop and rinse thoroughly with cool water. Never let a client push through burning.
- Gummy or stretchy hair: stop, rinse, apply a bond treatment. No more lightener today.
- Later blisters or scabs on the scalp: refer to a physician. Document and report the reaction.

Always write an incident report and check in with the client within 24 to 48 hours.

AFTERCARE

Caring for Lightened Hair

Lightened hair is more porous and thirsty than before. These first weeks matter most for keeping it strong, soft and the tone you love.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
First 72 hours toner settles	Hair may feel a little drier. Tone may look slightly deep at first and soften with washing.	Wait [48–72] hours before shampooing. Detangle gently from the ends up with a wide-tooth comb.	Hot water, swimming, saunas, clarifying shampoo, and tight elastics on damp hair.
Weeks 1–2 settling in	Tone is at its best. A little warmth may start to show in sunlight; that's normal.	Purple or blue shampoo [1–2] times a week. A weekly deep conditioner and bond-repair treatment.	Hot tools without heat protectant, and leaving purple shampoo on longer than the label says.
Weeks 4–8 toner refresh	Toner fades and brassy or yellow tones show. Regrowth appears at the roots.	Book a toner refresh every [4–8] weeks. Plan your next session if we are lifting in stages.	Box dye, home bleach or toner kits. They can cause breakage and patchy color.
Ongoing keep it strong	Ends dry out and split faster than unlightened hair. Wet hair stretches more.	Trim every [8–12] weeks. Leave-in conditioner, heat protectant and a silk pillowcase.	Chlorine and salt water without protection, and henna or metallic dyes.

GOOD TO KNOW

- Wet hair and add leave-in before you swim
- Hard water can make blonde look dull or brassy
- Be gentle when hair is wet; it's at its weakest
- A swim cap and clarifying rinse help with chlorine
- UV spray or a hat helps keep your tone cool
- Keep hot tools at [300–350°F] or lower

Purple wash
[1–2] times a week to keep brass away.

Deep condition
A weekly mask or bond-repair treatment.

Heat protect
Before every blow-dry, iron or wand.

Pool prep
Wet hair and add leave-in before you swim.

CALL ME RIGHT AWAY IF YOU NOTICE

- Itching, burning or redness on the scalp
- Hair that feels gummy, stretchy or snaps
- Tender spots, blisters or scabs on the scalp
- A rash or swelling at the hairline, ears or neck

Swelling of the face, eyes or throat, or trouble breathing: call 911. Severe scalp pain or blistering: get medical care today.

YOUR TONER FORMULA ON FILE _____

YOUR NEXT VISIT DATE _____

CLIENT FORM · INFORMED CONSENT

Keratin & Smoothing Consent

YOUR LOGO

CLIENT NAME _____ STYLIST _____ DATE _____

WHAT IT IS
A smoothing product is applied, dried in and sealed with a flat iron to cut frizz and speed up styling.

WHAT TO EXPECT
About [2–4] hours, depending on your hair's length and density. Heat and fumes are part of it.

HOW LONG IT LASTS
Usually [2.5–5] months, fading gradually with washing. It is not a permanent straightener.

POSSIBLE RISKS AND SIDE EFFECTS

- Eye, nose, throat or lung irritation from fumes
- Dryness, brittleness or breakage
- Less curl, wave or volume than before
- Color fading or a tone shift on colored hair
- Scalp redness, itching or a burning feeling
- Uneven smoothing or patchy results
- Allergic reaction to an ingredient, even later
- Headache or feeling unwell from strong odor

About fumes and formaldehyde. Many smoothing products contain or release formaldehyde when heated, including some labeled "formaldehyde-free." Formaldehyde is a known human carcinogen and can irritate the eyes, nose, throat and lungs. We use [product name] with ventilation; its Safety Data Sheet is yours to read. Pregnant, breastfeeding, or asthma, lung or eye issues? Ask your physician first.

Initials _____

Quick health and hair check

- Pregnant or breastfeeding
- Scalp infection, ringworm or lice
- Chemotherapy or radiation, recent
- Box dye, henna or lightener
- Asthma, lung or eye condition
- Psoriasis or eczema flare on scalp
- Alopecia or unusual shedding
- Isotretinoin or new medication
- Scalp cuts, sores or sunburn
- Allergy to a product ingredient
- Relaxer, perm or past keratin
- Very damaged or fragile hair

☐ **None of these apply to me** or list any that do: _____

Please initial each statement

	Initials
I've shared my full health and hair history honestly, including box dye, henna and past chemical services.	
I understand the risks above. Results depend on my hair and the product used, and aren't guaranteed.	
I'll speak up right away if my eyes, nose, throat or chest feel irritated, or my scalp stings or burns.	
I had a strand test on [date], or I declined it and signed the waiver. Hair with unknown history may react.	
I'll follow my aftercare, including [no washing, ponytails or clips for 0–72 hours] if my product requires it.	
I understand color should be done before this service or wait [2 weeks] after it, per the product.	
Before and after photos for my private record are required. Social media use only with my separate OK.	
Deposits and fees follow [Your Business Name] policy. Price may change if length or density differs.	

By signing, I confirm I am 18 or older (or have parent or guardian consent per [your policy and local law]), have read this form, had my questions answered, and consent to a keratin or smoothing treatment with [product name].

CLIENT SIGNATURE _____ DATE _____ STYLIST SIGNATURE · LICENSE # _____ DATE _____

PRACTITIONER PROTOCOL

Keratin & Smoothing Treatment

Times, temperatures and passes in [brackets] follow your product's instructions. Check OSHA and your state board rules.

