CHEMICAL SERVICE(S) I'M CONSENTING TO

WHAT THIS COVERS
Color, lightening, toner, keratin and smoothing, perms and relaxers.

PRODUCTS USED
Color, developer, lightener, and waving, smoothing or relaxing solutions.

BEFORE WE START
An allergy alert test before color, and a strand test if your history calls for it.

Possible risks

Allergic reaction. Itching, swelling or rash on scalp, face or neck, even after years of safe use.

Scalp irritation or burn. Tingling is common; burning is not. Speak up right away.

Breakage or damage. Dry, weak or stretchy hair, most often on hair processed before.

Hair history reactions. Box dye, henna or metallic dyes can react with peroxide and break hair.

Fumes. Some products, especially smoothing ones, can irritate eyes, nose and lungs.

Unexpected result. Your hair's history and porosity can make results differ from photos.

More than one visit. Big changes and color correction may take several sessions.

Fading and change. Color fades and shifts with washing, sun, chlorine and heat.

Product in the eyes. Flushed with cool water. Seek care if pain or blurry vision lasts.

Hair loss or thinning. Rare; possible with over-processing, tension or a health condition.

Results depend on your hair's history, porosity and condition, your health and medications, and your aftercare. Pregnant, breastfeeding, or have a scalp or medical condition? Check with your physician first.

Smoothing note: some smoothing products release formaldehyde when heated, even some labeled "formaldehyde-free." Ask what we use.
