AFTERCARE · HAIR GUIDE

Your Hair Care Guide

Healthy hair holds color, smoothing and extensions best. Here's how to care for it between visits, how long each service lasts and when to call us.

YOUR LOGO

Daily routine

Wash, rinse, condition

WASH FREQUENCY
[2–3] times a week for most hair. Daily washing fades color faster.

SHAMPOO
Sulfate-free and color-safe, focused on the scalp.

WATER TEMPERATURE
Lukewarm to wash, cool to rinse. Hot water fades color.

DEEP CONDITIONING
A mask once a week, more often if your hair is lightened or dry.

Protect

Heat, sun & water

HEAT STYLING
Heat protectant every time; tools at [350]°F or lower.

SUN
UV fades and dries color. Wear a hat or use a UV hair spray.

CHLORINE & SALT
Wet your hair and add leave-in before swimming. Rinse right after.

BRUSHING & SLEEP
Detangle from the ends up. Sleep on silk or in a loose braid.

How long it lasts

With good home care

COLOR
Roots show at [4–8] weeks. Gloss or toner fades in [4–6].

HIGHLIGHTS & BALAYAGE
Toner refresh [4–8] weeks; highlights [8–12].

KERATIN & SMOOTHING
About [2.5–5] months, fading gradually.

PERM & RELAXER
Perm about [3–6] months. Relaxer retouch every [8–10] weeks, new growth only.

FIRST WASH
Wait [48–72] hours after color or chemical services.

BLONDES
Purple or blue shampoo [1–2] times a week fights brass.

EXTENSIONS
Move-ups every [6–8] weeks; bonds last [3–4] months.

Trim often

Every [8–12] weeks to stop split ends.

Skip box dye

At-home color can react with salon products.

Go easy

Loose styles; no tight ponytails on wet hair.

Ask first

Unsure about a product? Text us first.

THIS IS NORMAL

- Some color in the water for the first few washes
- Toner softening and warming over [4–6] weeks
- A mild chemical scent for a few days after a perm
- Hair feeling a little drier after lightening
- Shedding 50–100 hairs a day (it's natural)
- Extensions feeling snug for the first few days

CALL US IF YOU NOTICE

- Itching, burning, redness or flaking on your scalp
- Blisters, oozing or tender spots after a service
- Hair that feels gummy or stretchy when wet
- Snapping, breakage or patches of thinning
- Soreness, bumps or shedding at extension roots
- Color that turned out very different than planned

Call 911 for trouble breathing or a swollen face or throat. Product in your eye? Flush 15 minutes, then get **urgent care**.

Possible allergy? Rinse with cool water, see a doctor and tell us. Allergies can start after years of safe use.