SCREEN

Intake cleared. No broken scalp, infection or lice. Pregnancy and asthma discussed.

STRAND TEST

Required for box dye, henna, lightened or unknown history. Waiver if declined.

PRE-CARE SENT

Color done [2 weeks] before, or after, per product. Arrive with no oils or styling products.

SET UP FIRST ☐ Ventilation or local exhaust on ☐ SDS read and on hand ☐ Nitrile gloves, cape, towels ☐ Flat iron set to [ ]°F ☐ Bowl, brush, clips, fine comb ☐ Product in date, lot noted ☐ Eyewash access, timer

#	STEP	TIME	HOW
1	**Consult & screen**	10 min	Confirm health changes. Note hair history, porosity, curl pattern, scalp.
2	**Consent & photos**	5 min	Consent with fumes disclosure signed. Before photos, even light.
3	**Clarify**	10 min	Clarifying shampoo [1–3] times, per product. No conditioner.
4	**Pre-dry & section**	15–30 min	Blow-dry to [80–100]% dry per product. Section into [4–8].
5	**Apply**	20–40 min	Gloves on. Thin sections, [1/4–1/2] in off the scalp. Comb out excess.
6	**Process**	[ ] min	Leave on per product. Clip loosely. Keep ventilation running.
7	**Blow-dry**	20–30 min	Dry completely on [medium] heat. Hair must be 100% dry before ironing.
8	**Flat iron**	30–60 min	[ ]°F per product. [5–10] slow passes on thin sections.
9	**Rinse (if required)**	[ ] min	Rinse today or after [24–72] hours, per product.
10	**Photos & aftercare**	10 min	After photos. Review sheet, card, shampoo. Rebook in [2.5–5] months.

ENDPOINT AND SAFETY

- Smooth, shiny, flexible hair with no residue
- Lightened, fine or fragile hair: lower heat
- Gloves for applying and ironing; air moving
- Never on broken scalp or untested box dye

Many products release formaldehyde when heated, even some labeled “free.” OSHA's formaldehyde standard applies. FDA's planned ban is not final: check current FDA and state rules.

IF SOMETHING GOES WRONG

- Product in the eye: flush with eyewash for 15 minutes, then seek eye care.
- Coughing or wheezing: stop, fresh air. Call 911 if breathing is affected.
- Iron burn: cool running water 10–20 minutes, no ice. Refer if it blisters.
- Watery, stinging eyes from fumes: stop ironing, fresh air, more ventilation.
- Scalp burning: stop, rinse with cool water for 15–20 minutes, assess.
- Breakage or gummy hair: stop that section, lower heat, never re-process.

Always write an incident report and check in with the client within 24 to 48 hours.

AFTERCARE

Caring for Smoothed Hair

The first [72 hours] let your treatment set. After that, gentle products and heat protection keep hair smooth for [2.5 to 5] months.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
First 72 hours treatment is setting	Hair looks very sleek and may feel a little coated. A faint product smell can linger.	[No washing or wetting for 0–72 hours], per your product. Keep hair loose.	[Ties, clips, tucking behind ears], hats, sweat, steam and swimming.
Weeks 1–2 settling in	Hair relaxes a little after the first washes and air-dries with much less frizz.	Use a sulfate- and salt-free shampoo in cool or lukewarm water.	Color or lightening for [2 weeks]. Chlorine, salt water and clarifying shampoos.
Months 1–3 enjoy it	Smoothness slowly softens as the treatment washes out and new growth comes in.	Heat protectant before hot tools. Deep condition [weekly].	Sulfates and salt-based products. Washing more often than you need to.
When to rebook next visit	Frizz and natural texture return, usually around [2.5 to 5] months. That's normal.	Book your next treatment. Tell me about any new color, medication or health changes.	Treating again too soon, which can dry and weaken hair.

GOOD TO KNOW

- Hair can look flatter than usual for a few days
- The right shampoo makes results last longer
- A silk or satin pillowcase cuts down on friction
- Color before your treatment, or wait [2 weeks]
- A kink from a tie can set in early, so keep it loose
- Swimming? Wet hair and add leave-in first
- Results vary with hair type and product used
- Styling time is usually much shorter now

Stay dry
No water for [0–72] hours, per product.

Keep it loose
No ties or clips for [0–72] hours.

Right shampoo
Sulfate- and salt-free only.

Protect it
Heat protectant, every time.

CALL ME RIGHT AWAY IF YOU NOTICE

- Scalp itching, a rash or bumps
- Blistering, oozing or crusting on the scalp
- Redness or burning that gets worse, not better
- Unusual breakage or shedding

Eye pain or any change in your vision: get urgent eye care today. Trouble breathing, or swelling of the face or throat: call 911.

SHAMPOO TO USE _____

FIRST WASH AFTER _____

YOUR NEXT TREATMENT _____

CLIENT FORM · INFORMED CONSENT

Permanent Wave Consent

YOUR LOGO

CLIENT NAME _____ STYLIST _____ DATE _____

WHAT IT IS
A waving lotion reshapes hair around rods, then a neutralizer locks in the new curl.

WHAT TO EXPECT
About [2–3] hours. A test curl checks the timing. Expect a strong smell during the service.

HOW LONG IT LASTS
Usually [3–6] months, relaxing gently as hair grows. Trims every [8–12] weeks help.

POSSIBLE RISKS AND SIDE EFFECTS

- Frizz or over-processing, more so on lightened hair
- Dryness, breakage or split ends
- Scalp redness, stinging or irritation
- Color fading or a tone shift on colored hair
- A weaker or looser curl than you hoped for
- Uneven curl from roots to ends
- Allergic reaction to the lotion or neutralizer
- A perm smell for a few days, worse when wet

About relaxed and lightened hair. Hydroxide relaxers and perm solutions don't mix; perming relaxed hair can cause severe breakage. Lightened or damaged hair needs a strand test first, and your stylist may advise against a perm.

