GETTING READY

# Before Your Salon Visit

For color, lightening, keratin, perm, relaxer and extension services. A little prep protects your scalp and helps us get the result you're hoping for.

YOUR LOGO

NAME

APPOINTMENT DATE & TIME

SERVICE

## 2 weeks
before

**No box dye, henna** or at-home color or lightener.

Used any in the past [2] years? Tell us, even if it has grown out. Some can react with salon products.

Book your allergy alert test if you need one.

## 1 week
before

Skip at-home keratin, perm or straightening kits.

Hold off on a trim; we may shape after your service.

**Extensions:** confirm your hair order and final color match.

## 48 hours
before

Allergy alert test done and checked for itching or redness.

**Don't scratch or brush** your scalp hard.

**Skip shampoo** for [24–48] hours before lightener, relaxer or perm. Natural oils protect your scalp.

## Day of
your visit

Arrive with dry hair, styled the way you normally wear it.

Bring inspiration photos, plus photos of looks you don't want.

Wear a dark top; color can stain.

## Color & lightening

· Big changes, like dark to blonde, may take more than one visit.

· We may do a strand test first if your hair has past color or unknown history.

· Allergy alert test [48] hours before every color service.

· Color correction starts with a consultation.

## Smoothing & texture

· Tell us every chemical service from the last [2] years.

· Relaxer and perm can't go over each other. We'll check your history.

· Keratin fumes can bother eyes and lungs; tell us about asthma.

· Plan a few days without washing afterward.

## Extensions

· A consultation and color match come first.

· Hair is custom ordered; deposits are non-refundable.

· Come with clean, dry hair, no oils, serums or dry shampoo.

· Allow [2–4] hours for a full install.

### PLEASE CALL TO RESCHEDULE IF YOU HAVE

· A scalp infection, lice or ringworm

· Cuts, scrapes, a sunburn or rash on the scalp

· A psoriasis or eczema flare on your scalp

· A fever, cold or flu, or feel unwell

· Any itching or redness from your allergy test

· Recent chemo or radiation without your doctor's OK

We ask for [48] hours' notice. If it's about your safety, just call. We'll find a new time together.

## Important

Pregnant or breastfeeding? It's not an automatic no, but many clients choose to wait. Check with your doctor and tell us so we can plan together. Never stop a prescribed medication without your doctor's OK.