- ☐ Never relaxed
- ☐ Relaxed or not sure

Quick health and hair check

- Pregnant or breastfeeding
- Psoriasis or eczema flare on scalp
- Alopecia or unusual shedding
- Lightener, highlights or balayage
- Thyroid or hormone changes
- Scalp cuts, sores or sunburn
- Allergy to perm or color products
- Relaxer, now or in the past
- Keratin or smoothing treatment
- Asthma or sensitivity to odors
- Scalp infection, ringworm or lice
- Chemotherapy or radiation, recent
- Box dye, henna or metallic dye
- Isotretinoin or new medication
- Very damaged or fragile hair

☐ **None of these apply to me** or list any that do: _____

Please initial each statement

	Initials
I've shared my full health and hair history honestly, including relaxers, box dye, henna and lightener.	
I understand the risks above. Curl results depend on my hair's condition and aren't guaranteed.	
I'll speak up right away if my scalp stings, burns or itches, or solution runs toward my eyes.	
I agree to a test curl, plus a strand test on [date] if my hair is lightened, damaged or of unknown history.	
I'll keep my hair dry and loose for [48–72] hours. Wetting or tying it too soon can relax the curl.	
I understand color should wait [2 weeks] after my perm, or be done before it, per the product.	
Before and after photos for my private record are required. Social media use only with my separate OK.

CLIENT SIGNATURE _____ DATE _____ STYLIST SIGNATURE · LICENSE # _____ DATE _____

PRACTITIONER PROTOCOL

Permanent Wave

Times and rod sizes in [brackets] follow your wave system's instructions and the client's hair. Check your state board rules.

SCREEN

Intake cleared. Never over a hydroxide relaxer. No broken scalp, infection or lice.

STRAND TEST

Required for lightened, damaged, box dye, henna or unknown history. Waiver if declined.

PRE-CARE SENT

No shampoo or scratching the scalp for [24–48] hours. Color [2 weeks] before or after.

SET UP FIRST ☐ Gloves, cape, towels ☐ Rods, end papers, picks ☐ Cotton coil, barrier cream ☐ Applicator bottles, clips ☐ Lotion, neutralizer, lots noted ☐ Ventilation, eyewash, timer

#	STEP	TIME	HOW
1	**Consult & screen**	10 min	Confirm health changes. Note hair history, porosity, texture, density.
2	**Consent & photos**	5 min	Consent signed, relaxer history confirmed. Before photos, even light.
3	**Shampoo**	5 min	Gentle shampoo, no scalp scrubbing. Towel-blot. No conditioner.
4	**Section & wrap**	30–60 min	Rods and pattern per the chart. Even tension, smooth end papers.
5	**Protect**	5 min	Barrier cream on hairline and ears. Cotton coil around the wrap.
6	**Apply lotion**	[ ] min	Alkaline or acid wave per manufacturer. Saturate rods evenly.
7	**Test curl**	[ ] min	Every [ ] min, unwind 1.5 turns at front, crown and nape. Look for a firm S.
8	**Rinse & blot**	[ ] min	Rinse thoroughly with warm water. Towel-blot every rod well.
9	**Neutralize**	[ ] min	Neutralizer on every rod. Process per label, remove rods, rinse.
10	**Finish & aftercare**	10 min	Diffuse or air-dry. After photos. Review sheet and card.

ROD CHART

Rod colors vary by brand: [your color key]

Extra small	Small	Medium	Large	Jumbo
1/8–3/16 in	1/4 in	3/8–1/2 in	5/8–3/4 in	7/8 in +
Tight spiral	Tight curl	Defined curl	Loose curl, wave	Body, root lift
Color: [ ]	Color: [ ]	Color: [ ]	Color: [ ]	Color: [ ]

Patterns: basic, brick lay, spiral, piggyback or croquignole. **Endpoint:** a firm S-pattern that matches the rod size. Check lightened or fragile hair more often, and never go past the manufacturer's maximum time.

IF SOMETHING GOES WRONG

- Solution in the eye: eyewash 15 min, then eye care.
- Hives or wheezing: stop, rinse. Breathing affected: 911.
- Weak curl: reassess in [2 weeks] with a strand test.
- Scalp burning: rinse with cool water 15–20 min.
- Frizzy or mushy curl: rinse, neutralize, never re-perm.
- Breakage at a band: check tension, note on record.

Always write an incident report and check in with the client within 24 to 48 hours.

AFTERCARE

Caring for Your New Curls

The first [48 to 72] hours lock in your curl. After that, moisture and a gentle touch keep it bouncy for [3 to 6] months.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
First 48–72 hours curl is setting	Curls look tighter than they'll settle. A perm smell is normal, mostly when wet.	Keep hair dry for [48–72] hours. Let it fall loose and scrunch gently with fingers.	Shampoo, wetting, sweat and steam. [Tight ponytails and clips for 48 hours]. Brushing.
Weeks 1–2 settling in	Curls relax a little and soften. The smell fades with each wash.	Sulfate-free, curl-friendly shampoo and conditioner. Diffuse or air-dry.	Color for [2 weeks]. Brushing curls dry, flat irons and chlorine.
Weeks 4–12 enjoy it	Curl loosens gradually and new growth comes in straight at the root.	Deep condition [weekly]. Wide-tooth comb on wet hair only. Trim every [8–12] weeks.	Daily hot tools, salt water and rubbing hair with a rough towel.
Ongoing next visit	The perm grows out over [3–6] months. Ends stay curled until they're trimmed.	Book trims and your next perm. Tell me about color, relaxers or health changes.	Box dye, a relaxer or a home perm over this one; they can break hair.

GOOD TO KNOW

- Scrunch, don't brush: brushing breaks up curls
- A microfiber towel or T-shirt helps cut frizz
- Refresh second-day curls with water and leave-in
- Color after [2 weeks], or as I advise
- The perm smell is normal and fades in a few washes
- A silk or satin pillowcase protects your curl
- Swimming? Wet hair and add leave-in first
- Trims every [8–12] weeks keep ends healthy

Stay dry
No water for [48–72] hours.

Hands off
No tight ties or clips for [48] hours.

Go gentle
Sulfate-free, curl-friendly care.

Air-dry
Diffuse or air-dry; skip hot tools.

CALL ME RIGHT AWAY IF YOU NOTICE

- Scalp itching, a rash or bumps
- Blistering, oozing or crusting on the scalp
- Redness or burning that gets worse, not better
- Breakage, or hair that feels gummy

Eye pain or any change in your vision: get urgent eye care today. Trouble breathing, or swelling of the face or throat: call 911.

CURL PRODUCTS TO USE

YOUR NEXT TRIM

YOUR NEXT PERM

INFORMED CONSENT

Chemical Relaxer Consent

YOUR LOGO

CLIENT NAME _____ STYLIST _____ DATE _____

WHAT IT IS
A lye or no-lye cream that permanently straightens hair. A protective base shields your scalp.

WHAT TO EXPECT
About 1.5 to 3 hours. Retouches cover new growth only; a neutralizing shampoo ends it.

HOW LONG IT LASTS
Relaxed hair stays straight until cut off. New growth comes in natural, so retouch every [8 to 10] weeks.

POSSIBLE RISKS AND SIDE EFFECTS

- Tingling, scalp irritation or chemical burns
- Thinning or hair loss, often at the edges
- Uneven straightening or a natural texture left
- Allergic reaction to an ingredient, which is rare
- Breakage, especially where hair overlaps
- Over-processing: limp, weak or gummy hair
- Dryness that needs extra moisture and care
- Damage if relaxer meets perm or curl solution

Some studies (e.g. NIH Sister Study, 2022) linked frequent straightener use to higher uterine cancer risk; ask your physician.

Quick health and hair check

- Cuts, sores or sunburn on scalp
- Burn from a past relaxer
- Pregnant or breastfeeding
- Color or lightener on hair
- Washed or scratched in 48 hrs
- Psoriasis or eczema flare
- Hair loss, thinning edges
- Allergy to a hair product
- Box dye, henna or metallic dye
- Other brand of relaxer used
- Scalp infection or lice
- Chemo, now or recently
- Perm or curl in the past year
- Keratin or smoothing treatment
- Isotretinoin or minoxidil

☐ **None of these apply to me** or list any that do: _____

Lye or no-lye. We agreed on type and strength; my stylist may adjust them to protect my hair. ☐

Please initial each statement

	Initials
I've shared my full hair and health history honestly, including any perms, curls or home treatments.	☐
I understand relaxers and perm or curl solutions can't be used over each other without serious breakage.	☐
I'll tell my stylist right away about burning or stinging, so the relaxer can be rinsed straight away.	☐
A strand test was offered. My stylist may decline or delay the service if my hair is not strong enough.	☐
Results vary with my hair's texture, history and condition. Bone-straight results aren't guaranteed.	☐
I'll follow my aftercare and wait [2] weeks before color. I won't relax my hair at home between visits.	☐
Deposits, fees and corrections follow [Your Business Name] policy. No refunds once the service is done.	☐
Before and after photos for my private record are OK. Social media use only with my separate OK.	☐

CLIENT SIGNATURE _____ DATE _____ STYLIST SIGNATURE · LICENSE # _____ DATE _____

PRACTITIONER PROTOCOL

Chemical Relaxer

Follow your state board rules and the relaxer maker's instructions. Times are typical for a retouch.

SCREEN

Intake cleared. No cuts, sores, flare or infection on the scalp. No thio perm or curl on the hair.

STRAND TEST

Required for first visits, unknown history, color, or possible metallic dye. Record time and result.

PRE-CARE SENT

No shampoo, scratching or hard brushing for [48] hours. Arrive with hair detangled and dry.

SET UP FIRST

- ☐ Hands washed, gloves on
- ☐ Combs and clips cleaned and disinfected
- ☐ Relaxer brand, strength, lot recorded
- ☐ Protective base, neutralizing shampoo ready
- ☐ Fresh cape, towels, timer set
- ☐ Eyewash and SDS in reach

#	STEP	TIME	HOW
1	**Consult & screen**	10 min	Check scalp under good light. Assess texture, porosity, elasticity, history.
2	**Consent & photos**	5 min	Consent signed. Photos of new growth, hairline and nape.
3	**Choose relaxer**	5 min	Lye or no-lye, mild to super. Match strength to texture and scalp.
4	**Section & base**	10 min	Four quadrants on dry hair. Base entire scalp, hairline and ears.
5	**Protect old hair**	5 min	Conditioner or cream on previously relaxed lengths to prevent overlap.
6	**Apply relaxer**	6–10 min	New growth only, 1/4 inch off scalp. Resistant areas first, hairline last.
7	**Smooth**	Per maker	Smooth with gloved hands or comb back. Timer from first application.
8	**Rinse**	5 min	Lukewarm water, scalp to ends, until every trace of cream is gone.
9	**Neutralize**	5–10 min	Neutralizing shampoo, 2 to 3 times, until the color indicator runs clear.
10	**Condition & style**	20–40 min	Deep or protein-balancing conditioner. Heat protectant, moderate heat.
11	**Aftercare & rebook**	5 min	Scalp check. Review sheet and card. Book retouch at 8–10 weeks.

ENDPOINT AND SAFETY

- Smooth, even texture; never past maker max time
- Fine or color-treated hair: milder strength, no-lye
- Never relax over a thio perm or curl, or vice versa
- Leave a little texture: bone straight weakens hair

IF SOMETHING GOES WRONG

- Burning or stinging: rinse that area at once with cool water, then neutralize gently.
- Blistering, open skin or severe pain: stop, rinse 15–20 minutes, refer to a physician.
- Hives, swelling or trouble breathing: stop and rinse. Call 911.
- Relaxer in the eye: flush at the eyewash for 15 minutes; seek medical care.
- Hair turns gummy or stretches: rinse now, skip heat, protein treatment, reassess.
- Scabs or soreness reported later: no chemicals until fully healed.

Always write an incident report and check in with the client within 24 to 48 hours.

RECORD FOR THIS SESSION

Scalp before · after	Strand test result	Treatment · products	Next retouch · initials

AFTERCARE

Caring for Relaxed Hair

Your relaxer has changed the structure of your hair for good, and your scalp needs a few days to settle. Gentle care now keeps your hair strong, smooth and healthy until your next retouch.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
72 hours scalp settling	A slightly tender or dry scalp. Hair may feel softer and lighter than usual.	Wrap or pin hair loosely at night. Sleep on a silk or satin pillowcase or scarf.	Washing for [72] hours. Scratching, hard brushing, sweaty workouts and tight edges.
Weeks 1–2 first washes	Hair may feel a little drier as it adjusts. A light flake or two can appear.	Wash with a moisturizing, sulfate-free shampoo. Deep condition weekly. Use a heat protectant.	Color for [2] weeks. Tight ponytails, braids or edge tension. Flat irons on high heat.
Weeks 3–8 new growth	Natural texture grows in at the roots. The line where textures meet is fragile.	Balance moisture and protein. Detangle gently from ends up. Trim ends every [8 to 12] weeks.	Heat every day. Chlorine without protection. Rough combing at the line of new growth.
8–10 wks retouch time	About 1/2 inch of new growth. Roots feel full and textured again.	Book your retouch. Skip washing and scratching for [48] hours before you come in.	Relaxing at home or stretching past 12 weeks. Any perm or curl solution on relaxed hair.

Retouches

Retouches treat only your new growth, never the hair that is already relaxed. Overlapping is the most common cause of breakage, so let me do every retouch.

Wait to wash

Give your scalp [72] hours before your first shampoo.

Moisturize

Weekly deep conditioning keeps relaxed hair flexible.

Ease the edges

Loose styles protect your hairline from tension.

Go easy on heat

Heat protectant always, low to medium settings.

CALL ME RIGHT AWAY IF YOU NOTICE

- Scabs, blisters or weeping spots on the scalp
- Hair breaking off or shedding in clumps
- Burning or soreness that gets worse, not better
- Redness, swelling or an itchy rash

For scabs, blisters or a spreading rash, please see your doctor or a dermatologist too.

Relaxer in the eye: flush with cool water for 15 minutes and get urgent care. Trouble breathing: call 911.

YOUR RELAXER _____

SHAMPOO · CONDITIONER _____

YOUR NEXT RETOUCH _____

INFORMED CONSENT

Hair Extension Consent

YOUR LOGO

CLIENT NAME _____ STYLIST _____ DATE _____

WHAT IT IS
Added hair attached to small sections of your own hair to build length, volume or color.

WHAT TO EXPECT
About 1.5 to 5 hours, plus blending and cutting. Expect your scalp to feel snug for a few days.

HOW LONG IT LASTS
Tapes and wefts move up every [6 to 8] weeks; k-tips last [3 to 4] months. Hair can be reused.

POSSIBLE RISKS AND SIDE EFFECTS

- Tenderness, tightness or headaches at first
- Traction alopecia if too heavy, tight or overdue
- Matting at the roots without daily brushing
- Reaction to adhesive, tape or keratin, which is rare
- Itching or irritation at the attachment points
- Breakage or thinning of your natural hair
- Slipping bonds, tapes or beads
- Color or texture shifts in the added hair over time

Some shedding of natural hair (often 50 to 100 strands a day) collects at the bonds. That is not damage.

Quick health and hair check

- Hair loss or thinning patches
- Psoriasis, eczema or dandruff
- Chemo, now or recently
- Allergy to adhesive or latex
- Recent color or lightener
- Alopecia or trichotillomania
- Scalp infection or lice
- Pregnant or postpartum
- Allergy to metal (nickel)
- Other extensions now in
- Very fine or fragile hair
- Sensitive or tender scalp
- Minoxidil or hormone changes
- Frequent headaches or migraines
- Swim or work out daily

Hair Extensions

Follow your state board rules and your method's training and maker instructions. Times vary by method.

CONSULT FIRST
Required. Check density, strength, scalp and lifestyle. Color-match and choose method and grams.

HAIR ORDERED
Deposit and non-refundable policy signed first. Log brand, color, length and grams.

PRE-CARE SENT
Wash with clarifying shampoo, no conditioner or oils at roots. Arrive with hair fully dry.

SET UP FIRST ☐ Hands washed ☐ Combs, clips, pliers cleaned and disinfected ☐ Hair checked against order, lot noted ☐ Tapes, bonds, beads or thread ready ☐ Fresh cape and neck strip ☐ Remover and SDS in reach

#	STEP	TIME	HOW
1	**Screen & review**	10 min	Confirm health changes. Scalp check for thinning, irritation, tenderness.
2	**Consent & photos**	5 min	Consent signed. Photos front, sides, back and hairline.
3	**Plan placement**	10 min	Map rows. Keep 1 inch from hairline, part and nape; leave cover hair.
4	**Prep hair**	10–30 min	Clarify if needed. Dry fully; no product at the roots.
5	**Section cleanly**	Ongoing	Clean, even sections sized to each attachment. No stray hairs caught.
6	**Attach**	1–4 hrs	Tape sandwich, k-tip bond, bead or weft per method training.
7	**Tension check**	5 min	Each attachment moves freely; no pulling, puckering or pain.
8	**Blend & cut**	20–40 min	Point cut or texturize so ends blend. Never cut near attachments.
9	**Style**	15–30 min	Heat protectant. Keep tools off bonds and tapes.
10	**Teach care**	10 min	Show brushing from ends up, drying roots, a loose braid for sleep.
11	**Aftercare & rebook**	5 min	Review sheet and card. Book move-up at 6–8 weeks before they leave.

ENDPOINT AND SAFETY

- Attachments flat, hidden and comfortable
- Fine or thinning hair: fewer grams, lighter method
- Total weight suits the client's own density
- Removal by a professional only, with the right remover

IF SOMETHING GOES WRONG

- Pulling or pain at a point: remove and redo that attachment smaller.
- Remover or adhesive in the eye: flush at the eyewash 15 minutes; seek care.
- Hives, swelling or trouble breathing: stop. Call 911.
- Fusion tool or heat touches skin: cool running water 15 to 20 min; refer if blistered.
- Itching, redness or bumps at bonds: remove those pieces; refer if it persists.
- Thinning or bald spots at move-up: lighten the install, refer to a dermatologist.

Always write an incident report and check in with the client within 24 to 48 hours.

AFTERCARE

Caring for Your Extensions

Your extensions are attached to your own hair, so caring for one protects the other. A few simple habits keep them smooth, comfortable and lasting until your next move-up.

YOUR LOGO

WHEN	WHAT'S NORMAL	DO	AVOID
48 hours settling in	A snug, slightly tender scalp. Sleeping may feel different for a night or two.	Brush gently from the ends up. Sleep in a loose braid or low ponytail on silk.	Washing for [48] hours while bonds set. Heat, steam and heavy sweat.
Daily care every day	Some shedding collects at the attachments. Brushing keeps roots tidy.	Loop brush 2 to 3 times a day. Dry roots fully. Use a heat protectant.	Oils or conditioner on bonds. Sleeping wet. Unprotected chlorine or salt water.
Weeks 6–8 move-up time	Attachments sit lower as your hair grows. Roots may start to tangle more easily.	Book your move-up. Come with clean, dry hair and no product at the roots.	Stretching past [8] weeks. Adjusting tapes, bonds or beads yourself.
Removal when it's time	A small ball of shed hair at each attachment. This built up over weeks.	Book a professional removal. Let me check your scalp and deep condition after.	Pulling, cutting or dissolving extensions at home. Box dye on extension hair.

Shedding

Everyone sheds about 50 to 100 hairs a day. With extensions, those hairs stay at the attachment until your move-up, so a little build-up is normal.

Swimming

Wet hair first, add a leave-in, braid it and wear a cap. Rinse right after.

Brush gently

Start at the ends and work up, holding the roots.

Dry the roots

Damp attachments mat and slip. Never sleep wet.

Keep bonds clean

Conditioner and oils go mid-lengths to ends only.

Braid for bed

A loose braid and silk scarf stop tangles overnight.

CALL ME RIGHT AWAY IF YOU NOTICE

- Itching, soreness or pulling that won't settle
- Headaches that started after your install
- Bumps, redness or a rash at the attachments
- Shedding at the root or thin, bare spots

I can loosen or remove pieces that pull. For a rash or bare patches, see your doctor or a dermatologist too.

Face or throat swelling or trouble breathing: call 911.

YOUR NEXT MOVE-UP _____

GETTING READY

Before Your Salon Visit

For color, lightening, keratin, perm, relaxer and extension services. A little prep protects your scalp and helps us get the result you're hoping for.

YOUR LOGO

NAME

APPOINTMENT DATE & TIME

SERVICE

2 weeks
before

No box dye, henna or at-home color or lightener.

Used any in the past [2] years? Tell us, even if it has grown out. Some can react with salon products.

Book your allergy alert test if you need one.

1 week
before

Skip at-home keratin, perm or straightening kits.

Hold off on a trim; we may shape after your service.

Extensions: confirm your hair order and final color match.

48 hours
before

Allergy alert test done and checked for itching or redness.

Don't scratch or brush your scalp hard.

Skip shampoo for [24–48] hours before lightener, relaxer or perm. Natural oils protect your scalp.

Day of
your visit

Arrive with dry hair, styled the way you normally wear it.

Bring inspiration photos, plus photos of looks you don't want.

Wear a dark top; color can stain.

Color & lightening

· Big changes, like dark to blonde, may take more than one visit.

· We may do a strand test first if your hair has past color or unknown history.

· Allergy alert test [48] hours before every color service.

· Color correction starts with a consultation.

Smoothing & texture

· Tell us every chemical service from the last [2] years.

· Relaxer and perm can't go over each other. We'll check your history.

· Keratin fumes can bother eyes and lungs; tell us about asthma.

· Plan a few days without washing afterward.

Extensions

· A consultation and color match come first.

· Hair is custom ordered; deposits are non-refundable.

· Come with clean, dry hair, no oils, serums or dry shampoo.

· Allow [2–4] hours for a full install.

PLEASE CALL TO RESCHEDULE IF YOU HAVE

· A scalp infection, lice or ringworm

· Cuts, scrapes, a sunburn or rash on the scalp

· A psoriasis or eczema flare on your scalp

· A fever, cold or flu, or feel unwell

· Any itching or redness from your allergy test

· Recent chemo or radiation without your doctor's OK

We ask for [48] hours' notice. If it's about your safety, just call. We'll find a new time together.

Important

Pregnant or breastfeeding? It's not an automatic no, but many clients choose to wait. Check with your doctor and tell us so we can plan together. Never stop a prescribed medication without your doctor's OK.

ALLERGY TEST DATE

NO SHAMPOO FROM

NOTES FOR YOU

AFTERCARE · HAIR GUIDE

Your Hair Care Guide

Healthy hair holds color, smoothing and extensions best. Here's how to care for it between visits, how long each service lasts and when to call us.

YOUR LOGO

Daily routine

Wash, rinse, condition

WASH FREQUENCY
[2–3] times a week for most hair. Daily washing fades color faster.

SHAMPOO
Sulfate-free and color-safe, focused on the scalp.

WATER TEMPERATURE
Lukewarm to wash, cool to rinse. Hot water fades color.

DEEP CONDITIONING
A mask once a week, more often if your hair is lightened or dry.

Protect

Heat, sun & water

HEAT STYLING
Heat protectant every time; tools at [350]°F or lower.

SUN
UV fades and dries color. Wear a hat or use a UV hair spray.

CHLORINE & SALT
Wet your hair and add leave-in before swimming. Rinse right after.

BRUSHING & SLEEP
Detangle from the ends up. Sleep on silk or in a loose braid.

How long it lasts

With good home care

COLOR
Roots show at [4–8] weeks. Gloss or toner fades in [4–6].

HIGHLIGHTS & BALAYAGE
Toner refresh [4–8] weeks; highlights [8–12].

KERATIN & SMOOTHING
About [2.5–5] months, fading gradually.

PERM & RELAXER
Perm about [3–6] months. Relaxer retouch every [8–10] weeks, new growth only.

FIRST WASH
Wait [48–72] hours after color or chemical services.

BLONDES
Purple or blue shampoo [1–2] times a week fights brass.

EXTENSIONS
Move-ups every [6–8] weeks; bonds last [3–4] months.

Trim often

Every [8–12] weeks to stop split ends.

Skip box dye

At-home color can react with salon products.

Go easy

Loose styles; no tight ponytails on wet hair.

Ask first

Unsure about a product? Text us first.

THIS IS NORMAL

- Some color in the water for the first few washes
- Toner softening and warming over [4–6] weeks
- A mild chemical scent for a few days after a perm
- Hair feeling a little drier after lightening
- Shedding 50–100 hairs a day (it's natural)
- Extensions feeling snug for the first few days

CALL US IF YOU NOTICE

- Itching, burning, redness or flaking on your scalp
- Blisters, oozing or tender spots after a service
- Hair that feels gummy or stretchy when wet
- Snapping, breakage or patches of thinning
- Soreness, bumps or shedding at extension roots
- Color that turned out very different than planned

Call 911 for trouble breathing or a swollen face or throat. Product in your eye? Flush 15 minutes, then get **urgent care**.

Possible allergy? Rinse with cool water, see a doctor and tell us. Allergies can start after years of safe use.

NOTES

PRACTITIONER REFERENCE

Color Theory Cheat Sheet

Know the level, read the pigment, then neutralize what you don't want.

Levels & underlying pigment

1	2	3	4	5	6	7	8	9	10
Black	Darkest brown	Dark brown	Medium brown	Light brown	Dark blonde	Medium blonde	Light blonde	Very light blonde	Lightest blonde
Red	Red	Red	Red-orange	Red-orange	Orange	Yellow-orange	Yellow	Light yellow	Pale yellow

Top: natural level. Bottom: warmth exposed when lifted to that level. Swatches are a guide only.

Neutralizing pairs

Orange
use blue

Yellow
use violet

Red
use green

Yellow-orange
use blue-violet

Red-orange
use blue-green

Opposites on the color wheel cancel each other to neutral. Use just enough: too much turns hair ashy, muddy or dull.

Developer volumes

DEVELOPER	PEROXIDE	LIFT	USE FOR
10 volume	3%	Up to 1 level	Deposit only: toning, demi, same level or darker.
20 volume	6%	1–2 levels	Gray coverage, standard lift. Max for on-scalp lightener.
30 volume	9%	2–3 levels	Off-scalp foils, high-lift color. Check often.
40 volume	12%	3–4 levels	Off-scalp only, per manufacturer. Never add heat.

GRAY COVERAGE

- **Under 50% gray:** target shade, 20 vol.
- **Over 50% gray:** mix in [25–50]% natural (N) base.
- **Resistant gray:** pre-soften, or add more N base.
- Start where gray is most resistant (often temples).
- Gray reads lighter: go a level darker for depth.
- Use the full processing time; don't rinse early.

TONER & FILLER

- **Toner:** yellow needs violet; orange needs blue.
- Toner can't fix under-lifted hair; lift first.
- **Filler:** going 2+ levels darker over lightened hair.
- Fill with warm tones (red, copper, gold).
- No filler? Color can turn green, muddy or flat.
- Porous ends grab color; dilute or apply last.

Every time. Follow the manufacturer's mixing ratio and timing. Allergy alert test [48] hours before. Strand test on unknown history, box dye or henna. Record formula, developer, time and product lots on the client card.

Minor, no guardian consent [18]	**No**	**No**	**No**	**No**	**No**	**No**

[1] Ringworm, lice, impetigo: defer and refer.
[2] No chemicals on broken skin until healed.
[3] Wait for the flare to settle; ask a dermatologist.
[4] Not an automatic no. Ventilate; avoid formaldehyde.
[5] Fumes from lightener, keratin, perm. Ventilate.
[6] Fragile hair and scalp. Doctor OK, strand test.
[7] Discuss gently. Extensions add weight and tension.
[8] No oxidative color; check toners for PPD too.
[9] Higher PPD risk. Allergy test every time.
[10] Dry, fragile hair and scalp. Strand test.
[11] May irritate under chemicals. Doctor's advice.
[12] Postpartum, menopause: perms less predictable.
[13] Metallic salts + peroxide: heat, smoke, breakage.
[14] Never perm over relaxer. Retouch new growth only.
[15] Never relax over a thio perm or curl.
[16] Bond builder. Watch for gummy, stretchy hair.
[17] Or per manufacturer and product instructions.
[18] Parent or guardian consent required [policy].

Conservative defaults; check your state board rules. Manufacturer instructions, state rules and the client's physician or dermatologist come first. Allergy alert test [48] hours before every color service. Gloves for every chemical service.

AFTERCARE

Hair Color

First 72 hours

your color is settling

DO

· Wait [48–72] hours before shampooing
· Then color-safe, sulfate-free shampoo
· Wash in cool water, 2–3 times a week
· Heat protectant before every hot tool

AVOID

· Pools, saunas and hot showers for 72 hours
· Clarifying or dandruff shampoo
· Sun and chlorine without protection
· Box dye or henna between visits

Roots every **[4–8] weeks**, gloss or toner every [4–6].
Next visit: [date]

CALL ME IF

Scalp itching, burning or rash · swelling at hairline or ears · blisters. Face or throat swelling or trouble breathing: call 911.

Questions? Text [Phone] [Your Business Name]

AFTERCARE

Lightening & Highlights

First 72 hours

your toner is settling

DO

· Wait [48–72] hours before shampooing
· Then purple shampoo [1–2] times a week
· Deep condition or bond repair weekly
· Heat protectant before every hot tool

AVOID

· Hot water, pools and saunas for 72 hours
· Chlorine and salt water unprotected
· Hot tools above [350°F]
· Box dye or home bleach kits

Toner refresh every **[4–8] weeks**, trims every [8–12].
Next visit: [date]

CALL ME IF

Scalp burning, blisters or scabs · gummy or snapping hair · rash or swelling. Face or throat swelling or trouble breathing: call 911.

AFTERCARE

Keratin & Smoothing

First 72 hours

your treatment is setting

DO

· Keep hair dry for [0–72] hours, per product
· Wear it loose and straight, tuck-free
· Then sulfate- and salt-free shampoo only
· Heat protectant before every hot tool

AVOID

· Ties, clips and hats for [0–72] hours
· Sweat, steam and rain until first wash
· Chlorine and salt water, or protect hair
· Color or lightening for [2 weeks]

Results last about **[2.5–5] months** and fade gently with washing. **Next visit:** [date]

CALL ME IF

Itching, rash or bumps · worsening redness or burning · blistering · breakage. Eye pain or vision change: urgent eye care. Trouble breathing: call 911.

Questions? Text [Phone] [Your Business Name]

AFTERCARE

Permanent Wave

First 48–72 hours

your curl is setting

DO

· Keep hair dry for [48–72] hours
· Let it fall loose; scrunch with fingers
· Then sulfate-free, curl-friendly products
· Diffuse or air-dry; wide-tooth comb only

AVOID

· Tight ponytails and clips for [48] hours
· Brushing curls, especially when dry
· Sweat, steam and swimming until first wash
· Color for [2 weeks], and any relaxer

Lasts about **[3–6] months**; trim every [8–12] weeks. **Next visit:** [date]

CALL ME IF

Itching, rash or bumps · worsening redness or burning · blistering · gummy hair. Eye pain or vision change: urgent eye care. Trouble breathing: call 911.

Aftercare cards · 4 × 6 in · cut along the dotted lines

AFTERCARE

Chemical Relaxer

First 72 hours

a tender scalp is normal

DO

· Wait [72] hours before washing
· Wrap hair loosely; sleep on silk or satin
· Use sulfate-free, moisturizing shampoo
· Deep condition weekly
· Heat protectant, low to medium heat

AVOID

· Scratching or hard brushing your scalp
· Tight ponytails, braids or edge tension
· Color for [2] weeks
· Perm or curl solution on relaxed hair
· Relaxing at home between visits

Retouch in 8–10 weeks: _____

CALL ME IF

Scabs, blisters or worsening soreness · breakage or clumps of shedding. **See a doctor** for blisters or a rash. **911** for trouble breathing.

Questions? Text [Phone] [Your Business Name]

AFTERCARE

Hair Extensions

Every day

a snug scalp at first is normal

DO

· Wait [48] hours before washing
· Brush from the ends up with a loop brush
· Dry your roots fully, every time
· Sleep in a loose braid or silk scarf
· Use a heat protectant

AVOID

· Oils and conditioner on bonds or tapes
· Sleeping with wet hair
· Chlorine or salt water unprotected
· Box dye on extension hair
· Removing or adjusting them at home

Move-up in 6–8 weeks: _____

CALL ME IF

Itching, soreness or pulling · bumps or a rash · shedding at the root or bare spots. **911** for trouble breathing or face swelling.
